THE HAUGEN DEFEAT

The McNary-Haugen bill has been defeated. An attempt will be made next week to pass it over the presidential veto, but the outlook is not promising. Whether the bill was one with more advantage

than disadvantages is debatable. One feature about the whole business, though, i not debatable. It is a fact. And that is the awakened determination of the West to place itself by some means or other on an economic parity with the East.

For many years the West has been selling its products on the world market, unprotected, and buying its manufactured necessities in a home, sheltered market. The difference, farm leaders say, accounts for the pros-

perity of the East and the hard times of the West. Quite in contrast with the almost solid backing of protection for industries as a national economic policy several years ago, especially by members of the Republican party, there is now heard a greater and greater rumbling of revolt. Prominent leaders as well as influential papers, have taken up a cry which in substance says "Protection for all, or protection for

none. As an indication that all is not well in the national economic scheme of things the McNary-Haugen legislative movement takes front rank in political and economic circles. It will probably smoulder away now until the next presidential elections, when it may become a burning question ranking with the free-silver and populists movements which shook the country thirty years

For the student of history or economics this is time of real action, which should furnish more lively material than a dozen source books on forgotten periods.

For all University students in general, this is time of action which merits close observation and study, as part of the broad training which all University men and women should receive.

MOVING AHEAD

formal parties given for the entire University

Slowly the students of the University of Nebraska seem to be getting started in the proper direction towards a more democratic student body. First, the Pan-Hellenic association ruled that sororities may have only one downtown party per year. Then the matter was taken under consideration by the Interfraternity Council, but, regrettably, no action taken. But the matter is at least under serious consideration by members of the University faculty on organizations, and as the school years grind on, there should be a definite goal attained.

Probably one of the main arguments against the limiting of downtown parties is that the special life of the students will be unduly restricted. If this movement to limit them was also to remove them altogether, there would be real reason in the argument. Social life is undoubtedly one of the valuable assets of college

This winter, for the first time since the World War, the Junior-Senior Prom is being revived. It is simply a move towards having more large social affairs for the whole student body, and not the exclusive en tertainments provided by the members of each social organization. These large parties given for the whole University, such as the Military Ball, the Pan-Hellenie Ball, and the Junior-Senior Prom, provide the necessary social life, to some extent at least, and with a few im provements, should come into a deserved place of prominence during the social season.

The party for all students of the University is without denial, a step towards a more democratic and human student body. And with these all-University affairs, there will be less competition to have the best party of the season, achieved by fraternity men's fathers digging deep into their pocketbooks, there will be no overcrowding of the social season, no contesting and pride in "making" the most formals, and it is entirely possible that the parties may be so conducted as to bring about a considerable reduction of expense

It is all moving slowly, and perhaps the progress isn't just what the over-zealous would desire, but if the pot lan't boiling yet, the fire beneath it is burning strongly and should bring results.

HONORARIES

Several more honoraries announced selection of new members last week.

Since these organizations in all their ramifications seem to be an unavoidable part of our system of mass education, the best that can possibly be done is to hope for wise administration of them in order to get out of them all the supposed benefits we can.

One of the most abused features of the system is the one in the election of new members. Instead of the mon making the honoraries what they are (the original theory) there is too often a practice of turning the tables around, and having honorary membership attempt to make the man. This abuse is found in practically all organizations from the most insignificent ones to those which proudly assume they are at the top.

The only defense that can possibly be put forth by those who favor honoraries is that they are composed of the best men and women in the particular field covered, and that they serve as a goal toward which students can work,

Manifestly this whole theory is turned topsy-turvy when the societies are made into factories for readymade honors to tack below the names of promising young students whom the fraternity wishes to push and boost along by all possible means.

resulted in their decline in campus opinion.

If the members want to protect their membership much a word." they should insist out of purely selfish reasons that

the man make the society instead of membership in the society making the man.

PROBATION

Well, it's all over now, and further comment on this sophomoric institution is without particular point for another year. The Saturday State Journal, however, carried an editorial which reflects in part the attitude of the public. As such it is worth while reading even though probation is all over except for lack of sleep and lack of study. The editorial is reprinted below.

In Other Columns

The Hours After Supper

Most careers are made or marred in the hours after supper. It may seem to some that the few hours between supper and bed time afford small opportunity for education. But these were sufficient for Lincoln and for Franklin and for millions of men who by turning these hours to advantage through special studies, ni advanced themselves above their fellows.

"Dost thou love life? Then do not squander time, for that is the stuff life is made of." Benjamin Franklin, who said this, not only understood the value of time, but he put a price on it that made others appreciate its worth.

Bradstreet's in a summary of business conditions

Of New York to prepare a review of the Swedish book, "Vart Vagliga Brod" published by Hugo Gebers, gayety of fraternity life.

One of the things required of a freshman not long the Geographical Review. ago was that he bring to the frat house a penny of a certain date. He was busy and had a devoted mother who volunteered to go to the bank and get the coin. They indulged her at the bank and she spent five hours pawing over the copper. All the time her hands were Buck secretary, Dorsey Barnes treasgetting madder and madder. Clutching the penny bearing the required date she sought out an alumnus of the fraternity and asked if it was necessary to do such a fool stunt before being initiated. He said that it couldn't be required. Nursing her wrath she began looking into the "probation" system. As a result, three boys have refused during the last two days to undergo the disciplinary process in one fraternity. They said they would give up the fraternity first.

Inasmuch as this is more complete and convincing proof of courage than taking twenty blows from barrel staves or being clothed from head to foot in sticky fly paper, they will probably be initiated without any question. When the rest of the freshmen discover that probation is not obligatory some of them will take the more courageous course and lay down their pins rather than do a degrading or vulgar stunt. That requires moral fortitude of so high an order that the vast majority will take their medicine and then spend the coming months in thinking up ways and means for taking revenge when the next group of freshmen falls under their power.

"Colleges Are Fine-For Women," Says Will Rogers, Poet Lariat

-By Jack Burkett '28

"Colleges are a good thing," grinned Will Rogers, America's Poet Lariat, in an interview at the Hotel Syracuse previous to his lecture at the Mizpah Monday night, and then squinting at us seriously, added, "-for girls." They oughts know a lot more-No! God knows they know enough, but they oughts be better educated. They have to earn more or a lotta young men won't be supported in the style to which they've been accustomed."

He doesn't agree with H. G. Wells in his claims that a college course is a four-year vacation, but feels 'that fewer dances and football games might give the youngsters more time to play." "Less lecturing and more education," he thinks, "might relieve the situa-

When asked what he thought about fraternities and sororities, Rogers said, "Well, I believe they serve a good purpose. They take the boys and girls away from the common herd while they're at school, but they get on the normal level after they get out."

While he was visiting Nicholas Murray Butler a short time ago, the Columbia Dean said he was going to see that Rogers received a college degree. The peer of modern humorists replied he couldn't accept because it would put them on the same plane.

Asked if he thought it advisable for college grid performers to turn professional on graduation, he told us, "not until they have made as much as possible in the amateur ranks."

Rogers has a brotherly feeling for George Bernard it is this degeneracy in the honoraries which has both know the world's wrong. We don't know what's wrong with it-but, we're getting paid to fix it at so

Men Who Want to Be Right Call On Lou Hill

The man who wants to be right every minute must wear truly exclusive clothes.

Most University of Nebraska men know thats the kind of clothes Lou Hill has to sell. That is why he sells more College men than other clothiers or tailors in Lincoln.

Lou prides himself on his special "made to your order" Suits. For those who want the best, he has the best, he has the "Oxford" line and then slides down the price scale, away down to \$48.50. And you'll have to admit that is some price for distinctive, individualized made to your order Spring Suits.

Drop in and see Lou now, while the best patterns are available.
