

PHARMACY NIGHT WILL FEATURE IN WEEK'S DISPLAY

Plans Near Completion for Main Event To Be Held Thursday Evening

Melvin Gulley, Chairman, Tells of Progress and History Over KFAB Station

Gulley also gave the listeners an idea of what they might expect to see Thursday evening.

Convocation Today.

A Pharmacy Week convocation will be held Wednesday morning at 10 o'clock.

On Friday evening the annual pharmacy banquet will be held.

NEW ZEALAND HEARS LOCAL BROADCASTING

Anniversary Radio Program From KFAB Got at Distance Of 8,000 Miles

A letter was received by the radio station at the University of Nebraska, announcing that the anniversary program, recently broadcast, was greatly appreciated at Hastings, New Zealand.

The program, the latter part of February, was broadcast over the station KFKX by remote control.

Loud Speaker

The letter first received by the Hastings, Nebraska, station, said that the program was heard over the loud speaker and remarked on the amount of volume that the Nebraska station produced.

The time difference between Hastings, Nebraska, and the New Zealand town is seven hours.

A letter recently received from the Somoa Islands, complimented the station at Nebraska on the fine programs broadcast from KFAB.

TEN MEN TAKEN IN N CLUB AT MEETING

Annual Picnic Date Set For May 16; Discuss Coming Greek Baseball Plans.

The regular monthly meeting of the N club was held yesterday at 12 o'clock. Ten men were initiated into the club.

Four men who earned their letters in wrestling were initiated: Irwin M. Weber, George E. Brannigan, Joseph E. Tuning, and Arthur J. Jones

Thomas M. Elliott, basketball player, and Harold P. Stebbins, the basketball manager, were taken in. Two new coaches, Charlie Black and E. F. Oakes were made members.

NOTED LECTURER TELLS OF CHANGE IN RELIGION

Dr. Smith Shows Differences In Modern Generation From Elders

A NEW CONCEPTION HERE

"I suppose there has never been a time when the gap between the older and younger generation was wider than it is now!" emphatically declared Dr. Gerald Birney Smith in his address on "The Old Faith in the Modern Age" given in Social Science Auditorium before a well-filled house Tuesday afternoon at 4 o'clock.

"It is particularly acute in religion because that is such a sensitive subject with so many people and disagreeing makes it so painful, especially between close friends.

Words Used Incorrectly

"There are two words," he continued, "much used today, but seldom used correctly. These two words are fundamentalist and modernist. The fundamentalist is one who believes in the old faith without any change. The modernist, on the other hand, wants the forms of the old faith changed to fit modern demands and customs."

Progressing along this line of thought, Dr. Smith discussed the two kinds of fundamentalists and the two kinds of modernists. Certain members of each class cannot conceive of anybody differing from themselves and still being religious; that is, there are single-track minds in both of the groups. Then, there are those honestly concerned about their own beliefs, but granting others a right to their beliefs also.

What Is Religion?

"Religion," stated the speaker, "is living at your best.

"The old faith was characterized by a sense of responsibility to God. With the belief that God was daily judging them, adherents to the old faith had every incentive to live at their best.

"Today," questions Dr. Smith "are we trying to shape a faith including only our wants and likes?"

The old faith gave our fathers a sense of sin; they went to church, making a business of trying to be better in this fashion as well as by family prayers and bible study; and the old faith tried a little religious thinking.

Thoughts Change

These things won't work in the same way today, naturally, because conditions and thoughts have changed. That is no reason, however, for sitting back and saying that they won't work at all.

Old Faith

Recognizing this fact, the goal becomes an adaptation of old faith principles to the modern way. These old faith principles are sound enough, but it is the importance attached to forms, the rigidity of the old faith at which the freedom of youth balks.

Therefore, let the modern youth adopt the principles of making it his business to try and live a better life and the principle of doing a little religious thinking, but let him apply those principles to his daily life in his own way.

Next Topic Concerns Science And Its Relation to The People

RESEARCH GIVES NEW ERA

"Religion and science must work together; we need religion to keep the moral science from being foisted," declared Dr. Gerald Birney Smith, professor of the history of religion in the University of Chicago and editor of the Journal of Religion, in the second of the series of lectures on the various phases of religion and life.

"Originally religion had the right of way in the guidance of what people should know," he continued, "but he needs to appreciate the fact that the human race grows fast in knowledge and it is quite obvious that the best of knowledge of four or five hundred years ago will not coincide with that of today for the church has been superseded by the researches of science."

What Is It Trying To Do?

"What is it that religion is trying to do? Is it trying to enable us to live at the best, but how can we? We can only know the world truthfully through what we may learn from scientific research.

"Truth can be expressed in more than one way," Dr. Smith pointed out. Religion wants to tell the truth yet it does not put it in the same manner that science does."

Science Translates

Science, it is plain to see, translates the world of common sense into strange names. What is the difference between water and the chemical formulation for such? Few people are familiar with scientific terms, and thus it is an easy thing to teach science so as to shock the people.

Trophy Is a Skin

There will be a trophy for winners and runners-up consisting of a skin with the name of the fraternity on it and the place that they won in the tournament. The interest in the games is expected to be very keen, because there will be no University baseball this spring.

Space for baseball diamonds is not easily available, which was one of the reasons why University baseball has been discontinued. As soon as the Athletic Department can provide for more ground for games and practice, an attempt will be made to revive University baseball.

NEW FIELD HOUSE IS NEARING COMPLETION

Construction of Large Stage Is Under Way; Painting and Decorating Started

The new Field House, started early last fall, is now nearing completion. The contractors are at present working on the stage, adding to the present structure on the north. The work now is finishing the steel construction of the stage and preparing to lay the permanent floor.

The entire floor used during the basketball season was laid as a temporary measure and is soon to be replaced by a permanent floor.

The stage, which will be the largest in the city, is to be 60 feet by 110. The structure of the stage is to be such as to use the most modern equipment and facilities.

University Students Are Unable To Spell 'Persevere' and 'Calendar'

GREEK BASEBALL ENTRY DATE SET

Deadline is Thursday; Time Is Not Set For First Round Matches

FINALS WILL BE MAY 28

All entries for the interfraternity baseball tournament must be in by Thursday, April 15. There has been no definite date set for the first-round games, but an announcement will be made as soon as the plans for the tournament have been completed.

There has been no decision made whether the last year's letter men in baseball will be eligible. There seems to be a question of fairness involved in permitting N men to play, but these are the men most interested.

Strictly Elimination

The interfraternity baseball tournament will be a strictly elimination contest. In the first round each team will play at least three teams, thus giving every team a chance to play more than the one game, as in former years. For the first round the teams will be divided into groups of teams, and each team will play the others in its group. The team that wins the greatest number of games will then pass into the second round. If there should be a tie in the first round, both teams winning the same number of games will play another game to determine the winner in that group.

Uniform Questions

Uniform questions will be provided by the University of Nebraska for all subjects listed in the contest. The winners of these preliminaries will then represent their respective districts in the state contest. Certificates of merit will be awarded for all positions in the preliminary contests.

The preliminaries will be conducted by representatives from State educational institutions or colleges. The same rules and regulations will apply to both preliminary and state contests unless otherwise stated.

State Contests May 8

The state contest will be held at the University of Nebraska, May 8, and each accredited secondary school is entitled to enter two pupils for each event under proper certificate of the superintendent or principal of the school except as provided by the plans for the preliminary contests.

The awards for the state contest will be gold, silver, and bronze medals and certificates of merit. The individual and the school winning the highest number of points will be awarded trophies.

Four Places Count

In each event four places will count for points. Four for the first; three for the second; two for the third; and one for the fourth. A special certificate of honor is to be given the individual competitor winning the highest number of points.

Students Smoke in Class

Allowing students to smoke during a class lecture is a new and interesting experiment being tried out by a professor at McGill University at Montreal. The majority of the students have expressed their delight with the new arrangement.

University Professors' Bulletin Analyzes the Football Situation

The April Bulletin of the American Association of University Professors devotes ten pages to an analysis of the football situation in the larger schools, together with some pointed suggestions as to the removal of the objectionable features.

Article 1 strikes the key note of the report. It reads: "Intercollegiate football is a good sport and an interesting sport. Properly limited and controlled it would, by its recreational value, help and not hinder the attainment of the central purpose of the college. In its present excess, however, it seriously hinders the attainment of that purpose."

The report discusses the advantages and disadvantages of the game in the first five sections, presents two proposals for reform in the sixth, and concludes with certain recommendations as to local procedure.

The Association sees three great advantages to the student body in the game: First, it provides wholesome recreation; second, it creates a common bond of interest; and third, "it affords for the entire football season a clean and interesting

topic of conversation and thought." But modern football also has its disadvantages to the student body, and the Association enumerates them in the following seven articles of Section I. The evils of the game are outgrowths of the intense commercialism of the modern game, and the over-emphasis and over-excitement of the "big-time football" brings on the attendant damages to student morale.

The spirit of "win or die" leads to neglect of college work, and "a distortion in the student mind of the normal scale of the values of college work and life." In respect to this over-emphasis on a winning team the Association Bulletin says: "It is particularly bad in the case of intersectional games and games with traditional rivals. It attains its greatest absurdity in the 'pep sessions,' which exist ostensibly and in part actually to 'put spirit into the team,' but chiefly to vent the over-excitement itself and at the same time to cultivate it to still further intensity. It is at its worst in connection with football trips to

SMITH TELLS STUDENTS OF NEW RELIGION

Chicago Professor Speaks at Convocation Tuesday Morning

PEOPLES VIEWS CHANGED

New Standard of Living Is Cause Of Indifferent Attitude on Modern Theology

"If you are going to be religious today you have to find out how in an automobile instead of a horse and buggy," declared Dr. Gerald Birney Smith, of the University of Chicago, speaking at an All-University convocation at St. Paul M. E. church yesterday morning on the subject "The New Day in Religious Thinking."

The convocation address was Dr. Smith's first appearance here. In the afternoon and evening he made two addresses in Social Science Auditorium, speaking on "The Old Faith in the Modern World" and "Religion Science."

The series will be concluded today with a discussion at 4 o'clock of "Christianity and Evolution" and of "The Modern Quest for God" at 7:30. Both meetings will be held in Social Science Auditorium. Dr. Smith will also speak at noon at the World Forum luncheon at the Grand hotel.

"Now, there," the speaker continued, "is the real source of the perplexities which face so many people today. Until recently the standards of living were quite uniform from generation to generation, because there was little change. When people wanted to elevate things, they talked about changeless things, absolute authority and the like, and religion came to be thought of in changeless doctrines, absolute statements.

Think of New Things

"The reason we must have a new day of religious thinking is because we have to think about new things," he explained. Speaking of the radio, he asked whether we should call it a miracle. In the old times, all things worked back to God. Dr. Smith characterized this type of thought as theological thinking.

No One Questioned It

"The third realm was the law of God in religion itself. No one questioned in the old days that any given church had the best ideas. In any church we find people doubtful today whether that church has the right way.

The present generation is not much interested in a religious thinking of the theological kind. We are having a very definite definition of theological religion in non-theological terms. This is a step in emancipation, but it is one which leaves religion very vague, very uncertain, and, therefore, it seems to me, only a transition stage of religion."

Commenting on new thinking of today, Dr. Smith remarked, "New thinking of today consists in starting afresh with an observation of the world as we find it." Continuing, he named the two symptoms of this new thinking as: Religion has within the past twenty years come to be scientifically respectable. The theologians of today have nearly abandoned the framework of the old theology.

"Religion," he stated, "is the deliberate attempt of a person to live at his best. Now if that is religion, it is certainly worth thinking about, and any kind of thinking about it is all for the good."

Chancellor Samuel Avery introduced the speaker.

The meetings are held under the auspices of the University Y. M. C. A. and Y. W. C. A.

Dean Grubb To Speak At Music Convocation

Dean Grubb of the Dental College will give a five minute talk at the musical convocation, Thursday morning, in connection with Dental Health Week, which is from April 18 to 24. This week is being sponsored by the Lincoln District Dental Society. Its purpose is to emphasize preventive health measures and Dean Grubb's speech will be on this subject.

Women Decide Man's Income

TRIO WILL GIVE CONCERT

Program Presented at Convocation Will Be Repeated Sunday

The Novello Trio consisting of Frances Morley, pianist, Miriam Little, cellist, and Grace Morley, will appear in concert at convocation Thursday at 11 o'clock in the Temple. The program will be repeated Sunday afternoon at 4 o'clock in the University Art Gallery for the benefit of those who are unable to attend Thursday.

HIGH-SCHOOLS PLAN CONTESTS

New Interscholastic Academic Meet Will Have Changes In Procedure

The fourth annual Interscholastic Academic Contests of Nebraska high-schools, as a result of the experience of former contests, will modify its procedure thereby enabling the smallest high-school to compete with the largest on a more equal basis than formerly.

PRELIMINARIES APRIL 24

Preliminary contests will be held Saturday, April 24, for such districts of the Nebraska State Teachers' Association as may plan to enter, and sectional contests will be held for groups of counties in places where it will be practicable for such groups to meet.

Uniform Questions

Uniform questions will be provided by the University of Nebraska for all subjects listed in the contest. The winners of these preliminaries will then represent their respective districts in the state contest. Certificates of merit will be awarded for all positions in the preliminary contests.

The preliminaries will be conducted by representatives from State educational institutions or colleges. The same rules and regulations will apply to both preliminary and state contests unless otherwise stated.

Librarian Leaves For National Convention

Mrs. C. S. Paine, librarian for the Nebraska State Historical Society, left Friday for a month's trip to Washington, D. C., where she will attend the national meeting of the Daughters of the American Revolution. Mrs. Paine is a state regent of the Nebraska society. Mrs. Jenkins is taking her place as librarian.

Unique Debate

A most unique debate will be held at Milwaukee between the Kansas State Agricultural College and the Marquette debating teams. By common agreement, the subject of the debate will not be selected until the morning of the contest.

WEATHER FORECAST

Wednesday: Generally fair and colder tonight.

Weather Conditions.

PRACTICE FOR KANSAS RELAYS

Track Squad Slacks Pace Rest of Week Before Making Trip

Coach Schulte slackened the training pace of his track squad Wednesday evening in preparation for the Kansas Relays April 17 at Lawrence.

Coach Schulte slackened the training pace of his track squad Wednesday evening in preparation for the Kansas Relays April 17 at Lawrence. Light work-outs will be on the program for the rest of the week.

The prospects of a winning team were much brighter after the try-outs Monday evening, when four men made 22.5 seconds or under in the 220-yard dash.

Wirsig Shows Up Well

Frank Wirsig went over the bar at 12 feet 6 inches in the pole vault. With this height in the trials he should place in the meet on Saturday.

Coach Schulte has not definitely decided upon the men who will make the trip. The following men will probably be entered in these events: 100-yard dash—Locke, Hein. 120-yard high hurdles—Weir and Reese.

Pole vault—Wirsig, Rhodes. Broad jump—Rhodes, Stevesen. Javelin—Almy. 3000-meter run—Searle, Zimmerman or McCartney.

Coach Schulte will also run men in the quarter-mile, half-mile, mile, two mile, and the four-mile relays, although he is not sure of the men that will be entered in each event.

Librarian Leaves For National Convention

Mrs. C. S. Paine, librarian for the Nebraska State Historical Society, left Friday for a month's trip to Washington, D. C., where she will attend the national meeting of the Daughters of the American Revolution. Mrs. Paine is a state regent of the Nebraska society. Mrs. Jenkins is taking her place as librarian.
