## Atheism.

"Do Universities Teach Atheism?" is the subject of a discussion in a recent issue of the Canadian Home Journal by Sir Robert Falconer, the president of the University of Toronto.

Altho students are of the opinion that knowledge of scientific and philosophic subjects does not lead to atheism, universities have been accused of such an influence on various occasions.

Much discussion was started on the University of Toronto campus toward the last of February when the student newspaper was suspended by the student administrative council following an editorial discussion on atheism which declared that the majority of students are practically atheists. The matter was brought before the provincial parliament but referred to the board of governors who passed a resolution declaring the editorial untrue.

The opinion of Sir Falconer is significant as he is a leading educator in Canada. He states: "Movements of thought are strange currents. The university strives to understand them, and it also strives by its teaching to prevent its students from being carried away in a movement in a hysterical abandonment which will surely lead to tragedy. . . . I can think of no more shattering experience for a young mind than to go out into the rush of business life without some realization of the forces of thought and action which will drive him this way and that. . . . They (the teachers) challenge thought, and religious and economic faith, which must be strong enough to stand a little shaking." And it is his opinion indirectly stated, that the faith of the majority of students is strong enough to stand a little shaking. Such an investigation should give the individual a greater appreciation of the philosophy of life which he has adopted—and greater consideration for the opinions of others—rather than the hastily improvised atheistic poise which critics conjure.

## WHAT THEY SAY

### Coolidge Takes a Vacation.

Columnist Calvin Coolidge—and his readers—will get a well earned rest this summer as the former president acts on his suggestion that the best brains of the country should take a vacation.

Perhaps it was in error to call the laconic Vermonter a columnist. Certainly he has little more in common with Will Rogers (or Arthur Brisbane) because of writing for newspapers than Will had because of his campaign in the pages of Life for the presidency in 1928.

Coolidge is going to write a column some day on the advantages of being obvious, he confided to Bruce Barton. It would be highly appropriate.

"Silent Cal" is entirely correct in the advantages of being obvious. Some of his contemporaries in writing could take lessons from him in that respect. The first essential is to have an idea, the second to express it so that nearly anyone who is apt to read what you write can understand it without undue exertion. Without this clearness of style the best of ideas are condemned to gather dust on book shelves.

The idea must be one that will not occur to the average person, but will seem reasonable to him when simply explained. Such ideas Coolidge has. With his lucidity of expression they constitute his sole claim to the attention of readers.

But if it were not for his name—and possibly the supply and demand value which their rarity brings to Coolidge words—the dour Yankee would have no market for his writings, even if he is so understandable, so near the common level.

Will Rogers is understandable too, and near the common level.
