House Dances Figure Prominently In Plans of Various Greek Groups

Friday and Saturday Nights Will Find Many Sororities And Fraternities Entertaining at Parties Planned by Pledges and Actives.

Many sorority and fraternity houses on the campus will be the scenes of informal parties this next week end. For Friday night are scheduled a bowery dance at the Sigma Alpha Epsilon largest group of students to take house, an Alpha Gamma Rho party at the house, and a Phi care of, files his examination results and uses them only occasionally when he feels that the results at the Kappa Delta and Alpha Delta Pi houses given by the

pledges of the respective sorori-oties, a dance at the Sigma Nu house, and another at the residence of Sigma Alpha Mu.

Sigma Nu Party Will

Feature Panhel Idea. Different sororities will be represented in the decorations which the Sigma Nu's are planning for their house dance Saturday night, using the Pan-hellenic motif. Music for the party will be furnished by William Higdon and his or-chestra. About sixty couples are expected to attend the affair.

House Dance Planned By the Phi Omega Pi's.

Members of Phi Omega Pi will entertain at a party at the chap-ter house Friday evening. Prof. and Mrs. Earl H. Bell will be the chaperones. The house will be decorated in accordance with the. Washington theme. Music for the dancing will be furnished by Eddie Vandenburg and his orchestra.

Pledges of Kappa Delta Plan Dance at the House.

About fifty couples are expected to attend the house dance which the pledges of Kappa Delta are giving for the members of the active chapter Saturday evening. The pledge pin, a shield, will fig-ure prominently in the decorations. Mr. and Mrs. Thomas Dickey and Mrs. Anna Marsh, housemother, will be the chaperones.

Sigma Alpha Mu's to Entertain at House.

The Lincoln syncopators will furnish the music for the party which the members of Sigma Alpha Mu are planning for Saturday night. About forty couples are expected to attend the dance, which will be chaperoned by Dr. and Mrs. Ginsburg and Rabbi Jolt.

Pharmaceutical Club Will Meet Wednesday.

The University Pharmaceutical speaker of the evening will be E. T. Sickle, local wholesale druggist. Discussion on Pharmacy Week will be led by Charles C. Bryant, president of the club. A short business meeting will be held at the beginning of the evening and a new secretary will be elected.

The reading part of the test discrete the speaker of the evening and a grammar test and the third a test in reading. FRESHMAN ADVISORS EXPLAIN USES OF PHYSIOLOGICAL TESTS

(Continued from Page 1.) the tests indicate and just exactly how the tests are used at Nebraska are matters which all three of the advisors were decidedly careful in explaining. All of them stated particularly that the examinations are not considered infallible indications of intelligence nor are they given for the purpose of determining which field of work a student should be advised to enter.

Professor Jenness, who has the sults and uses them only occasion-ally when he feels that the results on the examination may serve to throw some light on the nature of a student's trouble with his school work. Students who have difficulty with their work and whose test scores indicate they are slower than other students, according to Mr. Jenness, are often advised to

carry a lighter load of hours. When we can refer to the psy chological tests, we are able to get something of an idea of how much work the student is able to do," he

Both the American counciler examination, and the Ohio State university test, presuppose a considerable degree of educational training in contrast to some of the other psychological tests such as the army Alpha tests which are designed to measure intelligence of people who have had little or no education. When it is possible to give a test requiring previous educational training, more accurate results can be obtained, in Professor Jenness' opinion because those taking the test are not such a heterogeneous group and the test can cover a more limited range.

Speed, Accuracy Count.

Both tests used are designed to measure speed and accuracy in the performance of relatively simple operations. This kind of a test gives a good indication of what a student's possibilities are in his school work. It is because these tests only measure this type of ability, Mr. Jenness indicated, that is considerable prejudice there against their use.

"The test does not pretend to show whether a person will get along well or badly in life," declared Mr. Jenness. "No matter how high a score a person may make indicating as it does a real degree of ability, the result does not show whether the person has other essential qualities to make successful or unsuccessful. That is why we make no attempt to use the tests as absolute indica-tions of worth."

Nevertheless the tests are put to really constructive use in cases of individuals who have occasion to consult the various freshmen advisors. In the Teachers' college and the Engineering college, freshmen classes are comparatively small, and the freshmen advisors come in close contact with the individual students and have an opportunity to use the tests to a greater ex-

The Ohio tests used in these two club will hold a meeting Wednesday evening following dinner at the Annex Cafe at 6:30. The parts, the first a vocabulary test, the first a vocabulary test and the colleges are composed of three the second a grammar test and the

The reading part of the test discovers the ability of the individual to read quickly and comprehend what he has read. This ability to comprehend is generally recog-nized as one fairly good indication of intelligence, according to Mr.

Reading Test Used.

In the Teachers' college results of the reading section of the test are used extensively. Professor Corey teaches a course in the correction of reading deficiencies. Those freshmen who make a low score in the reading test are given the opportunity to take another specialized test in reading ability. If they again show up poorly in this test they may be advised to register for the course to correct reading habits.

The ability to read rapidly and comprehensively is one of the most essential attributes of a good student, in Mr. Corey's opinion, and his course is designed to develop this ability to the fullest extent. A number of students each semester, who have not taken the psychological test or who have received fairly good scores in the test register for the course in order to im-prove their ability to read.

The course, which is purely elective, uses a manual which provides a number of exercises designed to improve the eye movements of the reader. The proper movements of the eyes on a printed page is the basis for rapid and comprehensive reading. Further exercises are pro-vided as the student's ability progresses gradually.

'We get a number of students,' declared Professor Colbert in describing the practical use of the results of the tests in the Engineering college, "whose test results are not consistent with the work they are doing in the college. The psychological test results provide us with information so that we are not working quite so blindly in giving advice to these

Find Different Causes.

Dr. Colbert cited the example of the student with a high test score whose work is poor. With the information provided by the test score, Mr. Colbert has a place from which to start in his effort to discover where the discrepancy is. Sometimes it is found by questioning that the student is doing full time work aside from the school work, that he is engaged in a num-ber of other activities which take all his time, that he is having some difficulty which is worrying him, or that he is absolutely uninterested in the work. Occasionally, too, he said, students are discovered who are just plain sluffers.

When a student has a high test

score and is doing poor work," he continued, "we have a basis for

ATTACKED BY AUTHOR

Book by Leahy Deals Blow to Profession Taught

in Universities.

Journalism, the profession pro-ducing newspapermen in the class-room rather than in the city room, received an attack from the fourth estate in the latest issue of "Newspaper Adventure Stories" by John Howard Leahy.

The author, who claims editorship of a newspaper and gradua-tion from a journalism school, contends that these schools should be abolished on the grounds that they fail to offer either practical instruction or a cultural background. He complains that colleges pride themselves on large enrollments, disregarding the likelihood

of employment after graduation.
"Schools of journalism live, breed, and multiply for very simple reasons," Mr. Leahy writes.
"With the higher education debauched as it is by courses in millinery, fire insurance salesmanship, embalming, and fly-casting, why should there not be room for nournalism '

"Will the lamentations about the nred for contraception in these in-stitutes for journalists keep out the little boys who want to be foreign correspondents, moulders of minds. Winchells, and Brouns; will they keep out the little girls who thrill to the legends of the fascination of the city room, who, eman-cipated, don't want to be schoolmarms, stenographers, or incubators?

"Indeed not. The veriest numbskull who fills a bench in the classic halls knows that there may be room for him is this over-crowded occupation, for have not other numbskulls made their mark in it? Do not the present practitioners leave the work in droves to seek greener pastures, and thus make room for undiscouraged pirants?"

"Pedogogical dust" is the term Mr. Leahy applies to journalism textbooks, quoting from "Newspaper Writing and Editing" by Dr. G. Bleyer as follows:
"A special feature article may

be defined as a more or less de-

be defined as a more or less de-tailed presentation of some inter-esting subject in popular form adapted to rapid reading."

According to Mr. Leahy, "Not all the published work of the pro-fessors rises to these absurd heights. Most of it is merely dull, flat, uninspired, contrasting strangely with the spirit of the thing they write about. Occasional-ly they are plainly childish."

Professor Koch Talks at Hastings Meeting

Dr. H. C. Koch, professor of secondary education was guest speak-er at the annual professional meet-ing of the Hastings city teachers in Hastings Wednesday evening. Dr. Koch's subject was "Times and the Teachers.'

Dr. Koch has recently been noti-fied by the American School Board Journal that his article, "The High School Principal in the Role of Supervisor," will be included in the contents of that publication's
