 (Continued From Page One.)
 the championship in the 100-yard and 220-yard events will also find some competition in William Hein, 1924 letter man, who is showing up well in the sprint races and the quarter.
 Sophomore candidates for the squad who look to be promising material are Avar Mandery of Tecumseh, Ben Triba of Osceola, and Frank Dailey of Lincoln. Among those who will be fighting for berths in the quarter-mile are Ted Forsythe of Broken Bow, Mandery of Tecumseh, Milne of Grand Island, and Tappan, Sioux City.
 In the half-mile James Lewis of Lincoln and Willard Dover of Mad-

son are the chief competitors. The vacancies left by the graduation of Gardner and Higgins will be hard to fill. Lewis is the strongest representative out. He is captain of the 1925 cross-country team and a track letter man last year.
 Coach Schulte has a number of men out for the distance events, the mile and two-mile run. Jack Ross of Gibbon is practicing daily and Jake Cohen of Lincoln has reported also. The former is a veteran in the mile while the latter won his letter as a two-miler. Paul Zimmerman, Lincoln captain of the 1924 cross-country runners; Jacob Schultz, Blair; Lester Lawson, University Place; and Dick Ross, Gibbon, are the outstanding men in this class.
 In the hurdle events are Ed Weir who placed third in the Valley outdoor meet last year; Wilmer Beerkle of Omaha; Don Reese of Upland, Cal.; and Frank Wirsig of Sargent. Among the sophomore hurdlers are Mandery, Dailey, and others.
 "Choppy" Rhodes of Ansley and Gillian of Ashland are the only men who appear able to fill the positions in the high jump and broad jump. Monroe "Duke" Gleason of Lincoln and Hobart Davis of Sidney, Iowa, will again be back in the pole vault. Gleason holds the Nebraska record for the sky-scraping. Wirsig and Paul Kamm of Yuma, Colo., are other promising vaulters.
 In the shot put and discus throw the chief aspirants for honors are Frank Pospisil, Lincoln; Joe Weir, Superior; Homer Scott, Lincoln; Walter Kriemelmeyer, Cambridge; and probably Douglas Meyers of Beatrice. Kriemelmeyer is out for the first time in track clothes and appears to be a "find" in the shot put.
 Joe Wostoupal of West Point and Henry Brainard of Lincoln are leading prospects in the javelin throw.
 The oval track under the Stadium stand has been heavily coated with cinders and dirt has been added to give it firmness. Pits filled with sawdust have been prepared for the jumping events and a board straight-away has been laid to give practice on the boards.
 Coach Schulte hopes to schedule one or two indoor meets to be held on the Nebraska oval in February or March. The schedule as completed is as follows. A dual meet may be slated with Kansas State Teachers College of Emporia, the contest to be held in Lincoln.

Indoor.
 Feb. 7—Kansas City Athletic Club meet at Kansas City.
 Feb. 28—Illinois Relays at Urbana.
 March 13, 14—Missouri Valley Indoor Meet at Kansas City.
Outdoor.
 April 4—Leland Stanford at Palo Alto, Cal.
 April 18—Kansas Relays at Lawrence.
 April 24, 25—Drake Relays at Des Moines.
 May 8—Triangular meet at Manhattan—Nebraska, Kansas Aggies, and Kansas.
 May 23, 24—Missouri Valley Outdoor Meet at Norman, Oklahoma.

BARKER SPEAKS ON HEREDITY
 Freshmen Hear Second Lecture on Biology.
 Elementary principles of heredity in animals and man were outlined before freshmen of the two freshman lecture sections this week by Franklin D. Barker, professor of medical zoology and parasitology. The lecture was the second on the subject of biology.
 "Heredity in both animals and plants is determined by three biological principles: maturation, fertilization, and mitosis," explained the lecturer. "Although these laws are applicable to plants, animals, and man, the latter group has two other factors which determine its specific characteristics. These are, besides heredity, environment, and self-effort."
 An explanation of Mendelism and the three governing laws which are the most important were also given by Professor Barker. Mendelism was discarded as being the principle laid down in the first laws of heredity given to the world. They were made known by Mendel in 1865 after eight years of experimentation, and so are called the Mendelian laws.
Value of Zoology.
 In explaining the laws of heredity the lecturer stated that all of our study of heredity and of animals brings us to one objective—the further knowledge of man. The chief value of the entire study of zoology is the appreciation of further knowledge of man, he said.
 Animals are certain combinations of characters, and are distinguished from others by this particular combination. In reproducing its kind the animal perpetuates its characteristics to the next generation.
 "All animals reproduce their kind," stated Professor Barker, "The lower

animals do this by mere division of cells, and some function in this manner by building, just as plants. Here there is no chance for a variation of characteristics in the new animal.
 "But the higher classes of animals reproduce their kind by special germ cells, contributed by two individuals. The union of the germ cells combines the characteristics of the two parent animals in the new one.
Chromatin is Granular.
 "The phenomenon which perpetuates the characteristics of animals is found in a substance continued in the germ cells, chromatin. This is a chemical combination in the form of granules and for every specific char-

 The very best remedy for spring fever is a new spring hat. Rudge & Guenzel's are showing the very first of the season's models now, and I know their soft, lovely fabrics, unusual shades and distinctive lines will delight you. Some Hats are quaintly peaked and flaunt gay flowers, others of lustrous satins are richly embroidered, and some alluring little hats use folds of chiffon to veil bright eyes. Your spring Millinery troubles will vanish quickly if you choose your new Spring Hat from Rudge & Guenzel's new models.
