## TODAY'S NEWS Briefly Reviewed

Trial of Sam Rivette and Walter Dean, on charge of first degree murder for the death of Lucreen Marshall, was set for May 9 after the two Texas ex-convicts pleaded not guilty. Attorney Hayward indicated that he would request separate trials for the defendants. Throughout the parley neither defendant expressed much emotion, nodding a curt "not guilty" when questioned.

While the trap set for John Dillinger and his gang still remained empty Saturday, federal agents were confident of capturing at least two members of the desperate squad in the near future. One of the men is George "Baby Face" Nelson, diminutive machine gunner of the crew. The other has not been identified. Nelson was believed to be the occupant of a fleeing automobile who fired on Special Deputy Al Johnson near Solon Springs, Wis., early Saturday. In an exchange of shots Johnson believed he wounded Nelson in the shoulder or thereabouts as the car careened wildly from one side of the road to the other.

The Black-McKellar airmail bill, embracing President Roosevelt's recommendation for appointment of a commission of experts to develop a permanent government air policy, passed the senate Saturday. From here it goes back to the house where speedy action is expected. The bill embodies the provisions that within nine months after enactment, the interstate commerce commission shall assume jurisdiction of airmail routes and issue certificates of convenience and necessity similar to those granted to railroads.

## Western Nations See In Japan's 'Monroe Doctrine' Foreboding Of Further Japanese Aggression--Hill

"Western nations, already suspicious of Japanese aims and methods in the Far East, justifiably see in Japan's 'Monroe Doctrine,' forebodings of further Japanese aggression," Norman L. Hill, professor of political science in the university, stated in an interview Saturday regarding the recent turn of affairs taken as a result of the warning issued by Japan.

The manifesto ostensibly outlined Japan's policy with regard to China warning the world in general not to make loans to China or assist that country by supplying airplanes, building airbases or sending military advisers.

"This is doubtless the most important statement of policy made by Japan since the world war," Dr. Hill continued. "It appears to be one more step toward a diplomatic impasse in the far east, giving every evidence that far eastern affairs are likely to get worse before they can be expected to improve."

The immediate objective of Japan," Prof. Hill stated, "in the statement from her foreign office
