

## ANNUAL MILITARY CARNIVAL TO BE SATURDAY NIGHT

Excitement Enough for Everyone Attending is Plan of Committee in Charge

### DANCING WILL START AT 8

Sorority Girls Will be Bar-maids and Serve Drinks to Thirsty Cowboys

"Leave your guns and razors at home. There'll be gambling and we don't want anyone shot up. Bring your own whiskey—that's the only thing we won't sell at the bar. The Alpha Phi's are going to costume as barmaids and wild women," said a cadet officer last night in describing the second annual Military Carnival to be held in the Armory Saturday, November 18, at 7:30. Since this is Dad's Day, all fathers will be guests of the military department and will be admitted free of charge to the carnival.

A faro game, a candy wheel, and a roulette wheel are among the gambling games. The admission price of 30 cents includes the dance, a cap, and a drink at the bar. Dancing begins at 8 and will continue until 11:30 without intermission. Tickets were offered to the cadet companies yesterday, and in four companies, about 100 tickets were sold.

A rip-roaring saloon and dance hall of '49 is the model after which the committees are patterning. About the only feature of such a place that is left out is Klondike currency, and that to keep accounts straight.

Committees are announced as follows:

- General Manager—Grant Lantz.
  - Finance—Harry LaTowsky.
  - Publicity—P. Rogers.
  - Bar—Joe Noh, Nelson, Hewitt.
  - Gambling—Proebsting, McMontes, P. Rogers.
  - Tickets—Frost, King, Sonn, Taylor.
  - Decorations—Tullis, Willey.
  - Checking—Ross, Cunningham and Wight.
  - Music by Northwall's.
- The committees promise plenty of confetti, serpentine and decoration. The affair is to be the wind-up of Dad's day, and they are trying to make it a grand finale.

## NEBRASKA HAS TWO VALLEY GAMES LEFT

Cornhuskers Meet Kansas Aggies and Ames in Final Contests for Championship

If Nebraska doesn't tuck away the Missouri Valley conference championship the Kansas Aggies or the Cyclones will rate considerably higher than they do today for they are the only ones that have a chance to break the Husker hold and their chance is pretty small.

There are but few conference games in the valley this week. Drake has been running along without a defeat so far this season and she has a good chance to end up the season at the head of the column. In that case Nebraska will be forced to share honors with her Iowa friends. Drake's claim to the championship will be quite legitimate, but she has no occasion to think of being on the same level with Nebraska. Her games have not been with the better teams in the conference and her scores have not been as decisive. The Manhattan Farmers are still boasting a perfect percentage, but two of their games have been tied and the rest were with the weaker teams in the conference. Grinnell has won but one game and stands well in the way to lose another one when she clashes with the Bulldogs Saturday. Missouri will have an easy time disposing of Washington U. according to indications. Kansas meets the Colorado outfit on the home field while the Texas aggregation journeys north to meet the Sooners, at Norman. Iowa State will meet the Central Teachers at Ames.

Regent Harry Landis, president of the Board of Regents, who was recently re-elected to the Board was a visitor Friday and Saturday at the University.

The alien never really learns to tell Americanized until he can say "Wot tell."

## Kosmet Klub Will Meet to Consider More Manuscripts

Kosmet Klub members will meet tonight at 7 o'clock at the Alpha Tau Omega house to continue the consideration of the manuscript submitted this year in the contest for the annual Kosmet play.

The first of the comedies submitted to the Kosmet club this year was read at a meeting at the Phi Delta Theta house. The entire manuscript was covered in the one meeting.

A prize of one hundred dollars is awarded annually for the best musical comedy written by members of the University. The members of the Klub act as judges.

## DATES CHANGED FOR NATIONAL MEETING OF SIGMA DELTA CHI

Advance Dates One Day on Account of Football Game Between Aggies and Huskers

Owing to the Aggie-Nebraska game at Lincoln, November 18, the national convention of Sigma Delta Chi originally scheduled for November 16, 17 and 18, has been advanced one day. This will mean that the convention will be held at the Kansas State college on November 15, 16 and 17.

The procedure for the conclave has been almost completely mapped out by this time. According to the present arrangement, the Kansas State chapter is hoping that all official business can be concluded in time for a trip to Topeka and an inspection tour of the Capper plant.

Arthur Capper, now junior senator from Kansas, is one of the most interesting figures in American journalism today. Therefore his main Kansas offices should hold an especial attraction for this reason. Not only is the Topeka plant one of the largest in the United States, but his branch offices and publications reach into every state of the middle west and are rapidly becoming national in scope.

### Have Full Program.

Plans for the entertainment of the delegates also include a smoker and get-acquainted session with the local business men Wednesday night, a dance Thursday, and a big wind-up banquet the last evening of the convention. Several speakers of national prominence have been selected and obtained to make the principal addresses of the convention. However the entire slate has not been definitely completed.

Wednesday, November 15.  
 Morning—8:00—Registration of delegates. 10:00—Opening of the convention. Address of welcome.  
 Afternoon—1:00—Business session appointment of committees. Committee meetings. 4:00—Reconvene. 8:00—Convention smoker.

Thursday, November 16.  
 Morning—8:00—Reconvene. 12:00—Luncheon with Theta Sigma Phi.  
 Afternoon—1:00—Reconvene. 8:30—Convention dance. Recreation hall.

Friday, November 17.  
 Morning—8:00—Reconvene. Committee reports. 9:00—Convention banquet: speakers, Charles M. Harger of Abilene and Morco Morrow of Topeka.

## DENTS ACCEPT LAWS BOWLING CHALLENGE

Possibility for All-College Bowling Tournament in the Near Future

The following challenge made by Law College has been accepted by the Dents. The note turned into the Nebraska office reads as follows: "We note in the Nebraskan that the Laws formally challenge for an inter-college bowling match. Suffice it to say, the Dents accept with pleasure. We are ready to go at any time acceptable to the Laws."

Signed. L. J. MACKAY, "President Dental Students' Association."

The ball started rolling by the Laws is quickly increasing its speed, and it is expected that replies from other colleges will soon be in. If enough of the colleges are interested, it is believed that some form of tournament can be established, and thereby a winning team from the whole university can be picked.

Joe Pekar, ex-'18, is now night telegrapher of the Milwaukee Journal.

## COLONEL BOYDEN TELLS ENGINEERS ABOUT CONCRETE

Head of Portland Cement Company of Chicago Talked at Special Convocation

### EMPHASIZES ADVANCEMENT

Explains Various Ratios to Use in Mixing Materials and Gives Men Valuable Information

Colonel H. C. Boyden of the Portland Cement Association of Chicago talked to campus engineers in a special convocation at 11 o'clock Monday, in M. E. 205. He emphasized recent advancement made in knowledge of proper proportions of materials in concrete, thus adapting it to use in all types of structures. He especially pointed out the necessity of considering the water content of mixtures.

By the use of proper designs and mixtures he showed that it is possible to save large amounts in money and material in construction projects.

"There has been a decided advance in the last few years in recognition of the fact that the water-cement ratio used in a mix is of prime importance in determining the strength of concrete," he said.

Directly dependent upon this fact, he showed that when the mixtures used are to be handled in long chutes, an additional amount of water necessary for lubrication must be accompanied by additional cement in order to maintain the quality of strength.

Similarly, in roads and other work where stiff mixtures can be used, the cement content may be diminished, without decreasing the strength of the concrete. These facts lead him directly to the conclusion that in large structures it will pay to use several different mixes for the different parts, the mix depending on the method of handling and of putting into place. Where a thin mixture is necessary, it should be richer in cement. Such mixes are often necessary for successful packing around reinforcement.

Curing during the setting of concrete is important in establishing its strength. If practicable, he said, concrete should be kept moist for twenty-eight days, by flooding, or by covering with earth or burlap and sprinkling. Proper handling during this period, Colonel Boyden insisted, may as much as double the strength of the concrete.

In conversation, Dean Ferguson said Colonel Boyden casually remarked that a proper design of the concrete mixtures for Nebraska's new stadium should be capable of saving many thousand dollars over the cost typically incurred in the use of ordinary standard mixtures.

## Legion Auxiliary Organizes Campus Post for Women

All girls who are members of the American Legion Auxiliary, or who are eligible to membership, are urged to be present at a meeting at Ellen Smith hall at 5 o'clock Monday, November 20.

The American Legion Auxiliary is an organization developed within the American Legion, in response to the appeal sent out by the wives, sisters, daughters, and mothers of men who were participants in the World War.

Through the courtesy of the Lincoln Post of the Auxiliary, it is possible to form, under its charter, a Campus Post. This organization is a live all-American society, and it is hoped that all those girls who are eligible to membership will show their loyalty to those who have gone before, and to the United States by coming to the meeting at Ellen Smith hall next Monday at 5.

## Sophomores Urged To Make Tryouts For Debate Team

All sophomore debaters are urged to try out for the sophomore debating team. Inter-class debate will be one of the big things this year, if the students get behind it and push for their respective classes.

Sophomores who are interested are asked to give their names, addresses and telephone numbers to Wendell Berge, chairman of the class debate committee.

The chief objection to a living wage is that it makes no allowance for blow-outs.

## Silver Serpents Sell Candy Today In Social Science

Home-made candy and other confections, which spicy weather brings into popularity, will be sold today in Social Science Hall by the Silver Serpent, junior girls society. Quantities of fudge, the traditional favorite, have been prepared, and other delicacies, such as penoche and divinity, will be available. Stuffed dates will also be on the market.

These dainties have been prepared at Ellen Smith Hall by members of Silver Serpent. The purpose of the sale is, of course, to secure funds for the organization. The committee in charge feels that the greatest difficulty lies not in obtaining the money for their wares, but in supplying the demand, which will undoubtedly be overwhelming.

## CITY STADIUM DRIVE GETS UNUSUAL START

Lincoln Business Firms and Individuals Respond in Splendid Manner with Subscriptions

Twenty-eight groups of men started canvassing the city Tuesday morning for the remainder of the \$150,000 to be raised for the University Stadium, and when the first one reported at 1 o'clock, four new \$500 pledges were added to the list, besides scores of lesser ones. Other reports will be added during the day and the total indicated on the big canvas clock face erected Monday on the wall of the Chamber of Commerce building.

More than half of the city's quota was subscribed at the banquet of the committee of five hundred, Monday evening. Most of the firms and men in the city are very enthusiastic about the proposed stadium. Those that aren't quite so enthusiastic are going to welcome a "hard boiled" committee under the command of Eugene Holland.

The Omaha drive opened Tuesday but the results have not been announced as yet. The Omaha people are asked to subscribe \$60,000 to the fund. This is only about one-third of the sum that the residents of Lincoln have been asked to subscribe. The generous donations of the local people will undoubtedly be repeated in the northern metropolises.

The city has been divided into twenty-seven districts so that no one will be missed. Men have been appointed to take care of each district.

A list of men and firms who contributed \$500 or more which was given out by the stadium officials is as follows:

- \$10,000. Miller & Paine.
- \$5,000. Woods Brother companies.
- \$3,500. First National bank.
- \$1,600. Lincoln Gas & Electric company.
- \$1,500. Eli Shire.
- \$1,075. O. J. Fee.
- \$1,000. Hardy Furniture company, W. H. Ferguson, Beatrice Creamery company, Cornell Supply company, State Journal company, Grainger brothers, George W. Holmes, C. B. Towle, Harvey Rathbone, E. J. Walt and Magee Clothing company.
- \$800. Henkle & Joyce Hardware company, H. P. Lau and Raymond Bros. Clark company.
- \$750. Searle & Chapin.
- \$600. W. F. Hoppe.
- \$500. Globe Laundry company, the Lindell hotel, Central hotel, Star Publishing company, Gooch Milling & Elevator company, Harpham Bros. company, Riddour company, Proudfit company, University Publishing company, F. R. Hussong, S. S. Kresgo company, Arthur Dobson, Bohannon & Mullen company, J. H. Markel, Benway Furniture company, Western Supply company, Queen Incubator company and F. E. Coatsworth.

A co-ed from Kansas, seated on a cracker box and munching cakes of chocolates, was the first in the long line waiting for gallery seats at the opening of the Metropolitan Opera company's season Monday night. She was Ruth Burgard of Leavenworth, a student at Columbia university.—The Lincoln Star.

## HEALTH WEEK IS EMPHASIZED AT CONVOCATION

Dr. J. Stanley Welch Addresses Students on History and Cure for Long Time Enemy

### MANY PRE-MEDICS ATTEND

Address is Full of Interesting Facts About Cancer and Its Development and Effect

Dr. J. Stanley Welch spoke at the University convocation Tuesday morning on the subject of cancer, in accordance with the observance of public health week. More than half of the audience were pre-medical students.

Dr. Welch urged the students to accept the facts about cancer, and to devote some of their spare time to an understanding of the disease and to teach others about it, emphasizing that it is no shame to have the disease, that it can be cured early and has few symptoms. "As much can be done with cancer as has been done with tuberculosis," the speaker said.

The history of cancer, and some of its cures, were outlined briefly by the speaker from the time of the early Egyptians in 1500 B. C. up to the present time, when about 100,000 persons die of the disease in this country every year. Another 100,000 have the disease and will die within a year, and still another group of the same number are mildly afflicted now but will not seek relief in time and will ultimately die from the effects of cancer.

"We do not know what causes cancer, but we do know what cancer is," the speaker explained. "Briefly, cancer is a wildfire growth of ordinary cells, an unrestricted abnormal growth of normal cells." He likened a cancer growth to a brick in a wall which loosens its relation to the whole, and grows out independently. A cancer is the same, with a loss of control, or overgrowth, that piles up and pushes in or out, and occasionally drops into the blood and is carried to another part of the body as a secondary cancer.

Cancer develops where there is a chronic irritation, and usually in middle age. It appears in tissues where there is a degeneration with age. There is a difference of opinion as to the heredity of cancer.

Dr. Welch mentioned three cures for cancer, which includes caustic paste, the use of which leaves an ugly scar, and is not so rapid or certain; radiant energy of the X-ray or radium; and surgery, by which the largest number of cures are effected, and which is safe and sure, if used early enough.

The folly of manipulation of a cancer growth was explained by Dr. Welch. He stated that physicians are now convinced that cancer is not a germ disease or a blood disease.

The American Society for the Control of Cancer has recently taken up the study of the disease, and it is under the auspices of that organization that public health week, with special emphasis on the cancer question, is being observed throughout the country this week.

## Twelve Girls Taken Into Honorary Co-ed Journalistic Society

Twelve new members were initiated into Theta Sigma Phi, women's honorary and professional journalistic fraternity, at Ellen Smith hall Tuesday afternoon. The initiation was followed by a banquet at the Lincolnshire.

Miss Gertrude Patterson, president of the chapter, was toast-mistress at the banquet. Short feature articles on assigned subjects were read by the initiates. Alumni on the toast list were: Miss Louise Pound, Miss Marguerite McPhee, and Miss Sarah T. Muir.

The new members are: Stella Andrews, Eleanor Dunlap, Zella Gilmore, Bonnie Hess, Helen Kummer, Leata Markwell, Ruth Miller, Edith Olds, Emily Ross, Mrs. Henry Schulte, Mary Ure and Marjorie Wyman.

Radio will be used to broadcast a lecture to the subject of cancer in connection with control of cancer week. The United States public health service will send out two broadcasts on the subject through the navy station at Anacosts. The first message will be sent tonight at 7:45 o'clock and Thursday at the same hour the second message will be transmitted.—The Lincoln Star.

## Ames Students Plan Special to Lincoln For Nebraska Game

Students who wish to go to Lincoln, Neb., to witness the Iowa State-Nebraska game on November 25, will have the advantage of a special rate of \$19.67 for the round trip providing 125 persons signify their intention of making the trip. This special rate is considerably lower than the regular fare which is \$17.28. The train will leave at 2:40 a. m. Saturday morning and arrive at Lincoln at 11:59 a. m., returning that night. Those who can go are asked to leave their names at the gymnasium office at once.—Iowa State Student.

## TICKETS WILL GO ON SALE THURSDAY FOR FIRST UNI "DAD'S DAY"

Men May Purchase Tickets From Booths Beginning Thursday Morning

Tickets for the first annual "Dad's Day" dinner to be held at the Armory Saturday noon will be sold in the colleges Thursday.

Booths will be erected and every man will be given an opportunity to buy a dinner admission card for 50 cents. It is important that every man buy tickets for his father and self on Thursday, as the tickets are limited and it is expected that the exact number of fathers who are coming to Lincoln Saturday will be known by the committee in charge of the arrangements for the day.

Tickets for the game in the afternoon, immediately following the luncheon will be sold at the booths and at the luncheon. The fathers will sit with their sons in the regular student section and will pay only the student rates for the game. The popularity of the game is assured on account of the fact a Husker victory will practically clinch the Valley title for Dawson's men.

Elaborate plans for the luncheon at noon at the Armory are being made. The program announced by the committee includes a good meal with music and a few short speeches by men whom the fathers ought to know. The Husker football squad may be present at the dinner.

In the evening, fraternities have planned dinners and entertainment at the various houses. Following these, the military carnival at the Armory will furnish plenty of excitement for young and old.

Replies to the letters which were sent to out-of-town fathers telling them of the plans for the day are being rapidly received. It is necessary that a complete check of the number attending the banquet be in the hands of the committee by Thursday night. Fathers and sons will be given preference over fraternity and rooming-house groups in the sale of tickets for the luncheon.

"We beat Kansas, but we didn't beat the Kansas spirit. We beat Oklahoma, but we didn't beat the Oklahoma spirit. They carried our team off the field on their shoulders. Their own team was beaten, but they were still behind it. This is a con- (Continued on Page Four.)

## WORK STARTED ON AFFILIATION WEEK

Committees Meet and Hold Banquet in Preparation for Coming Week

In preparation for Church Affiliation Week and the Universal Day of Prayer, the members of the student membership committees of the various churches held a banquet last night at the Red Room of the city Y. M. C. A. The meeting was called by the chairman of the Y. M. and Y. W. Church Affiliation committees, Earl Smith and Miss Grace Spacht. About 100 people were present.

"The Things We Hold in Common," was the title of a talk by Josephine Schramek in which she explained the common aims of the churches. Welch Pogue spoke on the subject, "Our Aims." He explained the purposes of the student groups in the churches. W. H. Riley spoke on behalf of the students pastors of the university. Miss Grace Spacht presided.

This meeting was held in order to get the members of the committees acquainted with their duties during the campaign for church members.

## COMPLETE PLANS FOR CELEBRATION ALL DAY FRIDAY

Students of Business Administration College Have Excellent Program for Entire Day

### PARADE EARLY IN MORNING

Football Game in Afternoon Will Be One of Many Features—Dance in Evening in Armory

Students of the College of Business Administration are behind the plan for a college celebration next Friday almost "to the man." That fact is indicated by the number of "Bizad" Day ribbons on the coat-lapels of the loyal "Bizad" students who plan to take advantage of the big day of the year for their college.

Ribbons, which serve as full-day passes to all of the events on the program for the day, have been on sale since Monday morning. Students of the college and the members of the faculty have already signed up in large numbers as highly in favor of the college celebration by purchasing the ribbons early. The sale of the ribbons will continue throughout the week. The price of the full day passes is one dollar.

From early morning until late night the students of the college will celebrate on Friday. The program for the day will start off with a bang with a parade at 8:45 in the morning. The "Bizad" boosters will march through the downtown streets of Lincoln, cheering for their college and carrying banners telling of its fame.

In the parade will be several floats placed there by Lincoln business men. The floats will be decorated by the firms which donate them. They are being placed in the parade as an indication of close co-operation which exists between the "Bizad" college and the Lincoln business men.

The parades will then march past the high school and out to Antelope park where a busy program has been arranged. Everything from mass games to a free-for-all fish fight is included in the program for the day. And the best of all is the football game between the "Bizads" and the Laws which will be played in the afternoon at the High School Field. In the evening comes the dance in the Armory when the Northwall orchestra will send forth the musical waves for the entertainment of the future business men.

## PROFESSOR DEBAUFRE GETS APPOINTMENT

Will Work With Committee in Study of Oxygen or Oxygenated Air for Use in Mines

Professor W. L. DeBaufre, chairman of the Department of Mechanical Engineering, has been selected a member of an advisory committee to work with the United States Bureau of Mines in a study of the use of oxygen or oxygenated air, in metallurgical operations. He will work with almost the same group of men as that with which he worked in the recently successful effort to recover helium from natural gas in one operation.

The use of oxygen in connection with the enrichment of the blast in blast furnaces and in practically all phases of pyro-metallurgical work will furnish a key to success in further development of such metallurgical operations, according to Dr. F. G. Cottrell, formerly director and now consulting metallurgist of the United States Bureau of Mines, who first directed the Bureau's attention to the subject. Through this enrichment process it is hoped to increase the efficiency of metallurgical operations with resultant production of metals at a lower cost, and possibly with the use of low grade ores.

The Bureau of Mines has outlined plans for two studies to be carried on simultaneously: the first to cover present-day processes for production of oxygen in order to determine the feasibility of attempting to produce oxygen, or oxygenated air, in such amounts and at such cost as to permit its use in metallurgical operations; the second to be devoted to the feasibility of using oxygen, or oxygenated air, in metallurgical operations.

Because of his interest in the investigation, M. H. Roberts, vice-president of the Franklin Railway Supply Company, was asked to select an ad- (Continued on Page Four.)
