But, could that be possible? receiving a Cornhusker, The Daily Nebraskan, the Awgwan, and all publications, he would be able to attend all dramatic productions, and would be allowed to attend all athletic contests. There are few students who would not like to have these privileges if they were placed within the reach of all. As it stands under the present situation, there is no way of getting these things except by negotiation with each separate activity at a necessarily higher cost.

of the teams represent the winners of district meets. They are the class of the state's athletic crop.

Most of these boys are looking forward to a college career after their high school stay is over. They are planning for the future. Many of them will come to the University of Nebraska. It is up to the students here now to show theose high school athletes the fine side of college life and a demonstration of fair play at the games will do more to convince those youths of the fineness of university life than anything else the students could do.

The tournament this year is to be smaller than the ones of the olden days as it represents only the winners of the district meets held earlier in the season. Then, too, Lincoln and Omaha teams are not entered. The winning specific legislation, he suggested, teams in the two classes, however, have reason to be proud of their achievement, for winning a title of this nature means winning most of the games during the season and then winning every possible argument. "The roads are unusually good," the speaker explained, "because they are covered by volcanic ash. Sometimes a huge piece of this ash rolls down on the railroad track which runs through Guatemala, impeding the progress of the train. Instead of pushing it off to one side, the engineer insists on attaching it to the train by a piece of rope and backing the train up sometimes for a distance of one or two miles, until the ash is disintegrated by the friction."

Little

Oddities.

Political machinations are to be condemned. Even the suspicion of underhand work sends itself readily as a weapon to be used against an organization. This morning Disgusted reveals an attitude which The Nebraskan assumes to be widespread. The writer declares that in more than one of the recent campus elections there have been "peculiarities." She declares the practices to be exerting a bad influence upon the girls who come in contact with them. There is no doubt of this and there is no doubt either that such practices will reflect on the organizations.

There seems to be something a little more sinister behind these moves than just a desire for power. What that motive is, The Nebraskan is not prepared to say. The situation should be cleared up, however, or at any rate an investigation should be conducted. The elections should be, as suggested by Disgusted, supervised by some responsible party to see that all is open and above board.

There may have been nothing at all wrong in these elections, and we may be acting upon purely circumstantial evidence. The fact still remains, however, that even the suspicion of unfair tacties will cast a blight upon an organization so suspected. Campus offices are relatively unimportant. The methods, tactics, and practices are important, for they serve as a background for the future.
