

### GISH TELLS OUTLINE OF RAILROAD RATES

#### Big Six Stages Campaign To Get Uniformity in Transportation.

Railroad rates to football teams in the Big Six conference are recently submitted by the western passenger association were announced by Herb Gish, director of athletics, Thursday. In the announcement Gish stated that these rates were brought about through a campaign for obtaining uniformity in transportation rates. He stated, however, that this uniformity has not been entirely accomplished even with the present rates recently submitted by the association.

The six teams in the Big Six conference are in two different railroad divisions, according to the new plan adopted by the railroad association. Missouri and Iowa are included in the eastern committee territory while the two Kansas teams, Oklahoma, and Nebraska are in what is known as the trans-Missouri territory.

Trans-Missouri rates are: parties of ten or more on one ticket, fare and a half for round trip; parties of twenty-five or more on one ticket, fare and a third for round trip; parties of estimated 200 or more on one ticket, one fare for round trip.

Gish stated that in former years schools in the Big Six have received rates ranging all the way from popular excursions (less than a one way fare for the round trip) clear up to full fare for the round trip. In the hopes that uniformity would be established a campaign was waged, Gish said, and this is the result of it.

Rates Not Uniform. These are not uniform, however, for a team (such as Nebraska) in the trans-Missouri territory does not get the same rates in the eastern committee territory. The Nebraska football team in going to Columbia, Mo., would pay the rate of a fare and a third for the round trip as far as Kansas City, Gish explained. But after they left the trans-Missouri territory and entered Missouri in the eastern committee territory they would pay double local fare for the round trip between Kansas City and Columbia.

In commenting on the rates to Missouri, Gish stated that he was dissatisfied with them. He stated that the railroads could give better rates than they do and that they should know the university athletic department has enough influence to turn a good deal of business to either the bus lines or railroads.
