LINCOLN, NEBRASKA.

## SUMMER ENROLLMENT INCREASES; EXPECTED TO REACH 2,700 MARK

Late Registrations Bring Total up to 2,474; Moritz Pleased.

New Teachers Courses Draw 100 Students to Vacation School.

REGISTRATION BY DATES.

	1929	1930
First Monday	1,321	1,202
Tuesday	792	921
Wednesday	82	101
Thursday	29	44
Friday	20	34
Saturday	12	11
Total first week	2,259	2,313
Second Monday	75	91
Tuesday	24	31
Wednesday	10	11
Total to date	2,368	2,446
Medical college short course		28
Grand total to date		2,474

With the 1930 summer school enrollment approximately 100 ahead of the total at this time last year, a registration of more than 2,700 is expected in this year's vacation session. The above report, issued from the office of R. D. Moritz, director of the summer school session, shows how late registrations this year have brought the total so far considerably above the 1929 figure at a corresponding date.

The three courses in vitalized agriculture, parent-teachers work, and rural school administration, which began last Monday, brought at least 100 more summer school attendants. Most popular is the parent-teacher course, which has more than fifty in the class.

Because only one of these three courses may be taken for the one hour credit which is offered for each of them, a number are auditing one or two of them in addition to taking the third, thus lowering the actual number of registrants for each course.

Medic Reports Incomplete. Twenty-eight medical students are taking the short course this summer in Omaha, according to word received by Mr. Moritz. To this number will be added at least 100 more who are taking the regular work, if registration this year at the college of medicine approximates that of 1929.

Field courses in botany, geology and agriculture which last year had more than seventy students enrolled, this year have not been reported. These two sources of more summer students added to the graduate college which is still enrolling about a dozen students a day, are expected to yield a total 1930 registration somewhat larger than last year's 2,680 students in summer session.

## DEBATERS TO PICK QUESTION FOR 1930

Chain Stores, Disarmament, And State School Fund Possible Subjects.

1. The chain store is desirable.
2. A state school equalization fund is a desirable fiscal policy for Nebraska.
3. The nations should disarm except for such forces as are needed for police purposes.

One of these subjects will be used by high school debaters for state-wide argumentation the coming year. Just which one has not yet been determined.

Prof. H. A. White, president of the Nebraska high school debating league, has sent a letter to all member schools requesting instructors in debating to send in their choice. All replies must be in by June 25. Announcement of the subject will be made when the vote is compiled.

In reply to a questionnaire sent out May 28 by Professor White, preference for the three subjects was quite evenly divided. Professor White sent out his most recent letter to get a greater consensus of the teachers in the debating league. The chain store question will be debated next year in seventeen states by high school forensic students.

## NATIONAL LIBRARY CONVENTION DRAWS THREE NEBRASKANS

The University of Nebraska will be well represented at the annual meeting of the American Library association which is to be held June 23 to 28 in Los Angeles. In addition to Gilbert Doane, librarian, will be Maude Wisbart, order librarian, and Mabel Harris, librarian of the model high school library in teachers college.

Miss Harris will preside at a conference of teachers college librarians Wednesday, June 25. The keynote of the whole convention is to be scholarship in library work and will be first presented to the association Monday, June 23, when President Andrew Koegh of Yale university gives his address.

## Geography Tour Of State House Popular; 150 Go

Approximately 150 summer school students, mostly teachers, accompanied Dr. Nels A. Bengtson through the state capitol on the second department of geography excursion Tuesday afternoon. The party walked from Teachers college to the capitol where the students were met by guides who conducted them through the state house.

The itinerary first included the governor's office where the governor's secretary welcomed the students and escorted them through the governor's private office.

Guides explained the various features of construction and the symbolism of the sculpture, mural paintings and mosaics. According to their statements, the Nebraska state capitol is ranked as one of the four most outstanding modern buildings in architectural design in the world today.

Dr. Bengtson called attention to the Bedford limestone which is widely used in the capitol construction and spoke briefly of its durability and its quality of whitening with age. He stated that the mineral stains which now discolor many of the blocks have given rise to rumors of inferior stone, but that the stains really enhance its beauty and prove its genuineness.

The capitol tour was the second of ten such excursions planned by the department of geography for summer students.

## GRADUATE COLLEGE REGISTRATION SAME

One Day Remains to Bring Enrollment of 481 to 1929 Total of 520.

With all of today left to complete registration in the graduate college, its enrollment for the summer session this year is expected to approximate the 1929 total. To date 481 students have signed up for graduate courses as compared with 520 who registered last year.

Of the 481, 235 are working toward M.A. degrees, 40 toward M.Sc. degrees, 30 toward Ph.D. degrees, and 176 toward no degree. Graduate students are given until 4 o'clock today, June 20, to complete their registration without paying a late fee. To those who enroll today may be added a few more whose registrations will be late.

## DR. SPEARS HONOR GUEST AT DINNER

A dinner was given by Herb Gish, director of athletics, at the University club Monday night in honor of Dr. Clarence W. Spears, Oregon football coach teaching in the coaching school here. Members of the athletic department, coaching staff, Dean Sealock of teachers college, Director Moritz of the summer session, and Prof. R. D. Scott, representing the athletic board, were present.

## Capt. Lyon Improves Following Operation

Captain H. Y. Lyon is recovering from a tonsilectomy performed last week at the federal hospital at Leavenworth where he was ordered for treatment after the close of the regular term of school here. Captain Lyon is an instructor in the department of military science at the university.

## STUDENTS WILL TAKE PLATTE VALLEY TOUR

Bus Excursion Due to Leave Former Museum at 7 a. m. Saturday.

A full day trip by bus to some of Nebraska's chief points of interest is offered to summer school students by the department of geography Saturday. Dr. Nels A. Bengtson will head an excursion, leaving the Former Museum at 7 a. m. Saturday, June 21, through the lower Platte valley.

The trip, according to Dr. Bengtson, is to be one of recreation as well as education. Picnic lunches are in order. The party will be in Louisville during the lunch hour. The following places will be visited and studied.

- Drift hills east of Lincoln.
  - Gorge and waterfalls of the Weeping Water.
  - Looms plant at Manley.
  - Cement factory at Louisville.
  - Pottery factory at Louisville.
  - Stone mine of Ash Grove Lime & Cement company.
  - Looms hills north of the Platte.
  - State fish hatchery.
  - Gretna divide and Meila terrace.
  - Salt creek flood plain and terrace.
- This trip is required of all elementary geography classes but is open to all students in the summer session. Those desiring to go should sign on the bulletin board in Teachers college by Friday noon. The party will meet in Former Museum 105 at 7 a. m. and expects to return by 6 p. m. Bus fare, \$2.

## LEADERS NEEDED IN SCHOOLS, SAYS MORT

Columbia Educator Speaks At First Meeting of Phi Delta Kappa.

Dr. Paul Mort, director of the school of education of the teachers college of Columbia university and summer professor here, spoke on "Room for Genius and the Field for Educational Leadership" at the first summer meeting of Phi Delta Kappa, honorary educational fraternity, Thursday evening at the Y. M. C. A. Approximately 100 men attended.

Dr. Mort described the vast opportunities open to the well trained college man. Education, he pointed out, has become such a complex thing that leaders stand in need of creative character. It was this creative ability that gave Horace Mann the vision of a state school system, that gave Michel Angelo the genius to paint without models and plans, he declared.

Dr. Mort has made a detailed study of the public school systems of Missouri, Kansas and Nebraska in the middle west. His plan of a public school system is now in operation in New York and Alabama. Dinner meetings of Phi Delta Kappa are not limited to members of the fraternity but are open to all men students in the summer session, particularly those interested in teaching.

## Ailing Students Are Treated by Health Service

STUDENT HEALTH SERVICE Pharmacy Hall, Second Floor  
Men students, 8-10 a. m., Dr. Charles Harms.  
Men students, 10-12 a. m., Dr. Earl Deppen.  
Women students, 1-3 p. m., Dr. Inez Philbrick.

Bad colds, sore throats, corns, cuts, acute burns—any illness and any injury are cared for by Student Health service physicians in Pharmacy hall. The \$1 medical fee paid by all students at registration covers the cost of this professional service.

"There are as many students who receive medical service in the summer in proportion to the number registered as there are in the winter," Dr. Inez Philbrick said.

So far the health service has been busy examining girls who desired to take swimming courses. Out of nearly 100, only four were physically unfit for the courses, according to Dr. Philbrick.

## NIESCHMIDT ONLY FEDERAL DELEGATE TO SOIL CONGRESS

E. A. Nieschmidt of the state department of soil survey left Lincoln Monday to attend the International Soil Congress at Leningrad and Moscow, Russia, as sole representative of the United States government.

Because the federal government carries on no diplomatic relations with soviet Russia, no other delegates to the congress were sent.

Mr. Nieschmidt, who will be gone all summer, also represents the Nebraska state department of soil survey. He is a soil expert having graduated from the Imperial school of forestry in Germany and from the University of Heidelberg.

## Pershing Rifles Make Carl Hahn Major General

Carl J. Hahn, University of Nebraska senior and for the past year national adjutant of Pershing Rifles, has been elected major general of Pershing Rifles for the coming year. William Comstock, a junior, is the new national adjutant. Hahn succeeds Ray E. Sabata as major general.

Organization of Pershing Rifles, a national military organization in colleges and universities which have R. O. T. C. units, provides that the major general and national adjutant be elected from the mother chapter at the University of Nebraska. These two officers of the national organization are chosen by the three brigades into which Pershing Rifles is divided.

Hahn will meet officers of both the first and second brigades in Chicago the first week in August and discuss plans for expansion of Pershing Rifles. There are now fourteen active chapters but more than a score of applications for membership from other R. O. T. C. units are on file.

Hahn's university activities include president of Kosmet Klub, vice president of the Interfraternity council and junior member on the Student Publication board last year. He is an Innocent and a member of Sigma Nu. Comstock, affiliated with Phi Delta Theta, is the new junior member of the Student Publication board and last semester was president of the sophomore class.

## SENIOR INVITATION REPORT IS ISSUED

4,700 Announcements, 2,700 Invitations Yield Profit of \$100.

A total of 4,700 announcements and 2,700 invitations were purchased by members of the class of 1930, according to an official report issued today by Long's Book store, which handled the distribution of the invitations and announcements.

Profit of \$100.59 realized through the sale of the announcements, however, does not go to the book store but to the university. It will be credited to the class of 1930.

Number of announcements sought this year exceeded that of years past and necessitated having 1,000 of them printed by a Lincoln firm. The Elliott company. (Continued on Page 3.)

## WOLCOTT AND WADE GO TO PUGET SOUND

Dr. R. H. Wolcott, chairman of the department of zoology, and Dr. Otis Wade, instructor in zoology, are spending the summer at the Puget Sound Biological station on Puget Sound, Wash. Dr. Wolcott left by train and Dr. Wade by motor early in the week. Dr. Wolcott will teach at the station while Dr. Wade will do research work.

## Jorgensen Secures Position at Harvard

Theodore Jorgensen, who received his Master's degree in physics here this year has been appointed assistant instructor in physics at Harvard university where he will begin work on his Doctor's degree next fall. He is working at the research laboratory of the Eastman Kodak Co. this summer.

## FIRST SUMMER MIXER HELD AT GRANT HALL; MORE MAY BE GIVEN

Games and Stunts Make up Program; Plan Dance For Next Affair.

Future of Entertainments Depends on Interest Among Students.

To attend the first summer mixer ever planned for the entertainment of all university summer session registrants, a large number of students came to the free recreational program given at Grant Memorial hall last night under the sponsorship of the department of physical education for women.

The mixer which lasted from 8 to 9:30 o'clock, was directed by Miss Frances H. Ash, instructor in women's athletics, with the aid of a committee composed of the members of her class in conduct and management of social recreation.

An introduction stunt at the beginning of the evening's program brought the students together in an informal manner and served as a get-acquainted event. The introductory mixer was concluded by a grand march, after which the crowd was divided into several groups which spent the remainder of the evening playing active and quiet games.

The majority of those attending the mixer were women students, although some men were also present.

Plan Other Programs.

Tentative plans for similar entertainments during the remainder of the nine weeks session depend for fruition on the success of last night's program. Two hours of dancing following the recreation hour will be an addition to future programs, if the department of physical education feels that enough enthusiasm for the mixers was aroused by the first one last night. In this case the mixers will be given on week end nights.

Students on the committee in charge of the games were: Alice Baars, Cynthia Boswell, Florence Buol, Katherine Gibbons, Alfreda Radbruck, Emma Selk and Bertha Watson.

Miss Ash is assistant director of recreation in Lincoln and supervisor of elementary physical education in the Lincoln schools during the regular school term. She has been teaching theory and practice of playground activities in the university's two weeks course which ends today.

## EXTENSION DIVISION ENROLLMENT GROWS

541 Students Take Courses By Mail This Summer; Increase of 60.

Enrollment in the university extension division this summer is considerably more than last summer, according to Dr. A. A. Reed, director. Last year during the months of June, July and August there were 481 students, 259 of which registered in June.

Thus far this season 541 students have enrolled. Of this number 350 enrolled before June 1 and 191 since that time.

The favorite subject, according to enrollment numbers, is English with fifty-one registrants. English 21 leads with eighteen students. History claims a total of thirty-five, scattered over nine different courses. Education, always a favorite topic for extension work, comes third with an enrollment of thirty-one in eleven courses.

In the languages, German leads with a registration of twenty. Latin, Spanish, French and Swedish are also live subjects with varying enrollment figures.

Up to date, but one student had registered for each of the courses offered in political science, physics, and applied mechanics. The school of fine arts claims a total of eighteen thus far. Special courses are being offered this summer in dramatics and juvenile arts.
