SUNDAY, NOVEMBER 19, 1933.

Powerful for B Team To Challenge.

Mixing an effective passing attack with an even more potent round game, Coach Ed Weir's Freahmen treated the Husker B team to a 20 to 0 licking Friday stemoon in the stadium. With 1500 fans looking on Lloyd Cardrell, Sam Francis, Albert Hopp, Johnny Howell and Ron Douglas, nt on an exhibition of backfield work seldom equalled by a yearing set of backs at Nebraska.

Cardwell especially put on a azing performance with his 195 ounds of bulk, and unusual speed oles, While the first string Frosh inc-up was in there making life miserable for the Nubbins, the forplays which consistently gained ground around the ends, thru the ins, and via the aerial route.

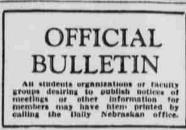

Deception in Attack. The passing arms of Sam Franis and Johnny Howell, and ballcarrying ability of each, added plenty of deception to the yearling ttack, Francis sends bullet passes while running at top speed to the eft and Howell can do the same while tearing to the right. Many of the passes found the arms of receivers, but often the receivers sere on the other team, several may being intercepted during the ust half.

One touchdown was scored in the first period. Howell cracking the middle of the line for the socre, Cardwell gaining 15, 16, and 5 varis in three successive plays to place the ball in scoring position on the 1-yard line In the same canto Cardwell snagged a Francis pass, dashed thru the secondary, and raced 48 yards before being arced out of bounds on the B 12ard line.

Cardwell Intercepts Pass.

In the second quarter the B cam tried a pass, only to have it stercepted by the wary Seward athlete, who sprinted 54 yards before being downed on the Nubbin's 27-yard line, Francis came thru

sard gain and a touchdown. The kore was 20 to 0, McDorald tally-ing the extra point on a pass from Francis. "Sigh No More Ladies," Massenet, "Il est doux, Il est bon" Francis

sonally agrees with the so-called When this question was put to scoffers, there are many well in-E. F. Schramm, professor of geol-ogy at the University of Nebras-ka, he promptly replied, "No." Hs further states that this question Said he, "If there were such an has been a controversial one for instrument the NRA officials centuries, and refers the reader to would have it subsidized and be working it over time, regardless of their six hour day schedules. Just letins, and monographs published the other day three men came to on the subject of "divining rods" my office bearing tales of hidden treasure. One of them said 'Wc know that it's on our farm, we know they hid it there, but we don't know how to find the exact place, and wecan't dig up the whole field." ject written by as many different authors

Magnetic Needle Valuable.

The magnetic needle used for work on the locating iron ores must not be confused with the instruments so part frequently used by "doodle bug' artists as modern divinators are sometimes called. Such instruments as the seismograph, magon their netometer and torsion balance in the hands of a competent geophysicist can be used with considerable success in locating buried structures favorable for the accumulation of oil. Some writers on the subject of divining rods are convinced that the success of the dowser is due to something more one o fthe hunters, "who can find than ordinary chance or luck. They water or gold. He just uses a believe that the rod, stick, penduwere and the Panlum or instrument, twists without any intention or voluntary deception on the part of the dowser and ascribe the phenomenon to "motor with automatism" whatever that may

be Some Swindlers, Some Not.

. e United States geological survey in a bulletin entitled The Divining Rod" states, "It is by no means true that all persons using

a forked twig or some other device for locating water or other mineral are intentional deceivers. Some of them are doubtless men of good character and benevolent intentions. However, as anything that can be deeply veiled in mystery affords a good opportunity for swindlers, there can be no reasonable doubt that many of the large group of professional finders of water, oil, or other minerals who take pay for their "services" or for divining rods, he was besieged the sale of their "instruments' with letters from honest, sensible are deliberately defrauding the people who were quite willing to people and that the total amount swear they had seen the sticks di- of money they obtain is large.
