A Problem In Economics.

One of the most peculiar of sciences, writers elaim, is the science of economics. It is peculiar because nothing can be proved by it : nothing can be positively stated; nothing can be set forth as an exact fact. There must always be a series of given circumstances, and even then the laws of economies do not hold.

Students of economics are aware of this, yet they constantly try to prove situations with their knowledge and their laws. It is pathetic because it so happens that in most of those situations exactly similar theorems can be set up and proved by contrasting laws, or opposite propositions can be proved equally as well by parallel laws. This is witnessed in the fact that one great economist can issue a statement showing how the present embarrassing financial depression will be relieved because the laws of economics are so set, and still another great economist can issue other statements based on those same laws and showing how the current situation will not be relieved. It is witnessed, further, in the fact that some economists can prove that price fixing will aid prosperity, while others can show just as strenbook under his arm. The best thing that can floor. he proved is that the economic foundation of this country certainly is on a flimsy stand if the props can be toppled as easily as they have been in the past two years.

It is a dilemma! Something for students to think about!

In recent days the editor has gone into conference on four occasions to discuss The Daily Nebraskan's policy of retrenchment in the college student's budget. Faculty men, students, rupted by unnecessary noise. These students and outsiders were represented in these contalk improvement, to spend money. When he can be acquired in their own text books, mentioned spending, of course, he meant conservative spending: spending that will bring that the university should be able to spend a featured servative spending; spending that will disting it few dollars for the sake of having it quiet in the trip. However, there were no to the Awgwan office in Univer-'constant spending, also.

Waiting for That

Letter Which Never Comes.

One of the most difficult phases of leaving social event of the year for the sororities. home to come to school is the loss of conttact with old friends and especially with home. To Give Luncheon Our lives are so closely bound up with the folks at home that it is more difficult than can be imagined to leave and go away. And those who leave do not suffer the hardest part of

Those people at home whom we miss the most are the very ones who are making it possible for us to be at school and who are attempting to get used to our being gone. They nation of Boyd Von Seggern who want to hear from us. We do much here that is interesting to them and they are proud of spring any achievement which may come as a result of our efforts. They are concerned with our troubles and happy with our little jokes.

There is nothing quite so disconcerting as to have the mail man say, "nothing today. There is nothing quite so hard to understand and Lila Wagner of Bellewood as the failure of a loved one to write. Writing spent the week end at the Kappa is such an easy task and a letter it so much appreciated. Every one of us should make the little effort that it requires and write home | ye

"Nothing important to write about," we often say, but that is such a climsy excuse when we know that our every action, everything that concerns us is of interest to the people who are waiting back home.

There is an old adage which says, "absence makes the heart grow fonder." But there is nothing quite so heart rending as waiting for Omaha, were guests at the Delta been so successful in past years in time for polishing and dressing up a letter which does not come. So get out your pen and write home today and do it often.

MORNING MAIL

A Little Quiet. Please.

TO THE EDITOR:

The university, of course, needs many improvements, which on account of "Old Man Depression" it is to be deprived of, yet there is one building on the campus which deserves to have a few of the dollars given out to the nously with similar laws that it will not work. university by the legislature in order that it One can prove anything with an economics may have a new carpet to cover its hard worn
