

CHANCELLOR BURNETT OPPOSES HOVIS BILL

Proposed Measure Would Abolish Regents and Normal Board

HOUSE CONVENES TODAY

Chancellor E. A. Burnett, of the University, Earl Cline, member of the board of regents; T. F. Hamer, member of the state normal board; George Martin, president of Kearney normal, and H. E. Reusche, secretary of the state normal board, appeared before the house committee on constitutional amendments, Ernest Peterson, chairman, Monday afternoon in opposition to H. R. 178.

This bill, sponsored by Representative Hovis of Dawson, proposes a constitutional amendment abolishing the board of regents and the state normal board and setting up a state board of education consisting of six members, one to be selected from each congressional district with the state superintendent ex-officio member and secretary.

State Superintendent Taylor and George W. Rosenlof, director of secondary education and teacher training, presented the bill, not, they stated, as advocates, but for the purpose of explaining what other states have done. Mr. Taylor corrected a newspaper headline to the effect that his office was dipping into the legislative treasury. He said that some states have discovered that elimination of educational effort in duplicate has been worth while. He asked, he said, only that Mr. Rosenlof be heard on the subject of unified control.

Also Denies Interest.

The director of secondary education also made it known that he does not assume responsibility for the fathering of the bill. He did not wish, he said, to be considered for or against. He added that his sole purpose is to submit facts and experiences of other states where the unified plan has been tried out. He discussed the system of co-ordination of interests of higher education under one head at considerable length and quoted extensively from educational authorities of other states. Twenty-four states, he said, have some form of co-ordinated control. Kansas and Iowa he listed as having absolute unified control.

One criticism, he said, is that the teacher training schools or state normals of Nebraska have separate interests from the state university. He added that, in his judgment, the interests of the four normals are not greatly different than those of the university in view of the fact that the university has a training school for teachers.

The state board of control, he said, operates a dozen or more penal and charitable institutions and has cared for two educational institutions. He discussed the problem of endeavoring to co-operate in the carrying out of a state educational program, of bettering interrelationship in matter of credit allowance and suggested that a harmonious scheme has been found preferable to educational strife.

Chancellor Burnett said that Mr. Rosenlof dealt mainly with the theoretical situation rather than as it actually exists in Nebraska. As to standards, he would like to see, he said, higher standards at the university. As to the matter of credits, he said that if the other schools of the state prove that their courses are comparable to those of the university, such credits are honored.

Decided Advantage.

In commending the efficiency of the board of regents, the chancellor said that a decided advantage had governed since the beginning in that regents are unpaid. "Members of the board," he said, "have served at a decided financial loss. They have served for a distinctive honor. When you attach money, men become interested in the office because of the salary. If you pay members of a board, as is proposed, the \$10 per diem is too low. I suspect you will need to provide substantial salaries to invite men who are fitted by training to serve and give full time."

He said that in Iowa, the cost of maintaining the educational board for one biennium was \$65,569, while the entire cost for the university board of regents to the state for the same period, 1927 and 1928, was but \$3,589.58. The chancellor did not criticize the proposed unification. Iowa, he said, apparently is satisfied with the plan altho the president of Ames resigned because he believed that board's primary interest was in the state university.

President Martin of the Kearney normal expressed fear that any readjustment such as the bill proposes will prove harmful. "The matter of interchange of credits, he said, is being nicely handled through conferences.

Sees Danger Ahead.

T. F. Hamer of Kearney, member of the state normal board, sees danger ahead through adoption of any such unified system. "It would," he said, "result in a race between institutions for representation on the board. Everything is harmonious now. I cannot see how we can better conditions by centralizing powers of administration. I believe that danger lurks in any such plan."

MANY REGISTER FOR SHORT FARM COURSES

Prof. Bradford States That Winter Courses Are Very Popular

One hundred and eighty-seven registrations have been made this year in winter short courses at college of Agriculture at Lincoln according to Professor H. E. Bradford in charge of enrollment.

The farm operator's course opened the second term of its two-year winter course Monday, January 28, with forty-six Nebraska farmers enrolled. This course is divided into two courses of eight weeks. It is planned to meet the needs of men who wish information in agriculture but cannot leave their farms long enough to take the regular course in the College of Agriculture.

With thirty-seven men finishing the first term in the farm operator's course and forty-six enrolled for the second term the total registration in this group has reached eighty-three. This is the first year that this course has been offered and indications are that it will be filled with a larger enrollment next winter.

Fifty registrations have been made this year in the auto and tractor courses given by the Agricultural engineering department. The first two terms have been limited to twenty-five men each. A third group will begin the auto and tractor course under the regular college staff February 25. It is expected that at least seventy-five men will have completed the work in auto and tractors at the close of the third term.

Other short term courses which have been given at the College of Agriculture during the winter include the following: Poultry, dairy manufacturing, butter making, ice cream production, and two special courses for the cow testers.

Short courses varying in length from week to six months is one of the special methods of instruction available to agriculturists in Nebraska through the College of Agriculture, University of Nebraska. The course in technical dairy is six months in duration while the poultry course and the ice cream makers course are one week in length.

Miss Mathilda Peters, a member of the Home Economics faculty, College of Agriculture, who has been teaching the course in hospital dietetics at the University of Nebraska school of nursing in Omaha completed her semester work there, Saturday. The school of nursing is directly connected with the University of Nebraska College of Medicine located there.

Miss Peters has been the instructor of this class for the past four years. Twenty girls were enrolled in this course the past semester. She teaches foods and nutrition at the Agricultural college during the week, and for the past semester has been instructing the dietetics class in Omaha on Saturday afternoons.

The course is given to the second year nurses who have previously taken an elementary course in dietetics given by the staff members. It consists of one hour lecture and two hours laboratory work each week, and is given only the first semester of each college year. Each nurse who took this course last semester was responsible for the special diets in parts of the hospital for a period of one month.

Correct diets for the individual, resulting in the use of less medicine, is especially stressed in this course. Proper eating is much more healthful, pleasant and less expensive than using medicine to correct faults due to poor food habits.

Band Frat Will Meet

Gamma Lambda, band fraternity, will hold an important meeting following a dinner at 6 o'clock this evening at the Y. M. C. A.

Sorority Plans Dinner

Kappa Beta sorority will hold a Valentine dinner at the First Christian church this evening from 5:30 to 7:30 o'clock.

NEBRASKA STUDENTS ENTER COMPETITION

Cornhusker Undergraduates Attempt to Win Plane Or Scholarship

MANY TRY FOR AWARDS

Four students of the University of Nebraska, Charles W. Sharp, Frank L. Heydon, Lloyd C. Moffitt and John C. Phillips, are attempting to win a four-year university scholarship in aeronautics, or an Eaglerock airplane, offered this spring by the Alexander Aircraft company of Colorado Springs, Colorado, to the American undergraduate who reveals the deepest insight and practical imagination in aeronautics.

A remarkably close understanding of the new industry characterizes papers submitted by students of 183 colleges and universities. Several novel ideas are being used to advantage by the Alexander Aircraft company. The response indicates that thousands of undergraduates seriously consider the new aircraft industry as their intended vocation.

Flying Scholarships Offered

As an added incentive, seventeen Eaglerock distributors will award free ten hour flying courses, worth approximately \$300 to the college students in their respective territories who make the best efforts to win the awards. Flight instruction manuals will be given other students who place high. The competition closes May 1.

The Alexander Aircraft company is conducting the contest as a means of interesting more young men and women in flying and in the aero industry as a field of future activity. Within the last year commercial aircraft factories have virtually scrambled for the services of college trained aeronautical engineers and aeronautical executives. The shortage has forced a number of new companies to import engineers from Germany and England.

THE SPASM

Here we are again, folks, with another Spasm. We weren't stoned after the first appearance, and the reason may be that we kept under cover.

On the menu for today are several delicacies. Some are so delicate that it may be difficult to get the point. Here goes, soup first.

He gazed into her pale blue eyes. His look was truly wistful. Worry in autos and concern showed plainly in his facial expression. It would be a hard-hearted woman in deed who could pay no heed to his tender pleadings.

Sympathy and understanding crept into her face. She pitied this poor youth. Finally she spoke.

"Yes," she said, "you passed the course."

Payment of fees, new books bought(?), house bills to be paid, the interfraternity ball. Heaven help the poor college man.

Of course you have heard the one about the Scotchman who stood in the middle of the street with a piece of bread and waited for a traffic jam, but have you heard about the like gentleman who raised his boy on whisky because it made him tight?

As soon as the winter weather breaks, the campus Fords will come out with a new crop of wise cracks.

We will have office hours from 3

Astronomy Professor Opens Morning Class

A brief course in astronomy will be offered at 10 o'clock on Friday according to Professor G. D. Swezy, chairman of the department of astronomy. The enrollment of the present class is so large that it is necessary to form a new section. Students who are free at that hour, are advised to make the change and avoid overcrowding.

Angwan Picture Set For Wednesday Noon

Owing to the fact that several members of the staff moved during the taking of the Angwan picture last week, another staff picture has been ordered for Wednesday, February 13, at 12:15 o'clock. All contributors of both first and second semester staffs are urged to be present.

to 4 o'clock this week to receive suggestions for the most popular slang expression for 1929.

Weather is weather, and we are going to have it, so it snow we worrying. (That's a deep one, and really is good for a laugh.)

UNIVERSITY RAISES TEACHING STANDARDS

Interpretation of New Rules Regarding High Schools Is in Bulletin

Interpretation of the new rules governing teaching standards in state high schools accredited to the University of Nebraska was made in the last weekly bulletin published by the extension division of the University.

One of the changes in the standards is worded as follows: "All teachers new to the school are to instruct in the line of the major or minor college preparation." This is interpreted to mean that a minor or twelve hours will be recognized in English, any foreign language, mathematics, any combination of biological sciences, botany, physiology, any combination of physical sciences, astronomy, chemistry, geography; history including economic geography; a minor of sixteen hours in manual training, art, physical education; a minor of twenty hours in home economics, music, or commercial subjects.

Teaching Minors Stated

The second year of a foreign language in high school followed by six hours in college and the third year of mathematics in high school followed by six hours in college will be accepted temporarily as teaching minors. It was also stated that the standard in regard to majors and minors does not apply to superintendents.

Three other major changes were passed by the University senate recently in regard to teaching standards. Special credit will be made of schools not organizing on the two common plans of school organization. In the future, all high school teachers must have one hundred twenty college hours of preparation.

Students entering accredited schools from non-accredited or non-approved schools will have to take a written examination in subjects which they do not continue, and the papers will be kept on file for inspection; accredited schools will accept without examination, credits earned in other accredited or in approved schools.

WINNER IS ANNOUNCED IN CADET TRACK MEET

Company 'M' Finishes First In Scheduled Events; Lambert Stars

Company M, with 2,288 points, was announced winner of the military track meet, in a statement given out yesterday by Jimmy Lewis, intramural athletic director, who conducted the meet. Company H and Company L were tied for second with 2,175, and Company K was third, with 2,150.

Richard Lambert, Company F, was high point man for the regiment, scoring 4,555 points. Roger Bevard was second highest scorer with 4,810. He is a member of Company B. Elmer Ragains, Company G, was third with 4,766.

Average of Each Man Taken

The order of finishing for the remainder of the companies: E, 2,045; G, 2,030; J, 2,005; Headquarters, 1,987; B, 1,972; A, 1,949; C, 1,932; D, 1,868. These placings were determined by taking an average of points scored by all men in each company.

All of the following men scored better than 4,000: Howard Jackson, Robert Ostergard, Thomas Vanderhoof, Raymond Abernathy, Stephen Hofak, George Smutney, Harold Petz, Elmer Faytinger, Dudley Dobbs, J. S. Pierce, Marvin Paul, and Ralph Rodger.

Leading scorers in each company were A. Laverne Sprague; B. Roger Bevard; C. James Stone; D. Weldon Dobbons; E. Stephen Hofak; F. Richard Lambert; G. Elmer Ragains; H. Elmer Faytinger; I. Charles Cotton; K. Harold Petz; L. Raymond Abernathy; M. Henry Seeger; Headquarters, Howard Jackson.

All scores were made on a pentathlon basis, awarding points according to the achievement of each individual, and not for winning in competition.

early season of the following fall. Coach Dana X. Bible, the new Cornhusker grid mentor stated during his last visit to Nebraska after the holidays that the ruling seemed to be out of the ordinary as to deprive a man of getting exercise and practice in the sport he wanted to participate in.

The second problem on deck for the directors of the conference was the freshman football games between schools in the Big Six conference. The board of directors seemed to be in favor of such a ruling but will not act upon it until their meeting in March. The plan would permit two freshmen games in the fall between conference members of the Big Six. One of the yearling games would be played at home and the other away from home.

Our Wide Open Policy and What it Means To You - And All of U.S.

Our Policy of Co-operation

The splendid progress of the Missouri Pacific Lines in the last five years has been achieved very largely as a result of: First, the aggressive loyalty and endless, tireless effort on the part of our army of employees; Second, the co-operation and support of the public generally and the shipping and traveling public especially; and Third, (made possible because of the former two things) the investment of many millions of dollars of new capital.

The new capital was obtained because of the increasing volume of traffic which justified it. And the increasing traffic is directly traceable to the work of our employees, adequate service and the confidence of the public. Both of these are, in large measure, a result of the "Wide Open Policy" that has been zealously maintained.

There can be nothing secret about the management or operation of railroads because of the regulation and supervision to which they are subjected by numerous governmental and official bodies such as the Interstate Commerce Commission, State Railroad Commissions and similar institutions. But we have not been content to merely say "the information is there and is available if the public wants it."

ceaseless effort has been made to inform both our thousands of employees and the public. Every phase of the railroad business has been analyzed and broadcast. Our own forces are constantly combing our property for general, specific and miscellaneous information that will or might interest our own family members or our patrons and friends. Such information is carefully collected, intelligently analyzed and prepared in easily understandable form, and distributed voluntarily in every possible way.

As a result of this policy our own employees are as well informed as any in the world and the public generally knows more about the Missouri Pacific Lines than is known of most such similar institutions. Confidence, co-operation and support have resulted—and those three reactions on the part of our patrons and our own family members have made possible the development of the Missouri Pacific Lines into one of the outstanding railroads of the world.

The Missouri Pacific has welcomed and encouraged the public to come to some of us with any and all questions relating to transportation. If the individual Missouri Pacific man or woman approached doesn't know the answer to your question he will get in touch with or put you in touch with someone in our organization that does know it.

We are most happy in the knowledge of the achievements already accomplished and it is a real pleasure to bestow the credit for the advancement where that credit belongs. We have by no means reached the limit of our development. We expect to continue leading the Parade of Progress.

I solicit your co-operation and support.

W. H. Werkmeister
