BUILDING COMPETITIONS

At the University of Indiana the increasing amounts of money spent by fraternities for new homes has led the editorial writer of the student newspaper to protest. He points out that fraternities are no longer satisfied with merely comfortable living quarters but that they now demand palatial residences. A building competition has developed in which each fraternity attempts to outstrip its rivals.

This problem, while not yet existent in the Missouri Valley, has frequently appeared on other campuses. Sometimes it has been administrative officials of the schools who have settled it; sometimes it has been dealt with by the national officers of fraternities, who realize that this sort of thing brings the whole Greek-letter system into disrepute.

STATISTICS ON STUDENT SELF-SUPPORT COMPILED

(Continued from Page One.)

Graduate College women again head the list with 53 per cent or 51 out of 98 students, wholly self-supporting, and more than the average number partially self-supporting. Women of the College of Business Administration are lowest in the former rating, only 7.6 per cent wholly self-supporting. The smallest percentage of partial self-support is among Fine Arts women. They are next to the bottom in wholly self-supporting ranking. Teacher's College women have the highest percentage of partial self-support, with 27.5 per cent or 270. Men in this college rate lowest in this respect. There is in this matter, but slight variance, not quite ten per cent, in the compilation for the different colleges.

Expense for Year  
3. Expense during the college year: Men, average \$714.66; women, average \$729.85.

College	Men	Women
Agriculture	\$674	\$648
A. & S.	698	687
Bus. Ad.	712	764
Dentistry	715	764
Engineering	586	700
Graduate	811	700
Med.	877.72	700
Pharm.	877.72	700
Teachers	610	630

The extremely low indication of expense for the college year on the part of the Engineers is largely thought to be due to the less expensive dress of the members of the college in their attendance at everyday classes, and to their less active participation in social life in the University. Their total expenditures, fifty dollars lower than the average for members of the College of Pharmacy, are increased more than those of any other group by numerous laboratory fees, which makes their personal expenditure still more scant. Long hours spent in laboratory work do not, in many cases, allow men to engage in sufficient outside work to meet their expenses, making strict economy necessary.

Women in the Teacher's College indicate an average expenditure of but forty-two dollars more than the Engineers. This average is lowered by the realization of the value of money by this group more than any other, following experience in earning by teaching before their matriculation.

Fine Arts Women Highest

The highest indication, \$849 for women in the School of Fine Arts, exceeds the Teacher's College indication by \$220, or \$25.00 per month. Men in the College of Medicine, at Omaha, spend less than this by a mere ten-dollar margin. The itemized account of the average expenditures of the Medics is: Fees, \$139.45; books and instruments, \$68.16; lodging, \$137.02; board, \$249.16; incidentals, including recreation and travel, \$125.43; and clothing, \$122.46; totalling \$837.72. Of this amount, \$71.3 per cent, the partially and wholly self-supporting students have earned an average of \$330.00

per year, or more than one-third the expenses for the period.

In the seven colleges in which both men and women are represented, the expenditures for the women average higher than those of the women in four: Business Administration, Fine Arts, Pharmacy, and Teachers.

Proportion of Support

Proportion of support during the present college year derived from the following sources: A. Parents or friends; B. wages received prior to matriculation; C. Wages received last summer vacation; D. Wages received from labor during the college year; E. Borrowed money; Men: A. 31.43 per cent; B. 20.13 per cent; C. 13.03 per cent; D. 22.3 per cent; E. 12.14 per cent.

Women: A. 69.91 per cent; B. 12.37 per cent; C. 5.13 per cent; D. 8.48 per cent; E. 4.79 per cent.

Compilation for the Men

College	A	B	C	D	E
Agriculture	28.2	29.2	13.4	15.7	14
A. & S.	11.9	16.7	15.5	22.9	32.9
Bus. Ad.	46.3	16	11.3	21.2	5.2
Dentistry	35.2	13.4	12.2	14	25.6
Engineering	38.4	23.4	17.4	16.2	7.6
Graduate	7.3	37	7.6	33.5	14.6
Law	37	20	11	15	17
Pharmacy	32.4	18.2	16	19	14.4
Teachers	30.3	24.2	12.9	18	13.5
Fine Arts	20	15	15	47.5	4.5

Business Administration and Arts

College men receive the greatest percentage of aid from parents or friends. These two student bodies are greatest in enrollment, and include courses leading to later specialization. Graduate men, whose parental support is the least, acquire a large percentage of funds from wages prior to matriculation, and rank second in earning capacity for the college year. Their loans approximate the average. Figures of the Engineers are close to the lines of averages in all five classes, as are those of the Teacher's College men. Fine Arts men rely to the greatest extent on their earnings during the college year, many of them utilizing their training immediately by securing positions in line with their work in that school. This is especially true of musicians who play with orchestras.

Compilation for the Women

College	A	B	C	D	E
Agriculture	7.4	12	3	6	5.5
A. & S.	76.7	7	3.4	7.4	5.5
Bus. Ad.	74.3	2.3	3	22.4	7
Graduate	39.7	35.3	3	14.5	10.5
Pharmacy	83.4	4	16.6	—	—
Teachers	64.9	20.6	5.2	6.7	4.6
Fine Arts	76.4	5.4	8.6	2.4	7.2

The only deviation of note in regard to the amount of support received from parents or friends is that of the Graduate women, who receive far less than those in any other college. Graduate women indicate the highest percentage of wages earned prior to matriculation, but none during the last summer vacation. They are second highest in wages received during the school year. Their percentage of borrowed money is the highest.

Teachers College women are second to the Graduate in percentage earned before matriculation, while the majority of other women indicate but slight support from this classification. Pharmacy College women report the only deviation upward in wages received during the last summer vacation. Others, particularly Bizad women, indicate very slight earnings in this classification. The latter, however, report the highest percentage of wages received during the present college year. A very small percentage is registered by the Fine Arts Women, although the men led here. The percentage of borrowed money is about the same in all colleges excepting the Graduate, where it is slightly higher.

Comparison of the tables for men and women shows more than twice as much home support for the women as for the men, and correspondingly lower percentages for the wo-

men in all other sources of support.

Outside Work

5. Number of hours outside work per week: Men, 10.14; Women 3.2.

College	Men	Women
Agriculture	10.3	2.5
A. & S.	13.2	2.8
Bus. Ad.	3	2.4
Dentistry	9.9	—
Engineering	1.2	6.1
Graduate	4.8	—
Law	13	—
Pharmacy	12	—
Teachers	21	4.4
Fine Arts	—	—

Fine Arts men, who rely most on wages received during the college year, spend the greatest number of hours in part-time labor, according to the statistics. Graduate men, on the other hand, put in the least time in such work. Engineers, although their time is largely consumed by laboratory classes, almost put in the average number of hours. Law stu-

dents spend very little time in part-time labor.

There is very little variation among the women in this matter; approximately the same amount of time is expended in outside work during the year by the whole group as in any particular college.

Credit Hours Carried

6. Number of University credit hours being carried: Men, 14.92; women, 15.15.

College	Men	Women
Agriculture	15.9	14.2
A. & S.	15.7	14.5
Bus. Ad.	13.6	14
Dentistry	15.2	—
Engineering	15.4	—
Graduate	12.6	17.5
Pharmacy	15.2	17
Teachers	16	13.5
Fine Arts	15.8	15.4

The number of hours carried by Teacher's college men is higher than the number in any other college, although but little so. This is due to calculation by the larger bodies of

(Continued on Page Three.)

Notices

All notices for this column must be written out and handed in at the editorial office, U Hall 10, by 4:00 the afternoon previous to their publication

Varsity Baseball

Members of the Varsity baseball squad are expected to be ready for practice at 3:00 daily at the Armory. Freshman practice will be announced later.

Sophomore Baseball Managers

All sophomores who wish to go out for baseball manager report at the Armory, daily at 3 o'clock. See Ward Kelly, senior manager.

L. H. S. Class of '22

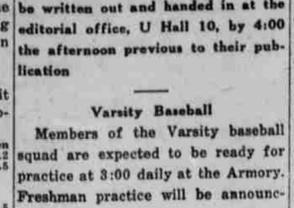

Lincoln high school class of '22 will hold its annual class reunion Thursday, April 2. For reservations alumnae should call Albion Speier at Speiers's.

THE jabot is a favorite in the mode of neckwear this spring and if you want to achieve the effect of smartness on any dress in your wardrobe, just put a jabot on it. All the new necklines are included with jabots that travel down the center or down one side. You can get lovely lace or net jabots at Rudge & Guenzel's.

And besides the jabots, Rudge's are showing every new neckwear conceit for spring—scarfs, collar and cuff sets, vestees and pumpies. You can accomplish much at little expenditure by utilizing them in your wardrobe.
