Entered as second-class matter at the postoffice in Lincoln, Nebraska, under act of Congress, March 3, 1879, and at special rate of postage provided for in Section 1103, act of October 3, 1917, authorized January 20, 1922.

SUBSCRIPTION RATE \$1.25 a semester Single Copy, 5 cents

EDITORIAL STAFF Editor Edward Morrow Managing Editor Victor E. Beckler

THE HIGH SCHOOLS In this university there are students who are unable to spell simple words correctly and who refrain from the use of "ain't" and other proscribed words

The cause of all this, of course, is in the high schools. Nebraska's high schools are woefully inefficient.

These rules, it is apparent, are somewhat indefinite and vague; few schools, indeed, could not comply with them.

These rules, it is apparent, are somewhat indefinite and vague; few schools, indeed, could not comply with them.

University Studio broadcasting over KFAB (340.8) Friday, January 8

A fulcrum for every modern Archimedes

"GIVE me a fulcrum—and I will move the earth" said Archimedes. Too bad that he lived twenty-two hundred years too soon.

For you modern followers of Archimedes, you men who apply his well known principles in the study of mechanical engineering, the fulcrum is ready.

A world of possibilities opens up here for the man whose bent is mechanical. Distances shrink because mechanical engineers have found how to draw well-nigh every bit of air out of a repeater tube.

Every day is a day of new facts, new things, new achievements by mechanical and electrical engineers. Nothing stands still. Here the world does move.
