LINCOLN, NEBRASKA.

## ALL-STUDENT PICNIC IS LATEST THING ON AMUSEMENT CARD

Faculty Committee Provides More Fun for Scholars Next Friday.

Outing Slated to Take Place At Beach; Many Stunts On Program.

The picnic fever has struck University of Nebraska summer school authorities.

Following success of the all-men's outing held last week, the faculty committee in charge of student entertainment has formulated plans for an all-student picnic to be held at Capitol Beach, Friday of this week.

As this is really the first event of its kind to be held during the summer term at Nebraska, there is no precedent upon which to plan the affair for Friday and for that reason plans are as yet in the formative stage.

That there will be some sort of a get-together on that day is assured by E. W. Lantz, chairman of the faculty committee.

"The all-men's picnic proved so enjoyable and the mixers have been so well attended that there seems to be no reason that a combination of the two activities should not provide an evening of good fellowship and real entertainment," stated Mr. Lantz.

According to preliminary ideas concerning the Friday picnic, an attempt will be made to get all

## MEN STUDENTS ARE OUT AFTER PRIZES IN GOLF TOURNEY

Three men students of the summer school have turned in their golf qualifying score cards to Prof. R. D. Moritz, director of the vacation term, it was announced Monday.

They are Superintendent A. B. Geinick, Falls City; Superintendent O. L. Webb, David City, and Superintendent G. W. Hildreth, Oakland.

This is but a preliminary step to the golf tournament proper which is scheduled to begin Tuesday at Antelope park, when faculty and men students will vie for prizes which are being offered by the university athletic department.

## ENGINEERING GRADS VISIT ALMA MATER

Two campus visitors this week were Marvin R. Haith and Gilbert H. Deason. Mr. Haith is a graduate of the mechanical engineering department, and is at present assistant city engineer at Fairbury, Neb. Mr. Deason, a graduate of the electrical engineering department, is on a leave of absence from the General Electric company, Schenectady, N. Y.

## KAPPA PHIS PICNIC AT VAN DORN PARK

Kappa Phi, Methodist girls sorority, held a picnic Friday evening at Van Dorn park. About thirty girls attended. The time was spent informally in discussion of plans for the coming year and in listening to reports from the delegates who attended the national convention at Montreat, N. C.

## Course in Dramatic Art, Makeup Offered

Here's good news for the dramatically inclined.

A practical course in the theory and technique of dramatic art and makeup is being offered under the direction of Miss Alice Howell, of the school of fine arts. The work is intended particularly for teachers who plan to coach plays.

The class is divided into groups, and each week a group presents a play, actually coming into contact with the problems of production. Several class periods are devoted to practice in making up for the stage.

## LUTHERANS DEFER PLANS FOR OUTING

Picnic Intended for Friday Will Be Held at Some Later Date.

Because the faculty committee on student entertainment has planned an all-university picnic for Friday, July 18, there will be no Lutheran outing as decided upon at the last gathering, according to Rev. H. Erck, student pastor.

The last picnic, the second one held during the summer, took place at the agricultural college campus and was attended by approximately fifty persons. The affair was in the form of an honor event for Rev. and Mrs. H. Erck, the day being their twenty-fourth wedding anniversary.

A committee was appointed by the group last Friday to have charge of all future picnics of Lutheran students. Members of the committee are Louise Metz, Seward; Louise Lucas, Lincoln; Leona Degner, Sterling; and Charles DeVore, Lincoln.

## GUEST INSTRUCTOR PRAISES NEBRASKA

Prof. E. R. Anderson of Arizona Lauds Work Done By Local Chemists.

The chemistry department of the University of Nebraska holds a high position in the educational field, according to E. R. Anderson, head of the chemistry department of the University of Arizona. He was enthusiastic in his praise of the men on the instructional staff.

Mr. Anderson is teaching two courses in chemistry at Nebraska this summer. One of these is a senior course, the other is for graduates. Fourteen are enrolled in each class.

The professor stated that at present he is working on a paper in conjunction with Dr. Upson of the Nebraska chemistry department. He did not divulge the nature of the paper, but said it is to be printed in a chemistry journal soon.

Professor Anderson is now on leave of absence from the University of Arizona. Next fall he is going to University of Wisconsin to work on the chemistry of woods. He has been engaged in research on the chemistry of plant gum during the past few years.

"I like Tucson in the winter, but for the summer, give me Nebraska every time," the guest instructor said.

## ENGLISH VISITORS GIVEN OVATION AT NUMEROUS AFFAIRS

Among the numerous events being planned in honor of Dr. Charles W. Bailey, headmaster of Holt Secondary school, Liverpool, England, who is here conducting several lectures on secondary school education, and Mrs. Bailey, who is accompanying him, is an open dinner at the Y. M. C. A. Red room Tuesday evening.

The dinner is being sponsored by the men's honorary educational fraternity, Phi Delta Kappa, and is open to all students. Dr. Bailey will discuss "New Lamps for Old Education" at the Tuesday evening affair.

Monday evening the visitors were feted at the University club under auspices of the faculty of the university. The dinner took place on the University club roof garden and was under the direction of Prof. Roy E. Cochran.

## METHODIST PICNIC ON FRIDAY PROGRAM

Methodist summer session students are invited to attend a picnic supper, sponsored by the St. Paul Epworth league, which will be held at Van Dorn park, Friday evening, July 18, with lunch served at 7 o'clock. Entertainment will be featured in the form of games and singing.

If possible, expectant picnicers are asked to notify Miss Gertrude Marsh at B4712 of their intentions to attend. Twenty-five cents will be charged to provide finances for securing food.

## ENGLISHMAN BEGINS SERIES OF LECTURES

Dr. C. W. Bailey Continues Addresses Over Tuesday And Wednesday.

Continuing his three-day series of talks before University of Nebraska audiences, Dr. Charles W. Bailey, headmaster of the Holt Secondary school, Liverpool, England, will talk on "The Drama and the School" at Social Sciences auditorium, 10 o'clock Tuesday morning.

This will be the second public appearance of Dr. Bailey as speaker on the Nebraska campus, the first being an address given in Social Sciences 101 at 11 o'clock Monday morning on "English Literature and Ethics."

The third lecture to be given by the English professor will be Wednesday morning at 8 o'clock when he will address another group of summer school students in Social Sciences auditorium on "A Comparative Analysis of Secondary Education in England and the United States."

In addition to the regular daily talks which Dr. Bailey is giving to public audiences, he will lecture to several classes in Teachers college on various phases of secondary education and its problems.

Dr. Bailey, who has written many books on secondary education and several on ethical education, is recognized as an outstanding English educator, according to Prof. H. C. Koch, chairman of the committee in charge of bringing him to the university.

## School Teachers Are Given Facts About Publicity

Publicity hounds in the making—but it's not as bad as it sounds. There are thirty-three persons registered in the course offered at the University of Nebraska Teachers college, where the fundamentals of correct school publicity are being taught.

The class is composed of superintendents, principals and experienced teachers and an intensive study of the theory of school publicity, actual exhibits of work done in the field together with practical writing and development of the school publicity projects, constitutes the work of the course.

"The course, although in a recently developed field in education, is answering a need in present educational activities throughout the country," stated Mr. Hosman, secretary of the Nebraska State Teachers association, who is instructor in the course.

The aim of the course, according to Mr. Hosman, is to give the members of the class a working knowledge of how to proceed with a proper publicity program in the schools in which they work.

## PAINE ADVOCATES QUICK ENROLLMENT FOR FIELD JAUNT

"There are still a few seats left in the roomy twenty-passenger bus which will carry geography students through the west," remarked Professor L. R. Paine, Monday, referring to the tour which carries with it three hours of college credit.

Registrations for the trip, which passes through Yellowstone park, Salt Lake City, and other places must be in by July 19. Professor Paine advocates it as not only a recreation but also as an education.

"It is a study of nature," he says, "and that is the best way to obtain knowledge in subjects of this type."

Tuition for the courses is \$15, registration \$1, and transportation, lodging, and meals will total approximately \$119. Any student who desires to make the trip may get in touch with Professor Paine at his office in the former museum building.

## MANY ATTEND MIXER.

The second all summer school mixer of the vacation term was held in Grant Memorial hall last Friday evening, when 400 persons were in attendance. A program of games and stunts was followed by dancing.

## GEOGRAPHERS SEE BAKING PROCESSES

Vacation Students Inspect Gooch's Mill Monday; Postoffice Next.

Geography students were given an opportunity Monday afternoon to witness the various processes used in the making of flour and the making of dough as well as the baking of bread at Gooch's mill.

One of the interesting things noted in the trip was that the process of bread making involves no hand work—all being done by machinery. Included among the modern mechanisms was a traveling oven, which is said to be the only one of its kind in this part of the country.

This was the eighth excursion to be sponsored this summer by the University of Nebraska department of geography. The ninth tour, which will be taken next Saturday morning, includes a visit to the Lincoln postoffice.

## CATALOGUES READY SEPTEMBER FIRST

Registrar's Office Works On Compilation of Publications.

University catalogs for the coming year, a student roster, and printed announcements of oral examinations of candidates for higher degrees are in various stages of compilation under the supervision of the registrar's office.

Complete catalogs, containing information about the ten colleges of the university, will be ready for distribution about Sept. 1.

Smaller catalogs, issued by the separate colleges, come off the press at various times during the spring and summer, and these form a basis of information contained in the large catalog. About 7,000 catalogs are printed.

Making architectural engineering a separate department instead of a branch of the applied mechanics and architectural engineering department constitutes the biggest change in curriculum in the new catalog. Harry F. Cunningham, who was in charge of the work on the new state capitol, will be chairman of this department.

Distributed at Counter. Catalogs are distributed at the counter in the registrar's office or mailed by request to individuals and schools. Some are sent regularly to schools on a permanent exchange list.

The official roster, a compilation of students of the 1929 summer school and the 1929-1930 school year, is in preparation. A record made at the close of the school year, it contains a list of the faculty, students' names, home addresses, year in school, and college.

Supplementary folders, containing the public announcement of oral examinations for candidates for higher degrees, are being prepared. These are sent to the graduate college faculty, examiners, and candidates.

About sixty masters' degrees are to be granted this summer. The June bulletin of examinations contains almost 100 names.

Printed folders announcing the oral examinations of five candidates for doctors' degrees this summer will soon be off the press, it was indicated.

## NEBRASKAN EDITOR CONFINED TO BED

Confined to the university infirmary because of serious throat trouble, Gene Robb, editor of the Summer Nebraskan, has been unable to attend to his duties this week. His condition, however, is improved, according to health officials, and he is expected to be back again within a few days.

During Robb's illness, editorial work on The Nebraskan has been handled by Cliff F. Sandahl, former editor of The Daily Nebraskan, and Elmer Skov, former sports editor at present associated with the Lincoln Star, and Jack Erickson, member of The Daily Nebraskan staff.

## STUDENTS MUST PAY REGISTRATION FEES BEFORE SEPTEMBER 3

Those Failing to Comply Will Be Charged Extra.

Gunderson Mentions New Plan for Quarterly Payments.

Students who were in residence at the University of Nebraska last year will pay their fees for the first semester, 1930-31, to L. E. Gunderson, finance secretary of the university, not later than Sept. 3, according to recent announcements made by him.

As in the past, a late registration fee will be assessed those who fail to pay their fees before that date. The money may be paid either in person or by mail, he said.

Statements will be mailed out Aug. 15, Mr. Gunderson indicated. Those who do not receive a statement by Aug. 20 should notify the finance secretary's office at once, as failure to receive a notification of the fees will not exempt anyone from payment of the late registration amount.

All students who registered last spring for next semester should pay their fees this summer, according to the registrar's office, regardless of any changes in curricula or otherwise that may seem imperative.

"If students in residence last year wish to change classes or make any other change in their programs, they should make their payments according to the dates

(Continued on Page 4.)

## INTENSE HEAT HITS COED IN CLASSROOM FRIDAY AFTERNOON

One heat prostration was reported on the campus last week during the reign of hot weather. Miss Florence Dailey, 1437 S street a freshman in summer school, was Friday's only heat victim in Lincoln. She collapsed in a classroom and was taken to her home. Her condition, at present, according to reports, is not serious.

## DR. BENGTSON FETES INSTRUCTORS, AIDES

Instructors and assistants of the geography department with their families, motored to the Auto club Wednesday, July 2, where they participated in a picnic supper given by Dr. Nels A. Bengtson, chairman of the department. They engaged in games of tennis and baseball during the course of the afternoon.

## BRENKE BUILDS CURVE MACHINE

The mathematics department is now constructing a Regge curve tracing machine for drawing many intricate curves, patterned after the machine originated by a Creighton university professor. The work is being done in the physics laboratory under the direction of Dr. W. C. Brenke.

## Soldier Boys Bemoan Hot Hike, Cool Rain

While the majority of the populace of this state baked in the solar fury of last Friday's sun, R. O. T. C. students were forced to stand in a drizzling rain at Plattsmouth after tramping down from Fort Crook at Omaha with a load of forty-five pounds.

According to LeRoy Jack, university student at camp, who was in Lincoln over the week end, the long hike and damp followup were anything but delightful experiences.

A field north of Plattsmouth has been prepared for the cadets who will receive instruction in target designating, rifle marksmanship, trench mortar, and machine gun shooting. They will be stationed at this spot for a week's encampment.
