The Case for A Union Building.

PRO
"A center for all student activities."
"A unit for development of real student spirit."

CON
An unshakable indifference.

If students at Nebraska want a union building, they will have to ask for it. They will have to get right up and howl for it. They will have to work for it.

Wanted—One Quorum
Reward is being offered by the Student Council members for any information leading to the discovery of One Quorum, lost last evening at 5:30 o'clock.

We can't think of any more ragers about a student union building. Maybe this will do just as well. It's as clever as any of the others.

Really, folks, we cannot let this happen again. What will the faculty think? Even now they are fighting the idea of allowing the eligibility clause to remain in the final enactment of the new Student Council constitution.

One solution: Charge a Fee when the quorum departs!
Fraternity Freshmen—Fraternity freshmen are an unusual lot. They are so downtrodden. When one pauses to reflect, it seems almost a tragedy.

Another Observer.
Perhaps the university is not obliged to assist in such cases. And then, too, perhaps there are no persons who could ever assist. We sometimes wonder.

world! he had to get a passing grade in every subject to be eligible for initiation.
Now everything is rosy again. A freshman can flunk a course if he wants to, provided he gets good enough grades in his other work to make his total average for the semester seventy-two or better.

As a matter of fact, there seems to be no reason to believe that any freshman who cannot successfully carry his fourteen hours or so, the first semester, can ever carry sufficient hours to be graduated. After all, requirements are requirements, bless 'em! And if a freshman must register for them, he must pass them, whether he wants to do so or not.

At that, there is an air of distinction attached to the wearing of a cap and gown. For instance, a certain prize fighter wears one on the parade to the ringside, to demoralize his opponent or something.

MORNING MAIL

Waving the Flag, as Usual.
TO THE EDITOR:
Apparently what is humor to some people gets under the skin of other individuals.

Two Wise Moves.
TO THE EDITOR:
The Interfraternity council did two wise things at its meeting the other night. It passed a law which would permit students with a seventy-two average to be initiated regardless of failures and conditions against them.

ALREADY INITIATED.
Mismanagement.
TO THE EDITOR:
Among the various popular disparagements on the present state of our Alma-Mater-to-be, it would hardly be out of place to call attention to the discouragingly lax system of ethics peculiar to the caretakers of the different buildings.

LOOSE THREADS

By Gene McKim
The closing days of the short session of the seventy-first congress which adjourned at 12 noon, Wednesday saw several bits of important legislation either enacted or done away with.

The Muscle Shoals bill as proposed by Senator Norris of Nebraska which provided for the disposition of the gigantic power and nitrate plants by proposing federal control over the war-time properties, was vetoed by the president after it had passed both houses of congress.

Congressional action on the veterans' hospital bill, which will provide for an appropriation of \$20,877,000 for additional hospital facilities which will be administered by the director of the veterans' bureau, was completed when the house agreed to accept the above mentioned amount.

The truce arrived at between Mahatma Gandhi and Lord Irwin, representing the British crown, ended the civil disobedience movement which had lasted for almost a year, and had caused untold suffering among the 320,000,000 natives of the Indian sub-continent.

hardly enough, we say, despite the day and age.

Baseball will soon be back. But we must remember that it isn't the only spring sport that's played with the aid of a diamond.

Quibble as they may over military science, many a young cadet will look back in the year to come and dream on the "platonic" friendships he may have formed.

In Chicago, a gang sent a beautiful blonde woman to inform a rival club that they were out to kill. Nothing like a "fair" warning.

We hear a great deal about the Wickersham commission. Truly, we think the whole committee is a sham, and its efforts are getting wicker and wicker. Terrible!

A great logician carries his theories to the extreme. He actually keeps several ferocious dogs to guard his "premises."

All Austin owners are advised to take corners cautiously. This avoids the possibility of scraping one's shins on the curbing.

We thought Sandy might give us a bite of his apple—but he was Scotch to the core.

"Shoot if you must, this old gray head, But I'll be darned if I'll dye," she said.

"California Students Labor for Diplomas"—so reads a head-line in the Rag. I suppose here at Nebraska it's just a matter of stepping up and taking it off the silver platter.

"Why not try our medium as an agent to help you?" rants The Daily Nebraskan. If we must revert to such help we prefer to call on some such spirit as Houdini, or Lodge.

We would like to extend a greeting and a best wish to Brother Conklin, but Shucks, what's the use.

COLGATE PRESIDENT CRITICIZES IDLERS

Cutten Says Students Look For Vacation and Betterment.

COLGATE UNIVERSITY—The most puzzling enigma of present day education in the opinion of Dr. George B. Cutten, president of Colgate university, is that four years of college are consid-

ered to be a vacation which is interrupted as seldom as possible by serious studies, and at the same time the greatest opportunity for self-betterment which society has to offer.

Doesn't Get Education.
"The modern student is not so anxious to get his money's worth out of his instructors and his college," Doctor Cutten affirmed.

Declarator that the value of an A. B. degree is that it serves as a letter of recommendation, Doctor Cutten stated that it does not

guarantee success. A graduate, according to Doctor Cutten, is often criticized after a year or so of trial in business, because of "lack of intellectual funds," which means, as it does in the case of checks, that he has no credit in spite of his degrees and potential power.

Four Years Wasted.
"It signifies that his four years at college were idled away and his chief concern was to evade the work that was assigned to him."

Most of the unemployment today, in the opinion of Doctor Cutten, has been caused by the encroachment of the machine on the work that the hand laborer used to do. "Education in this machine age is a valuable asset and the only place that men are not exposed to mechanical competition is in the field of mental labor," the president stated.
