### Is It Too Late?

For the first time since we have been enrolled in this university, there has been some evidence of class spirit. At the mass meeting TO THE EDITOR : of seniors held yesterday in Social Sciences auditorium, there prevailed a spark, a beginning at least, of class spirit. . . The senior class, not a group of seniors, attended that rious mistake in saying anything about them meeting.

Well, uh, Ray, won't w be an awiul 101 of work?"

It will. Quite a bit more hard work than any student body has undertaken for years. The Innocents will have their hands full if they actually attempt a campaign, either to arouse interest, or to collect funds.

To make a success of a union building drive on this campus, the leaders will have to shake the entire student body from a lethargy and an indifference that has held them from taking any active interest in their school for decades. Habits of inaction, of doing as little as possible, have prevailed among Nebraska students for years. To break these "traditions of indifference," to arouse the students to any type of action, will take no little strategy and no little work.

A fair beginning. What will the results be? Will any further action be taken? Is any student interested enough in a union building to ask for one?

A bigger question, far more important to the university than the matter of a union building, is also involved. Whether the drive is carried through successfully or not is incidental to the main issue involved.

Nebraska students have always lacked class consciousness and school spirit. They have always been blissfully asleep. Will they ever make of this "education factory," as Ramsay humorously called it, a real university?

The first real test of the future progress of the school has come. If the student body cares enough about the university and about its own welfare to erect a union building, there is great hope for the future. If it does not stir from its age-old indifference, there is very little that is cheerful in the future of the institution. •

And why not? Was the colonel given his post because of his debating ability? No. surely not. Then let him stick to his trade, as the shoemaker sticks to his last. Let him keep as far as possible from debates.

The colonel has been declared by military students to be one of the ablest men in military matters who ever held the post he now has. But, almost by his own admission, and surely if judged by his actions, he is a poor hand at public relations.
