## GILKEY LECTURES BEFORE STUDENTS AT CONVOCATION

Declares Religion Can Only  
Be Thought of in Terms  
Of Symbols.

### SPEAKER CHAPEL DEAN

Compares Faith With Feeling  
Students Have for Their  
Alma Mater.

Asking if there might be some way into religion that the student could find for himself, Dr. Charles W. Gilkey, dean of the Rockefeller chapel at the University of Chicago, spoke before a student convocation at the University Temple theatre this morning. Finding that students had difficulty with the traditional entrance, Dr. Gilkey sought to make a comparison between the little known student entrance to the Chicago school chapel and a possible entrance that the student might find to religion. He compared the spirit of faith and devotion with which the student regards his alma mater with the feeling of faith and trust in religion. "Religion," he said, "like one's alma mater, can only be thought of in terms of symbols, none of which are completely adequate."

**Outsiders Can't Understand.**  
The outsiders do not understand feelings which old grads have for a school, any more than outsiders understand religion, Dr. Gilkey said. These persons outside see the campus buildings which are the outer garments of the school, or the dollar signs and statistics which are the outer garments of life and religion, he pointed out. "One will say that the team, or the cheering section, or a class singing college songs is the real university," said the speaker. "But the alma mater is not to be understood by one class alone, but by

## Impounding of Nation's Gold by Treasury Cause for Little Alarm Or Price Change, Arndt Declares

No excitement should prevail because the government treasury has impounded the gold of the nation, believes Karl M. Arndt, associate professor of economics at the University of Nebraska, and expert in money and finance. Since gold has been nearly obsolete as a circulating medium since the war there will not necessarily be any increase in prices, and no cause for alarm, he thinks.

"Apart from possible speculative inflation and some increase from a possible business revival, such a step can hardly be expected to affect prices," he said. "It makes no practical difference who holds the gold, whether it be the government or the federal reserve banks, since its chief function is to serve as a banking reserve."

**Increase Bank Reserves.**  
Domestic effect of the change of the gold content of the dollar should be to increase the gold reserves of the banks rather than to benefit the treasury, Professor Arndt made clear. "It would be unfortunate," he added, "if the gold content would be changed as a means of benefiting the government financially. That is one of the oldest monetary tricks known, and is identical with the old fashioned practice used by European kings in debasing the coinage. It is never a wise policy. Our gold supply should be kept separate from the treasury," he said. "A

## COMPLETE WORK ON REMODELING STADIUM TRACK

Accomplish Project Thru  
CWA Grant; Encounter  
Difficulties.

Work on remodeling the stadium track was finished Tuesday with the completion of the new cement curbs. The track was shortened to 400 meters and rebuilt to a seven lane width as a part of a CWA construction project. Cinders are now being replaced on the runway.

New difficulties were encountered in the practice field project when the graders uncovered piles of cinders from an old track. They are being carted away and dirt from an excavation east of Bessey hall is being used for refilling.

### Remodel Fence.

With the completion of the grading on the practice field, work will commence on removing wire braces from the board fence on the south side, and installing new steel posts set in concrete for support. Plans also include the repairing and remodeling of the fence.

Work began Dec. 16 as the result of a \$10,000 CWA appropriation made by the state board. Early plans included the building of cement tiers for seats at the south end, which would also act as a retaining wall to keep dirt from washing down on the track. These plans have been definitely dropped because of the expense, and the ground will be sodded early this spring to prevent erosion.

Fifty men have been working on the project in two shifts since Dec. 19, for thirty hours each week. Some men will probably be laid off before completion, which is required by the board by Feb. 15.
