

FIELDNARROWS IN GREBK MEET

Three Group Championships Decided; Elimination Round to Begin

NO GAMES FOR TODAY

Yesterday's Results
 Theta Chi 11, Alpha Sigma Phi 4.
 Pi Kappa Phi 10, Acacia 2.
 Delta Chi 4, Sigma Phi Epsilon 3.
 Phi Sigma Kappa 18, Farm House 18.
 Delta Sigma Lambda—Alpha Theta Chi, postponed.
 No games scheduled for today.

Elimination Round
 Yesterday's interfraternity baseball contests resulted in the determination of three teams which will go into the elimination round, having won the championships in their groups. Theta Chi, Pi Kappa Phi and Delta Chi are the nine which have definitely clinched their participation in the second round, together with Delta Sigma Delta which won the championship of Group III some time ago. There are four remaining groups to be decided before the next round can be started.

Sig Alpha Out
 Sigma Alpha Epsilon, last year's baseball champions, were eliminated by Delta Chi in a closely contested battle, 4 to 3. It was only a seven inning game, but the winning run was not sent over the plate until the sixth frame. The victorious hurler was Gilliland, and Campbell was the catcher. The Sig Alpha men were Rumsey and Scott.

Phi Sigma Kappa and Farm House played nine innings to a 18 to 18 tie. After that it was too dark to continue. No plans have been made as to the play-off. Farm House used the battery of Eibold, Dennison, and Weber. Wurts and Stearns worked for the Phi Sigs.

Theta Chi Wins
 Theta Chi defeated the Alpha Sigma Phi ball players 11 to 4. The game was quite ragged. Blessing, the Theta Chi pitcher, however, held the Alpha Sigs well. Karrer was on the receiving end. Gibbs started on the mound for Alpha Sigma Phi and was relieved by Bailey. Peterson was the catcher.

Pi Kappa Phi, in winning the championship of Group II, took the tilt from Acacias with ease. The victors took the lead early in the game and held it throughout the battle. Hamilton and Casselman endeavored to stop the Pi Kappa Phi sluggers. Maaske was the pitcher for the winners and Schmidt the catcher.

Phi Kappa Psi and Delta Upsilon endeavored to play their postponed contest, but got started late. Only two innings were completed before the game was stopped to allow the City League teams to play on the field. This game will be played over.

High Track Men Here This Week

(Continued from Page One)

Morris, of Grand Island, threatened it last year and has been getting up near there consistently this season. Several others vaulters have gone between 11 feet 6 inches and 12 feet this season at times.

Dash Record Tied
 The 100-yard dash record of 10.1 has been tied seven times since Burrus first stepped it in that in 1904. Last year both Easter and Lambert made 10.1 but couldn't better the long-standing record. With Zook, of Tecumseh, and Mayo of Cambridge, in Group II, and Warga and Miller of Havelock, and Jones of Omaha Central, and several other fast men in Group III, competing the record will gain be in danger with the track in excellent shape.

Lewis, of Omaha Tech, holder of the high-jump record, with a leap of 6 feet 2 inches, will be back but is not expected to better his record this year.

Mousel Strong in Weights
 Mousel, of Cambridge, high point man, in the recent pentathlon contest is expected to be a strong point winner in the weights, although the present records are better than he has been making this season. Cambridge and Tecumseh are expected to make a close race in Group II for the title. In Mousel, Mayo, and Trumble, Cambridge has three stars of real caliber, but Tecumseh has a larger squad and a better balanced

State High School Track Records

100 yard dash—10.1—Burrus, '04; Wildman, '04; Wood, '10, '11; Hollsteni, '16; Noble, '18; Morgan, '19; Easter, '25; and Lambert, '25.
 220-yard dash—22—Easter, '25.
 440-yard run—52, Oostergard, '23.
 880-yard run—2:01.9, FFRanck, '23.
 Mile run—4:35.9, Welch, '24.
 120-yard high hurdles—15:6, Trumble, '25.
 220-yard low hurdles—26.2, Keiss, '25.
 Pole vault—11 feet 8 inches, Rhodes, '21.
 High jump—6 feet 2 inches, Lewis, '25.
 Broad jump—21 feet 10 1/2 inches, Rhodes, '22.
 12 lb. shot put—46 feet 5 inches, Ashburn, '25.
 Discus throw—120 feet, Heppeler, '20.
 Javelin throw—149 feet 2 3/4 inches, Lepicir, '25.
 Half-mile relay—1:32, Norfolk, '25.

Field Trip for All Engineers

(Continued From Page One)

both the singles and doubles, with prizes furnished by the Lawler Sporting Goods Company.

Lunch will be served at noon by ladies of the Grace M. E. church. At 1 o'clock the interclass tug-of-war will take place. During the afternoon, various races such as the 100-yard dash, 50-yard dash, and others will be run. Finals in the horseshoe tournament will be played.

Trucks Ready
 Between 4 and 5 o'clock trucks will be on hand to haul students to the campus.

Saturday evening at 6:30 o'clock the Engineers will stage their annual Banquet, which will be held this year at the University Club. L. C. Oberlies will be toastmaster of this affair, which is the final event of Engineers' Week.

The Speakers
 The speakers for the evening will be: O. H. Zumwinkle, commissioner of the Nebraska Manufacturers Association, who will speak on "Where to From Here;" D. A. Lyon, assistant Director of the United States Bureau of Mines, who will talk about "Work of the Bureau of Mines;" Prof. W. L. DeBaufre, chairman of Department of Mechanical Engineering, whose subject will be "How We Got Here;" and O. J. Ferguson, Dean of the College of Engineering.

Music for the evening will be provided by a four piece orchestra. At the close of the banquet copies of the "Sledge," official engineering scandal sheet, will be distributed.

The end of the banquet will mark the close of Nebraska's Annual Engineers' Week.

Take Bar Examinations
 Fifteen law students of the University of Missouri took the bar examination of the state board of law examiners at Jefferson City, February 22, according to J. P. McBaine, dean of the School of Law. The examination was given to 233 students who seek to practice in Missouri. Eight of these were women.

"The Science of Basketball," by Dr. W. E. Meanwell, University of Wisconsin basketball coach, has been translated into the Japanese language.

Group I
 Arlington 7, Allen 1, Ansley 16, Bethany 2, Big Springs Rural 5, Brady 1, Bradshaw 6, Cathedral 3, Clay Center 12, Dewitt 10, DuBois 12, Eagle 7, Edgar 7, Exeter 7, Fairfield 11, Fairmont 2, Guide Rock 3, Holbrook 1, Lyons 7, Milford 10, O'Neill 9, Nelson 6, Pender 6, Peru Demonstration 1, Pilger 2, Stella 1, Red Willow 2, Swanton 13, Tamora 5, Tekamah 9, Tobias 7, Wauneta 6, West Point 5, Wakefield 1, Willier 10, Wesleyan Prep 10, Tilden 8, Stamford 4, Valley 4, Ulysses 3, and Genoa Indians 1.

Group II
 Ashland 9, Broken Bow 6, Cambridge 11, Cozad 11, Crete 18, David City 14, Friend 15, Gothenburg 11, Havelock 22, Lexington 14, Neligh 10, Plattsmouth 8, Stanton 10, Sutton 7, Tecumseh 13, Wayne 3, Callaway 22, Seward 9, Auburn 4, Central City 4, and Teachers College High 4.

Group III
 Alliance 3, Albion 8, Beatrice 14, Columbus 22, Fairbury 17, Falls City 13, Fremont 11, Grand Island 18, Hastings 14, Kearney 15, Lincoln 29, Norfolk 14, North Platte 12, Omaha Central 22, Omaha Tech 21, Creighton 19, Scottsbluff 1, University Place 16, and York 10.

Thirteen schools are also entered in the tennis tournament which will start at 1 o'clock this afternoon. The competing schools will be Lincoln, Havelock, Seward, College View, Grand Island, North Bend, University Place, Plattsmouth, Lexington, Milford, Omaha Central, Creighton and Fairmont. Drawings for the tennis tournament will be made in Athletic Director Gish's office at 11 o'clock this morning.

Crowds Attend Engineers' Night

(Continued From Page One)

J. Betzer, '28, both of the Civil Engineering College.

In the Mechanical Arts Building the displays were in three divisions: Architectural Engineering; Department of Applied Mechanics; and Civil Engineering.

Typographical Drawings
 In the Architectural Engineering division were many typographical drawings by Geology students, numerous specimens of architectural shades and shadows showing perspective, some interesting blue-prints portfolios showing plans for an English house and several carefully constructed and delicately finished hand drawings. Besides problems in machine designs, there were architectural plans for theaters, government buildings, art galleries, memorials, and an exceptionally fine museum design.

Detailed Maps
 In the Civil Engineering room there was a detailed map showing the municipal golf course at Antelope Park, also one of a proposed University campus. David Dale Skinner and D. P. Roberts had a clever drop hammer pile driver in action. A distinct comparison was shown between the type of surveyor's chain and an instrument used by George

Washington and the present day devices. A current meter used for determining velocity of water in rivers and canals was in operation. The civil engineers, who were supplying information to visitors, described accurately the use of an old Spanish surveying instrument. Another interesting feature was a plane telescope alidade. In another room there were various blue-print plans showing the work of civil engineers.

Testing Machine
 Large testing machines, varying in capacity from 200,000 pounds to 50,000 pounds of pressure were being operated by students in charge. The materials used were supplied by the Brick and Supply Company and the Nebraska Material Company. Other displays in the Applied Mechanics division were saws and impact cement machines, a rattler for testing paving brick and a unique Deval Abrasion Machine used in testing the durability of various kinds of rocks.

Chemistry Display
 The most beneficial and instructive display shown in the Chemistry Building was a Thermite show given at 8 o'clock and again at 10. This was an exhibit of the process of welding given by Professor Frankforter and an assistant. In room 108, one of the regular laboratories, various students in the Chemistry Department were performing experiments of particular interest. Among these were the determining of concentra-

tion of acid and alkaline solutions by the method of titration, and fractional distillation showing the separation of chloroform from wood alcohol. A spectroscope, the type used by Dr. Hopkins of the University of Illinois, in his recent discovery of the new element Ilinium, was being operated by Mr. Barnes and Mr. Meyers.

Sororities Visit Each Other
 In order to promote good feeling between the sororities on the campus of the University of Oklahoma, these organizations are going to exchange a series of visits. It will take a period of sixty weeks for these exchanges to be completed.

About time a few of you "guys" sent in some clothes, I checked over the books yesterday and it's a long time since some of you had stuff in here.
