The two movements, started inlependently by Van Vleck and Williams, came in contact and merged to become the first chapter of Sigma Xi. At the chapter's fifth meeting the chapter at Union college was formally admitted to the group and Professor Wil-liams and John Berger were ap-pointed to consider the establish-ment of another chapter at Yale. Professor Williams was made the first president of the national organization and it was he who ostered and guided the chapter

through its formative period of growth and has thus come to be regarded as one of the chief founders of the society.
