THE CURTAIN FALLS

With this, the final issue of the semester, we make our final bow before our audience of University students and instructors. Our act DADEL

It is only natural that we should look back over the semester at this time since we have no future to which we can look forward. We find that although the semester has not been as eventful as many and not as of the new theory this way: "It often eventful as we might have wished, seems as if our administrative maduring the period.

get a reaction on this campus was to start attacking things and people, but no-we thought we knew better than that. We thought that by encouraging, by praising, by boosting here and there we could produce the best results.

Consider for a moment one of the statements we made in our first editorial of the semester: "It will be our honest and sincere purpose during the coming semester to interpret the news of the University in such a way that it will provoke thought particularly among the students."

Such conceit seems impossible to us now. Imagine anyone provoking To the Editor:

We are writing this to acknowlthought on this campus by interpret-

edge our deep appreciation of Mr. ing the news! "If we are able, even in a small Jensen's efforts to improve the condegree, to start students thinking ditions in the University. In reviewabout the problems around them we ing our three and a half years here, will feel well repaid for our efforts." we find that, during all that time, Well, we should think so. If we could we have endured terrible suffering start students thinking about the because the "Rag" is a suppressed problems around them we should not paper. And it almost breaks our only feel well repaid, the University hearts to think that we were forced should erect a new stadium in our into the Military Department for two honor.

There is one thing wrong on this campus and nearly every other evil can be traced directly to that. That is, the absolute lack of interest. Nothing short of a carload of TNT could move this student body as it is now.

We lament the fact that the student elections are crooked. Who cares? We print column after column upon the military drill question. Who cares? We bemoan and bewail the uselessness of large numbers of campus organizations. Who cares? We gnash our teeth and ruffle up our back and emphatically deny the pharges that the Nebraskan is suppressed. Who cares?

Why nobody, comparatively speaking, cares. There are a few students, maybe a hundred or so, who are interested in what is going on around the University. The rest are just like so many blanks. The participating part of this student body is such a small percentage of the enrollment that it is really amazing.

Perhaps that is what our universities will develop into in the futuremore machines of education, just like the automatic restaurants where you put in a nickel and get your plate of beans. But if that is all they are guing to be we'd better stop erecting new buildings and just have corres sate courses

If our universities are to develop

Introductory

In our series of advertise-ments, "Little Stories about the Central Cafe", just completed, we have told something regarding the policy of Manager Har-ris, his insistence on cleanliness in all things, high quality of the food, courteous moderate prices. service, and

That his policy is good, is best evidenced by the success which he has achieved. For a good many months the Cafe, although not of very large seat-ing capacity, has served, night and day, rather more than one person every minute of time during the period.. Last October the figures were one person served every 59 seconds.

Something over four years ago four and a third years the building housing the Central Hotel and Cafe was remodeled and a terrazzo floor laid. Dur-ing the period from the comple-tion of the remodelling to the end cf December, 1926, two and a half million persons have been served. Or rather, that many services have been render-ed in the period. ed in the period.

His aim to secure quantity production and keep his plant production and keep his plant and equipment operating as nearly full capacity as possible, has enabled Manager Harris to make his prices moderate—in fact, very much lower than similar service could be secured if the Cafe were running at less than 50 per cent of its capacity. This is a commonplace in other lines of bysiness, but few have considered it in connection with hotel and cafe service. hotel and cafe service.
