

# THE SUMMER NEBRASKAN

VOLUME XXI. No. 162.

Lincoln, Nebraska, Tuesday, June 13, 1922.

PRICE FIVE CENTS

## Y. W. PLANS PARTY FOR STUDENTS

Iceland Frolic to be Staged at Ellen Smith Hall Next Friday Night

An Iceland Frolic for all women students of the university summer session will be given next Friday, June 16, at Ellen Smith hall at 7:45 p. m. The party is given under the auspices of the university Y. W. C. A., and is a first indication of the summer activities of the organization.

The party is intended to offer a means to get acquainted. For the first time in the history of summer school has such a party been given, but the large attendance makes it possible to carry on many of the regular activities of the year.

Every woman student is urgently invited to attend. Posters are placed in all the buildings and cards have been sent to dormitories and rooming houses. An effort has been made to reach every girl.

Those who plan to attend the party should phone Ruth Ordway at B6450 by Wednesday night, June 14.

An interesting program of games, dancing, music and refreshments has been planned.

## "TALES OF HUSKERS" WINS MUCH PRAISE

Athletic Review Pleases Nebraska Athletes and Students—On Sale at Book Store

"Tales of the Cornhuskers", the athletic review of Nebraska sport activities of the last year, has won much praise from Nebraska athletes, coaches and students. The book is now on sale at the College Book Store to those who are not entitled to a free copy by virtue of having worked for a Cornhusker athletic team. The price is only fifty cents.

The book contains a complete review of Nebraska athletics of all kinds, from golf to football. An idea of how complete it is may be gained from the fact that every sport is reviewed up to the two final baseball games of the year played with Kansas June 2 and 3. These could not be gotten in the book since it was on the presses at that time.

The book is given free to all Nebraska students who worked hard and consistently for a place on a varsity or freshman team. It is sent free to the captains of all high school basketball and track teams and to the coaches of all high schools. The advertising is the means of financing the scheme which has proved very popular with all Cornhuskers.

The book is printed on paper the same size as that used in the Cornhuskers. It contains pictures of all athletic teams together with the win-

## More Attend Uni. This Summer Than Thruout Entire Year 14 Years Ago

More students will attend the university this summer than attended Nebraska throughout the entire school year, winter and summer, fourteen years ago, the year before Chancellor Avery became head of the University of Nebraska executive force. With approximately 2,000 attending the first session, it is believed that the registration of less than 1600 both sessions last summer will be doubled.

Additional sections in English, education and mathematics may be required because of this increase in enrollment from some 1600 the entire last summer to 2000 the first half this summer.

Many of the small sections of the past, too small for good team work and embarrassing to maintain on account of the high per capita student cost, will be filled to normal. These changes will probably necessitate a small addition to the university budget.

In regard to the increase in summer school students Chancellor Avery says:

"I regard this phenomenal increase to be due to the growing confidence of the people of the state in the university and the fact that they are looking to it increasingly as a center of intellectual life and of technical training. An immediate cause is the

activity of the alumni organizations under the leadership of Secretary Holtz and the fact that the state organization has worked during his administration most harmoniously with the regents and the chancellor. For a number of years the attitude of the public school teachers and superintendents of the state has been a matter of worry and some perplexity. The recent regential legislation effecting the Teachers college, its reorganization and the placing in control of it a man in whom the school men have confidence has produced a feeling among the public school men of the state favorable to the university such as has never heretofore existed in the institution. The unqualified backing of practically all these school men not only of the Teachers college but of all the colleges of the university seems now assured. It appears to be reflected in the attendance and the remarks which the students drop. It is gratifying to note that many school men are themselves attending the summer session for advanced work. In enumerating these fundamental causes the excellent publicity work of the present director A. A. Reed, should not be overlooked."

Very respectfully submitted.

(Signed) S. Avery.

## FERGUSON TO ATTEND ENGINEERS MEETING

Will Go to Illinois for Convention of Society for Promotion of Engineering

Dean Ferguson, of the college of engineering will leave June 20 for Urbana, Ill., where he will attend the annual convention of the Society for Promotion of Engineering education which will meet at the University of Illinois from June 20 to 23. Dean Ferguson is chairman of the committee on admissions and will make a report for that group.

At the same time as the Illinois convention, there will be a conference of the same groups of deans of mid-west colleges as met at Chicago last month to confer upon the proposition of a five-year engineering curriculum. It is hoped that a more definite conclusion may be arrived at by this meeting than at the last in regard to the result of the proposition from a standpoint of curriculum and expense. A report of developments at each of the fifteen institutions as a result of the recommendation made after the Chicago meeting to the effect that the five year course developed will also be made.

### LET'S GET ACQUAINTED

Come to the Iceland Frolic at Ellen Smith hall Friday, June 16, 7:45 p. m., for all university women.

## INSTALL CHAPTER OF CHEMICAL FRAT

Sixteen Students Initiated into Rho Chapter of Phi Lambda Upsilon

Sixteen students were initiated into Phi Lambda Upsilon, national honorary chemical organization, a chapter which has just recently been installed at Nebraska. Dr. Gartner, national president and head of the biological department at the University of Minnesota, installed the chapter. The Nebraska chapter is the eighteenth or Rho. The fraternity was founded in 1899. Its membership is based upon scholarship and character. It is similar to Sigma Xi and Phi Beta Kappa.

Following is a list of the men who make up the Nebraska chapter: Cecil I. Mathews, Russel E. Palmateer, Roy G. Story, Meyer Beber, Bernard F. McKenzie, Paul E. Peterson, Randolph T. Majors, Ralph V. McGrew, Jouette C. Russel, Marschelle H. Power, Fred W. Jensen, Ralph A. Jacobson, Milo K. Stutzman, Saul B. Arenson, Rudolph A. Sandsted and Roscoe C. Abbott.

Temporary officers elected are as follows: President, Bernard F. McKenzie; vice president, Rudolph A. Sandsted; secretary, Russel E. Palmateer; treasurer, Cecil Mathews, and council member, Marschelle H. Power.

## PLAN TO START STADIUM SOON

Alumni Association, in Charge of Building Structure, Has Plans Complete

Plans for starting the building of the University of Nebraska athletic stadium are fast being completed. The architect's plans have been agreed upon and within a few months the first work of clearing the present athletic field to make room for the memorial structure will have been started.

The university stadium will be a \$350,000 structure. It is being built in place of the planned million dollar memorial gymnasium which was eliminated from the university future plans by the action of the legislature last fall in cutting down the state expenses and incidentally withdrawing the appropriation for the athletic structure.

The structure as now planned will run one block north of the present athletic field. New ground has been contracted for in that region. The playing field will extend from north and south with the main entrances to the south. A quarter-mile cinder track will run all the way around the gridiron.

Plans as now completed call for building the playing field eight feet below the surface of the ground in order that a complete oval may be made. This action will lower the expense of building concrete bleachers and grandstands. It will require the work of many men to clear away the dirt, but the cost in so doing will be less than the cost of erecting concrete seats all the way around. The new stadium when completed will seat 35,000 people. It is to be built in several units.

## LARGE ENROLLMENT CAUSES CONFUSION

Instructors and Students Have Hard Time Getting Started With Classes

Large enrollment in summer school classes has caused considerable confusion to instructors and students in general. Registration for the first session this year is nearly double that for both sessions last year. This unexpected heavy enrollment has found many classes with students in high numbers enrolled.

The instructors of the different courses have been busy making every effort to rearrange and schedule their classes to fit in with the enrollment. The teachers of the state have taken advantage of the courses in education and a large majority of the classes in that work are overflowing. Most of these have been divided into halves and several classes
