

SOCIETY

Concluding the spring party season, Sigma Nu will entertain 300 couples at an elaborate party Saturday evening. A northern winter scene, typically Alaskan, will feature the motif of the decorations. Around the walls will be large igloos alternating with walrus silhouettes. The balcony will be converted into the likeness of a snowdrift.

Confetti, representing snow, which will be sifted through a screen, icicles, a huge snow ball hanging from the ceiling, all will give an attractive effect. Leo Beck will furnish the music for the affair. Arch McMillan, Ralph Bigger, John Trout, Edwin Cassem and Al Walling of the Omaha Medical school will be guests.

Lawn Party To Be Given By Chi Omega.

The Chi Omegas will entertain sixty couples at a lawn party Saturday evening. Colored lights and lilacs will be used for decorations, and an improvised fountain will occupy the center of the lawn. Norman Hoff's orchestra will provide the music for the affair.

D. U.'s To Sponsor Fifth Parents' Day.

The fifth annual parents day to be sponsored by Delta Upsilon will be observed at the chapter house with a dinner for the out of town parents Sunday noon. At 3 o'clock there will be a program by the active chapter to which all parents are invited. The chapter house is now temporarily situated at 1521 South Twentieth.

Sigma Nu Mothers To Entertain Actives.

The Lincoln Mothers club of Sigma Nu will entertain the active chapter at a 12 o'clock breakfast Saturday at the Shrine Country club. The tables will be decorated with spring flowers. Mrs. Max Anderson will entertain with several vocal solos.

K. D.'s Are Hostess At Annual Picnic.

Kappa Delta was hostess at a picnic for the active chapter and alumnae on the Ag college campus Saturday evening. More than seventy attended the affair which is given annually during the Farmer's fair.

Chi Omegas To Have Parents Day Dinner.

Chi Omega will entertain one hundred guests at the chapter house Sunday. The color scheme will be carried out in black and silver, and orange colored flowers. After the dinner a program will be given by the girls for the guests.

Sigma Alpha Mu Initiates Six Members.

Sigma Omicron of Sigma Alpha Mu initiated six members into the chapter over the week end. The initiates are: Henry G. Chalk, Omaha; Phil Goldstone, Sioux City; Louis M. Dobrosky, Omaha; Milton Moskowitz, Omaha; Jules A. Mosow, Sioux City and Emanuel Wisnow, Lincoln. The ceremony was climaxed by a banquet at the Cornhusker hotel. Many alumni members from various parts of Nebraska and Iowa were present.

Black And Silver Are Used At P. E. Banquet.

The Physical Education club gave its third annual banquet Friday evening at 6:30 at the Shrine Country club, honoring the senior members. Places were arranged for sixty-six guests. A modernistic theme in black and silver was employed in the decorations. Sweet peas, roses and smilax were used on the tables which were arranged in the form of a U. A large modernistic balloon tree containing favors was a feature of the dinner.

Miss Wilma Haines, physical education instructor at Stephens college at Columbia, Mo., spoke on her experiences in Roumania where she started the physical education movement. Virginia Woodfolk, president of the club, acted as toastmistress. Speakers

Margaret Munn, Omaha; Madge and Helen McMonies, Lyons, were guests this week end at the Alpha Phi house.

Movie Revues

STUART—"THE TAILOR MADE MAN."

By R. A. C.

Some say that clothes do not make the man but in the case of William Haines "The Tailor Made Man" the results were to his credit. From a pants presser by day he promoted himself to the manager of a large department store, merely by the use of a "tux" and a successful line that sold himself.

Haines was again in true form. The picture was cleverly portrayed but an absolute impossibility. The plot opens with Haines holding down the capacity of a pants presser in a small tailor shop. His ambitions were to crash through the portals of gilded society and mount the ladder of fame. His line of conceit given with his cocky attitude was as tiresome as impossible.

After putting one of the biggest clothing stores in existence on the map without the aid of the board of directors and the owner he marries the gal from the east side who held the pants while he pressed them. The lovers live happily ever after as they always do in our cheapest sort of movie attributes. The stage attractions this week would certainly not attract much. Perhaps a few vegetables or a front row of newspapers would sort of wake up the management to the fact that the vaudeville is even more terrible than it formerly pretended to be. They used to have a full orchestra to accompany or rather cover up the rotten stage show but now they have cut the band for the afternoon performance. This financial depression surely seems to be in perfect working order.

LINCOLN—"INDISCREET."

By I. R.

"You're not so wicked," Gloria Swanson tells the weak chin, mustached villain, in her latest picture, "Indiscreet." "You're just not very bright." Well, the same thing applies to this high society tragi-comedy. In spite of that alluring title, it's not so very wicked—and not so very bright.

The plot is old and hackneyed. Miss Swanson is Jerry Trent, that sweet, innocent girl from Oklahoma, whose well hidden past contains an indiscretion which, you must understand, was not her fault. She moves to New York to live with her aunt and her young sister who has just come from the sheltered walls of a French convent. But alas, slack Jerry finds that on the boat coming over, her beloved young sister has become engaged to that same cad who had darkened Jerry's past.

In conventional, melodramatic style she sets out to save the sister. Heroically she compromises herself, and very nearly loses her own true lover. But she does save the sister.

In spite of the heroics, the picture is worth seeing for the clowning it. Jerry, faking insanity, and her Aunt Kate from Oklahoma, who knew Buffalo Bill, are really funny. So if you want to laugh out loud at some first rate clowning, see the picture, but if you want anything more risqué than the an 1870 melodrama, stay away from "Indiscreet."

WALTER S. GIFFORD BELIEVES SCHOLARS ARE VALUABLE TO BUSINESS

(Continued from Page 1.)
his brains and that the habit and ability to use his brains will make him valuable and successful in whatever he tries to do. They believe that the process of education is a continuous interrelated process beginning early in school and ending late in life. They have figures to prove that the boy who does well in the schools will likewise succeed in later life.

Mr. Gifford continues to emphasize his claim by pointing to the fact that a very high percentage of the Phi Beta Kappa society membership are mentioned in Who's Who and various statistical studies which show that men who rank high in college are apt to rank high in the law and medical schools, and those who ranked low are correspondingly likely to fall below the average in the professional institutions.

Studies Relationship.
"In studying the relationship between success in scholarship and in business it is necessary to study

KOTAB HOLDS DOWN CENTER FIELD FOR HUSKERS

Ed Kotab, known as the slugging dentist from Cedar Rapids, is one of Coach Browne's outfield candidates who has been assigned the cleanup position in the opening games of the Husker schedule. Kotab is a senior and is one of the few holdovers from Choppy Rhodes' 1930 club.

the results of good and poor scholars in the same line of work," continued Mr. Gifford. For instance, if scholarship were an exact measure of business ability it would not mean that a fine scholar who had entered the cotton mill business recently would have made as much money as if he had been in the automobile business. He might have been as great a success, however. He might achieve what he set out to do equally well. At certain times some businesses make more money than others and as Mr. Julius Rosenwald has said, luck has a great deal to do with the making of money.

"By organization, by the power to use nature which science has provided, industry has shortened the hours and eased the burden of making a living. Perhaps a mind trained to scholarship in youth may more easily find success and happiness in the leisure thus gained than one untrained.

"If studies by others corroborate the results of this study in the Bell system and it becomes clear that the mind well trained in youth has the best chance to succeed in any business it may choose, then scholarship as a measure of mental equipment is of importance both to business and to business men."

LAWLOR REPORTS INTERESTS IN KAR CLASSIC EVENTS

(Continued from Page 1.)
car built before 1927 and either men or women can compete in this contest. Another interesting race will be the tire changing race which is open to all model T Fords with demountable rims. It is over a mile and a half course and two tires must be changed during the race. This is also open to men and women and each car must be occupied by two people.

The 230 yard dash which will be run in two heats is to be open for men and women. It will be limited to the first eight entries. At least eight people must be in each car in the big transport race which is limited to touring cars of any make. The cars are to race over a three-quarter mile distance and is also open to both men and women.

Schedule Backward Event
One of the feature races of the afternoon will be the backward race for a half a lap. It is open to all makes and models and either men or women are eligible to compete. In the last, drop race each car will be given one quart of gasoline and the one that goes the farthest on the quart will be the winner. The race is open to all models and men and women may also compete in this.

Ladies Have Special Race
The ladies will get a chance to shine in the special relay race for women only. The contest will be over a one mile course with three girls to a car. Drivers will be changed three times and the car must come to a standstill and the engine be killed each time. The race is for all models but is limited to the first two teams to enter.

Prizes will be given for first and second place in all races and will be either in money or merchandise, the winner having the privilege of choice. The races will start promptly at 2 o'clock and all contestants are urged to be at the fair grounds at that time.

QUESTIONNAIRE ASKS MOTIVE FOR TRAVEL

Americans Indicate Desire For Education in Their European Visit.

KELLER HEADS INQUIRY

The first 2,000 replies received from a questionnaire addressed to 4,300 American tourists from every walk of life, who, in a period of three months last year traveled in Europe and spent a total of \$2,650,000, reveal that European travel is undertaken chiefly for educational purposes. The findings have been compiled by Dr. Ernest Gray Keller, originator of student tours and general manager of the Students Travel club, who, in the past five years, has supervised the European wanderings of more than 14,000 Americans.

"Ideas as to why Americans go abroad are varied and cover a wide range," declared Dr. Keller. "With the exception, perhaps, of the British, Americans are considered the greatest travelers on earth. They have gained the reputation of being superficial travelers and of being indifferent when it comes to appreciation of cultural values. I determined to put these various views to the test and to discover if possible the prime motives of, and the chief values derived from, a European trip. I have examined and analyzed 2,000 of the first returns received. Twenty-nine percent of the travelers were younger than twenty-five years of age and 48 percent were below thirty.

Ask Motives.
"To the question: 'What were the chief motives that prompted you to go to Europe?' 38.15 percent reported educational interests in various fields. Other replies, in order, included the Passion play, pleasure, love of travel, recreation and health, to fulfill a desire, for adventure, curiosity, and the sea voyage. The numbers of varied individual motives classed under 'all other motives' are not sufficient to warrant enumeration but some of them were: to visit the land of

friendships made as the greatest positive value derived from the trip.
"More than 25 percent of the replies indicated that the travelers received what they anticipated; 67.7 percent received more than they expected, and 5 percent, less than they anticipated. In support of the idea that European travel is a good investment, Dr. Keller quotes a high school teacher from Oklahoma, who wrote the following on the reverse side of the questionnaire:
"Two banks in our community failed last week and some of my friends lost their savings. Last summer I invested my savings in a trip to Europe. No financial crisis ever can deprive me of the memories of that pleasant and educational experience. Dividends come to me almost daily in enriched conversation and a better understanding of much that I read and study. My savings are safe, regardless of banks."

PENNSYLVANIA PICKS NAME FOR IVY WEEK

Judges Choose 'Ivy Fiesta' Title for Traditional May Festival.

After considering nearly 200 suggestions in the contest to determine a new name for the Ivy Week-End, the judges recently decided upon Ivy Fiesta as the name most suited for the purpose. The winning name was submitted by Howard Tower, 31 W. W., and he will be awarded a free ticket to the Ivy ball to be held on May 15.

The judges for the contest were W. Chittin Wetherill, director of student welfare; Prof. William Harbeson, of the English department, and Prof. H. W. Hess, of the merchandising department. The thirteen most suitable names were selected by the contest committee, headed by Charles M. Kreckel, and then submitted to the judges.

All of the judges expressed themselves as being immensely pleased with the character of the

contest ideas and were forced to deliberate an unusually long time before the final decision was made. Ivy Fiesta received the unanimous selection of all three judges.
Several names embodying the idea of a carnival or festival were submitted but were finally discarded in favor of Ivy Fiesta because of its novelty. Fiesta is a Spanish word meaning a holiday and celebration.

KANSAS RELAY MARKS BEAT PENN AND DRAKE

K. U. Meet Records Win 7 Firsts Out of 15 Events.

LAWRENCE, Kas.—May... according to a comparative table showing the results of the events of the Kansas, Penn and Drake relays, the records obtained in the Kansas relays were better than those obtained in the other two relay carnivals in seven of the fifteen events. The results show that for the best records of the three, Kansas relays would win seven firsts and tie for one; Drake relays would win four firsts and tie for one; and the Penn relays would win one first and tie in three other events. The complete comparative table shows:

	Kansas Relays	Penn Relays	Drake Relays
Distance medley	18:40.7	19:25.4	20:21.6
400 yd. relay	41.1"	42.4	43.1
800 yd. relay	1:26.8	1:28.3	1:29.1
1 mile relay	3:20.0"	3:18"	3:18.1"
Two mile relay	7:52.5	7:52.2"	7:52.2"
Four mile relay	17:37.8"	18:02.4	17:44.2
120 yd. hurdles	14.6"	14.7	14.7
100 yd. dash	20.5"	20.5"	20.5"
Broad jump	35' 4 1/2"	35' 11"	35' 10 1/2"
High jump	4' 9 1/2"	4' 9 1/2"	4' 9 1/2"
Pole vault	31' 4 1/2"	31'	31' 8 1/2"

Making It Work and Making It Sell

Time was when you could sell Mr. John Q. Public a radio or an automobile merely by showing him that it worked. Today he takes that for granted. Now he must be shown that it works better, looks better, is easier to operate than any past or present model.

Today the all-important element in an article is sales-appeal. And the all-important member of the manufacturer's staff is the man who designs this sales-appeal into the product—the product engineer. He is the man who gave you free-wheeling in your automobile, who made it possible for textile mills to use one machine in place of several and countless other product improvements.

Product engineering is still in its infancy. But like most infants, it's growing fast. Already there are product engineers guiding the destinies of most all our important plants. And they're all facing similar problems in their work.

Ever alert to new trends in engineering, McGraw-Hill was quick to sense this group's need for a common meeting ground. This it provided in the form of a new magazine—*Product Engineering*. Ask your librarian for a copy. You'll find its pages interesting, no matter what field of engineering you intend to enter. Most college libraries have McGraw-Hill publications on file.
