

HOLD FEDERAL EXAMINATION

Civil Service Commission Has Vacancies in Coast and Geodetic Survey.

The United States civil service commission announces the open competitive examination for junior cartographic engineer.

The receipt of applications for junior cartographic engineer will close October 3, 1925. The date for the assembling of competitors will be stated on the admission cards sent applicants after the close of receipt of applications.

The examination is to fill vacancies in the coast and geodetic survey, Washington, D. C., and in positions requiring similar qualifications at an entrance salary of \$1,800 a year. From this position promotions are made in accordance with the civil service rules successively to the higher grades as vacancies occur at salaries ranging from \$2,400 to \$6,000 a year.

The work of the cartographic engineers in the coast and geodetic survey is technical in character. It consists in the utilization of the data resulting from the field surveys of the bureau, or obtained from a wide variety of miscellaneous sources, in the compilation and correction of the nautical charts which guide all vessels in traversing the navigable tidal waters of the United States and its possessions, and of other professional work in related physiographic problems.

Competitors will be rated on practical questions, drawing and lettering, and education, training, and experience.

REGISTRATION IN R. O. T. C. LARGER

Full information and application blanks may be obtained from the United States Civil Service Commission, Washington, D. C., or the secretary of the board of U. S. civil-service examiners at the post office or customhouse in any city.

Registration in the military department up to noon Saturday was slightly higher than last year. The figures were 1328 basic course students of whom 912 are freshmen, 416 sophomores, and 161 advanced course men of whom 89 are juniors and 72 seniors.

A new department record of store room issue was established Wednesday when 214 uniforms were checked out. The total number of uniforms issued for the week was 675, which is about one-half the total registration.

The basic course uniforms were all sent to the cleaners during the summer, and are cleaned, pressed and repaired. Cadets with unsatisfactory uniforms should exchange them for better ones, store room attaches said yesterday.

The contract for the advanced course uniforms of the juniors has been let to a New York firm through a Lincoln concern, which will take measurements in a few weeks at a date to be set by the Commandant of cadets.

Present Model Mine to School

A complete reproduction of the Davis-Daly mine and its adjacent workings has been presented to the geology department of the University of Wisconsin by the Anaconda Copper Mining company, Butte, Mont.

The model, which is very large, is valued by the company at about \$10,000 and shows the vein structure of the central part of the Butte camp. The gift was made to Prof. C. K. Leith, of the geology department, who is planning to use it in the class and laboratory study of economic geology. Professor Leith has been doing extensive research in cooperation with the mining company at Butte.

Research Fund Is Still Short

After a year's effort, approximately \$70,000 has been subscribed in the \$100,000 mathematics research endowment fund campaign conducted by the Council of the American Mathematical society, Prof. Arnold Dresden, announces. Professor Dresden is in charge of the campaign in the territory from the Appalachian mountains to the Pacific coast and from Canada to the Mason and Dixie line.

"One fourth of the sum has been subscribed by teachers of mathematics, one fourth by industrial concerns, and the remainder through sustaining and patron memberships," Professor Dresden says. "The campaign will be continued intensively during the fall among teachers and industrial concerns who appreciate the vast part that mathematics is to play in industrial progress," he says.

Professor Dresden has conferred recently in the large middle western cities with insurance companies, publishers of scientific books, heads of industrial concerns, and other business interests which profit most directly by mathematical research.

List 1,000 Rooms for U. of W. Men Students

A list of nearly 1,000 rooms available to men students coming to the University of Wisconsin at the beginning of the fall term has been prepared by Prof. Scott H. Goodnight, dean of men.

Rental of rooms in the 743 houses occupied by male students last year averaged \$4.08 for a single room, \$3.36 a student for a double room, \$2.95 a student for a triple room, and \$5 a student for a two-room suite. The lists will be available to incoming students at the office of Dean Goodnight and in the University Y. M. C. A.

Wields Gavel Made From Historic Tree

Prof. Charles E. Brown, curator of the Wisconsin State Historical museum at the University of Wisconsin, was the first president of the American Anthropological society to wield the wooden gavel which was made from a limb of the famous Chief Logan elm at Lewistown, Ohio. The gavel now is in the collection of the Ohio State Archeological society.

Mr. Brown was elected president of the anthropological society at a recent meeting, succeeding Dr. Berthold Lanfer, of the Marshall Field museum, Chicago.

CALL FOR BUSINESS AIDE

Wide Knowledge of Foreign Trade Required for Executive Position.

Announcement has been made by the United States civil service commission of an open competitive examination for business assistant in foreign trade.

Receipt of applications for business assistant in foreign trade will close October 24. The date for assembling of competitors will be stated on the admission cards sent applicants after the close of receipt of applications.

The examination is to fill a vacancy in the bureau of foreign and domestic commerce of the department of commerce, Washington, D. C., and vacancies in positions requiring similar qualifications.

The entrance salary is \$1,800 a year. After the probational period of six months required by the civil service act and rules, advancement in pay may be made without change in assignment up to \$2,400 a year. Promotion to higher grades may be made in accordance with the civil service rules.

The appointee will be in charge of the section reviewing all correspondence between the bureau and foreign representatives and between field officers and business men, to insure reasonableness of request, compliance with bureau policy, and propriety of form. These duties require a wide knowledge of foreign trade activities.

Competitors will be rated on practical questions, a thesis to be handed to the examiner on the day of the examination, and education and experience.

The preponderance of advice is:-

Always buy Remington Portable

IT is the outstanding choice of students everywhere, because it is the lightest, smallest, and most compact of all standard keyboard portable machines. It fits in a case only four inches high. You can carry it anywhere and use it anywhere—and when not in use, you can tuck it away in a desk drawer or bookcase. You'll find it a great time-saver throughout its years and years of service. Let us show you the many decisive advantages of the New Remington Portable and explain our easy payment plan.
