

**CAMPUS PHOTO
MAN TAKES SNAPS
OF WEST SCENES**

A. F. Larrivee, photographer for the conservation and survey division of the University of Nebraska, is spending two weeks in the North Platte valley of Nebraska and Wyoming taking motion pictures and still pictures to complete such subjects as water power and irrigation.

The work is being done in cooperation with the agriculture and colonization department of the Burlington railroad.

**GIANT MAMMOTH
ALMOST CAUSES
BULGING WALLS**

Mammoth tusks and skull so huge that they could not be placed in the work room were received the first part of the week at the state museum located in Morrill hall.

A special car had to be secured for shipment from Trenton where the specimen was excavated, as it was too large to go in the door of an ordinary box car.

For the present it has been placed in elephant hall and will be displayed in one of the cases within a few days.

**LAST TWO OF FOUR
CHEMISTS COMPLETE
PH.D. EXAMINATIONS**

The last two of four students to take their doctor's examinations in organic chemistry this summer were Charles Richard Saunders and Robert Eugene Etzelmiller. They receive their Ph. D. degrees today. Saunders majored in organic chemistry and minored in mathematics and physical chemistry. His doctor's thesis was on "Isometric Nitro- and Amino-Naphthylarsonic Acids."

Dr. Saunders received his B. Sc. degree in 1923 from the Alabama Polytechnic Institute in Auburn, Ala. In 1925 he was given his Master of Science degree from the same institution and served as assistant in the department of chemistry while working for it. He served as an instructor in chemistry at LaFayette college, Easton, Pa., from 1926 to 1928 and since has been a research fellow at Northwestern and at Nebraska. He is a member of Alpha Chi Sigma, Phi Lambda Upsilon and Sigma Xi.

Dr. Etzelmiller also majored in organic chemistry and minored in mathematics and physical chemistry. His doctor's thesis was on "The Influence of the Arsono-Group on the Activity of Nuclear Halogen."

Dr. Etzelmiller is a native Nebraskan, living in Minden, Neb., during boyhood and graduating from the high school there in 1918. He received an A. B. degree from Cotner in 1923, was principal of the Bethany high school from 1923-26. Two years' work at the University of Nebraska won him his M. Sc. degree in 1928. He, like Mr. Saunders, has been a research fellow at Northwestern and Nebraska the past two years. His affiliations include Sigma Xi, Phi Lambda Upsilon, Alpha Chi Sigma, and the American Chemical society.

**COLLINS RETURNS
FROM AUTO TOUR**

Visits Son at Pelican Lake And University Fossil Party at Diggings.

F. G. Collins, assistant curator at the museum, returned to Lincoln last Saturday from an automobile trip through South Dakota and Minnesota. Accompanied by Mrs. Collins, he visited his son, O. C. Collins of the department of mathematics at his summer cabin on Pelican lake.

Before returning Mr. and Mrs. Collins toured the Black Hills, and came back to Lincoln through Chadron and Valentine where Nebraska fossil parties are digging this summer. Mr. Collins did some digging himself and was enthusiastic in his praise of the students' work.

Corn in western Nebraska Mr. Collins found badly fired and does not believe it will make more than half a crop even with rain in the next few days.

MISS GALLATLY TO LEAVE.
Miss Pauline Gallatly of the department of dramatics will leave this week end for Chicago. She expects to take a trip through Michigan before returning in the fall.
