

## HANDBALL GAME TO BE RESUMED

Courts Are Being Constructed In Field House; Little Equipment Needed

Handball, formerly a popular sport on the campus, will be re-established as a Nebraska favorite upon the completion of the eight handball courts in the coliseum. These courts will be available for use by any Nebraska man and it is hoped that many will take advantage of them. The only special equipment necessary are heel-less shoes, a ball, and mitt.

The courts being new will be as fine as can be built. High ceilings, plenty of light, smooth walls, and level floors will contribute to the enjoyment of the game. The court lines

are clearly marked. Everything, in fact, has been done to insure the quality of the courts.

The sport is one of the best to put a man into the pink of physical trim. It is a vigorous sport exercising all parts of the body. To play it well a man must have plenty of wind, agility, endurance and complete control of his body. The physical department endorses it heartily and expect to teach it to all of the various organized classes.

The characteristics with the fact that little equipment and only two men are needed to make a game, combine to make handball one of the most popular sports among both college and business men.

### Basketball Practice Begun With Fifteen Reporting Regularly

Coach Black inaugurated basketball practice this week and has about fifteen prospective cagers reporting regularly. Basket shooting and fundamentals of the game comprise the workouts which are being held in the evening and afternoon. Official practice will begin after the football season.

Gerelick and Tom Elliott, regulars on last year's team, were tuning up the old eye and getting into shape along with several good prospects from the freshman team. Krall of Grand Island and Gohde, star Lincoln high guard, look bright as prospects.

### Band Located in New Home In Field House After Month of Moving

Found—a home for the band. This organization, which has for the past month been unceremoniously moved from building to building on the campus has at last been rewarded with a more or less permanent home in the new Coliseum where its headquarters will be in the northeast basement. In the past the band has always met in the Armory, but since that building has been turned into a woman's gymnasium it is no longer available.

At the first of the semester the band rehearsed in the Temple high building but was soon obliged to seek new quarters. Owing to the fact that the organization contains over sixty men, it was necessary to find a room larger than that which has been used in the Teacher's college.

Although the band's new home is large enough to accommodate all of its instruments it is not very well adapted to rehearsals as the room is a basement room and with a very low ceiling. Another fault with the room is that it juts out in a three-cornered shape and would crowd things badly were it to be used for rehearsals. It is probable that the stage in the field house will be used in the future as it is excellently suited for concert purposes.

### PLANS BEGUN FOR ANNUAL LUNCHEON

Committee Chairmen for Cornhusker Luncheon, under Auspices of A. W. S. Board, Announced

Committee chairmen for the Girls' Cornhusker luncheon to be held under the auspices of the Associated Women Students' Board on Homecoming day in the Coliseum, have been announced by Helen Aach, general chairman of the committee.

Helen Anderson will assist Miss Aach in making the general arrangements for the luncheon. The other members of the committee include: Ruth Barker and Grace Elizabeth Evans, Tickets.

Lucile Refshauge, Decorations. Viola Forsell, Food. Esther Zinnecker, Waitresses. Eloise Keefer, Publicity. Audrey Beales, Posters. Ruth Ann Coddington, Entertainment.

Committee chairmen are asked to meet at Ellen Smith Hall at 5 o'clock on Wednesday to formulate plans for the luncheon.

Kansas Captain Excels in Punting Zuver, the big Kansas captain, according to the Big Ten is a fullback type playing at quarter. His punting in the Badger game was the feature of the game, seldom seen in intercollegiate football. His average was fifty yards, with two going seventy yards.

### COURSES BY RADIO BEGIN NOVEMBER 9

Extension Division Offers Two Subjects; Weseen and Stuff Will Give Lectures

Two correspondence courses by radio are offered by the University extension division beginning November 9. The lectures for each course are to be given one day each week over KFAB. Prof. Maurice H. Weseen will give a course in business English in a series of twenty lectures, with written assignments to make the instruction practical. The lectures will be given each Tuesday evening, beginning November 9. A course of study of the Book of Job is offered by Prof. F. A. Stuff, who will give a series of lectures each Wednesday afternoon. There will also be written assignments. Further information regarding these courses may be obtained from the University extension division.

### International Show Will Include Ponies

The Baby International Livestock Exposition at the Agricultural campus made final arrangements for the showing of a class of fancy Shetland ponies. Along with the showing of these ponies will be an exhibition given by these ponies and their riders for the entertainment of the audience.

Tickets have gone on sale and are selling very rapidly. It is stated that the supply of available tickets will soon be exhausted, and any person desiring to obtain tickets should get them as soon as possible or they may be gone before the week is over. The tickets are selling for thirty-five cents each.

Football Armor Costly To retain a Big Ten football player so that he can skillfully die for alma mater costs exactly \$23.39 according to The Big Ten Weekly. But to put the young man on the field properly equipped from both the standpoint of protection and style, is something else again. The armor that each player wears figures up closely to \$150 for a season.

### Dr. M. C. Hall, '06, Returns From Research Expedition in the Tropics

Dr. Maurice C. Hall, '06, chief of the zoological division of the Bureau of Animal Industry, returned September 15 from a research expedition into the tropics, organized and directed by the Johns Hopkins School of Hygiene and Public Health, and conducted under the auspices of the International Health Board of the Rockefeller Foundation.

Hall represented the Nebraska department of the expedition. He made a survey of the animal-parasite situation in Panama, Nicaragua, and Salvador. Unexpected findings concerning animal parasites are reported. Besides gathering much information regarding these, the expedition brought back about one hundred and fifty bottles of prevailing parasites, some of them apparently new and of economic and scientific importance.

Dr. Hall reports that the hot tropical sun has a sterilizing action on bacteria. The rains are torrential and have a washing effect which serves to sweep worm eggs and larvae into water courses and out of contact with livestock.

One important object of the expedition was to determine what diseases are likely to be carried northward by shipments of livestock. The results show that in shipping livestock from Central America to the United States the only diseases of livestock that appear to warrant serious consideration are tick fever, anthrax, blackleg, and tetanus, though final conclusions depend on the identification of the parasites.

The expedition made a special study of drugs for the removal of worms. The most interesting development of this work was the discovery that nearly forty percent of the soldiers examined by the scientists were infected by hook worms not previously known to be present in man in Central America. These findings are a great aid to public-health work in those regions. The scientists collaborating in this project were Doctor Angustine; Dr. D. M. Malloy of the Rockefeller Foundation; Don Bernabe Rosales, Nicaraguan pharmacist; and Doctor Hall.

The trip resulted also in other findings of a specialized and highly technical character, including the efficacy of several new drugs.

### Jensen is Delegate To Texas Celebration

Dr. F. W. Jensen who secured his doctor's degree in 1925, was designated by Chancellor Avery to represent the University of Nebraska at the semi-centennial celebration of the Agricultural and Mechanical college of Texas Friday and Saturday. Dr. Jensen is now connected with the chemistry department of that institution.
