## PROF. HERTZLER IN CHARGE OF SURVEY OF RELIEF AGENCIES

Senning Also on Committee  
Making a Study in  
Lincoln.

Prof. J. O. Hertzler, chairman of the department of sociology at the university, will direct an investigation to determine the proper functions of private and public relief agencies in Lincoln. The committee which Professor Hertzler has been chosen to head was selected at a recent meeting of the Lincoln chamber of commerce and was announced by Dr. E. F. Bailey.

The exact purpose of the survey, as outlined by Dr. Bailey, is to re-evaluate the present and future services and relations of different welfare agencies. The heavy economic stresses of the past five years has made this necessary, he stated. Although a wider study is being contemplated, Bailey stated recently, initial emphasis will be given to division of responsibilities between various agencies and health problems.

Working in conjunction with Professor Hertzler are several prominent Lincoln men and women. In addition Prof. J. P. Senning, chairman of the Political Science department at the university, will aid in making the survey.

In outlining a program for the survey, Dr. Hertzler said that in view of the depression influences it might be necessary for some agencies to assume new functions

## Students in Music Course Get Chance at Radio Broadcast

Some of the ninety odd students enrolled in the all state high school music course will have their first opportunity to broadcast over the radio this summer. For included in the university school of music's special four weeks session is a course designed to train boys and girls in "radio technique."

This unique training ground for training future Ettings and Crosbys is under the direction of Theodore Diers, radio director of the university. The exact purpose of the course, as explained by Mr. Diers is to develop and possibly discover "radio talent" that would not otherwise be found.

"Most of the boys and girls attending the special summer music course come from towns that have no radio broadcast facilities. The course in radio broadcast, with the adequate facilities we have here, will enable them to gain at least a general idea of radio broadcasting," Diers stated.

In order to groom students for the weekly half hour broadcast over station KFAB, a series of auditions are held during the course of the session every morning from eight to nine o'clock for the vocalists, and from ten to eleven o'clock for students interested in instrumental work. Students participating in these auditions "go on the air" in the regular studio of the university broadcasting station. Their audiences, however, are found in another part of the school of music building, where instructors and friends may have an opportunity to offer constructive criticism. While in the studio, the boys and girls are given instructions in correct "mike technique."

Thru these auditions, students are selected for the regular weekly program heard every Tuesday afternoon over station KFAB, from 2:30 to 3:00 p. m. Parents of the students selected to broadcast are notified beforehand, according to Diers.

During the last week of the special four weeks course the whole ensemble of the vocal and the instrumental groups are to be broadcast.

According to Mr. Diers, this is the first course of its kind to be offered in connection with the programs of public schools.

## Dr. Billig Gives Second Group Of Science Talks

### SCHEDULE FOR FIRST HALF OF WEEK

June 19, 11 o'clock, T. C. 323—General Conference.

2 o'clock, T. C. 323—Lecture "The Technique and Results of Analyzing Science Principles into Learning Elements which are appropriate for Elementary and Junior High Levels."

June 20, 11 o'clock, T. C. 323—General Conference.

2 o'clock, T. C. 323—Lecture "Organizing Teaching Materials Around Learning Situation to Provide First Hand Experiences with the Environment."

The second series of lectures planned especially for science teachers is being given this week by Dr. Florence G. Billig, head of the natural science department for the College of Education of Wayne University at Detroit. Monday Dr. Billig spoke on "Principles of Science as Organizing Factors in a Science Program for Elementary and Junior High Schools."

The group of lectures given by Dr. Billig are included in the course of study for Education 142, 122, and other courses cooperating. The lectures which are scheduled daily at 2 o'clock in T. C. 323, are also open to auditors.

"The Technique and Results of Analyzing Science Principles into Learning Elements Which are Appropriate for Elementary and Junior High Levels," will be the subject of Dr. Billig's Tuesday lecture. Wednesday she will speak on "Organizing Teaching Materials Around Learning Situations to Provide First Hand Experience With the Environment."

Dr. Billig will have as her subject Thursday "The Development of Units of Study which are Appropriate for Elementary School Levels and which will Serve as a Basis for Junior High School Science;" and Friday the series will be concluded with the subject "The Development of Units of Study."

## EISELEY RECEIVES HARVARD AWARD

### Graduate Goes on Trip For Anthropological Study.

The Harvard fellowship for anthropology was awarded to Loren C. Eiseley, graduate of the university in 1933, according to information recently received in Lincoln. He has been taking graduate work at the University of Pennsylvania at Philadelphia during the past year.

The fellowship calls for an all summer study of the regions near Carlsbad, N. M., where attempts will be made to prove the existence of Pleistocene man, through his association with prehistoric animals.

Professor Edgar Howard of the University of Pennsylvania, another student and a guide will make up the party, which will pull away from Lincoln about June 20. Professor Howard is prominent in anthropological research circles, having made several noteworthy discoveries.

## FIGURES POINT TO NO DROP IN SUMMER SCHOOL ENROLLMENT

1,628 Finish Registration  
By Saturday; More  
Are Entering.

Indications pointed Monday to no decrease in summer school registration over last year, according to figures released from the registrar's office. Saturday 1,628 students had registered as compared with 1,689 for the same period last year.

These figures however, it was noted, are not complete and late registrants are coming in daily, although registration in graduate college officially closed Saturday.

The figures released Saturday bear out earlier predictions made by Professor R. D. Moritz, director of the university summer session, who felt that there would be no decrease in enrollment.

Final registration figures will not be available until Saturday it was stated yesterday. General indications led authorities to believe that summer school registration this year would equal that of last year.

The first few days of registration gave rise to the belief that registration this summer would be less than in former years due to drought conditions and the extremely warm weather.

Those included in Saturday's figures are both graduate and undergraduate enrollment, an addition to the engineers summer camp.

The raise in standards for secondary schools recently voted by the North Central Association of Colleges and Secondary Schools was cause for predictions earlier in the session that summer school registration might increase graduate enrollment this summer.

## WEBB AND HENZLIK SPEAK AT FIRST OF ATHLETIC MEETINGS

### Four More Dinners Are Booked for Summer Session.

High school coaches and superintendents met Monday night at the Grand Hotel for the first of a series of dinners and round table discussions. According to R. D. Moritz, director of the summer session, these meetings have been planned to stimulate good fellowship and are open to any summer school student interested in athletics.

Speakers at the first meeting were Dr. Henzlik of the university and Mr. Webb, recently elected secretary of the Nebraska High School Athletic association. Following their talks motion pictures of general university interest and information were shown to the group.

Four other such meetings have been planned and include speakers from the university coaching staff and John K. Selleck, director of student activities during the regular term.

The complete program for the summer is as follows:

Monday, June 25.

6:30—Dinner and round table discussion.

7:00—The American Football Coaches Association and the Football Rules Committee.—D. X. Bible.

7:30—Motion pictures of the University of Iowa and the Oregon Aggie football games of last fall.

Monday, July 2.

6:30—Dinner and round table discussion.

7:00—Problems in Advertising and Financing Athletics.—J. K. Selleck.

7:30—Motion pictures of general interest.

Monday, July 9.

6:30—Dinner and round table discussion.

7:00—Basketball, the International Sport and the Sport of the Millions.—W. H. Brown.

7:30—Motion pictures of the game.

Monday, July 16.

6:30—Dinner and round table discussion.

7:00—Track and Field Athletics in the Future.—Henry F. Schulte.

7:30—Motion pictures of the outstanding champions in action.

Professor E. E. Brackett, of Ag college, has gone to Detroit Mich., to attend the twenty-eighth annual meeting of the American Society of Agricultural Engineers, June 18, 19, and 20. He is a member of the executive council of the society.

## FIVE MEETINGS ARE BOOKED BY PHI DELTA KAPPA

Five summer meetings remain on the series of programs being sponsored by Phi Delta Kappa, honorary education fraternity, for summer session men students and members of the organization.

Thursday the first meeting of the session was held at a dinner meeting at the Grand hotel. Dr. W. L. Beauchamp, a visiting science lecturer, addressed the group on "Science in Secondary Schools." The meeting was open to all men.

The remaining program for the summer is as follows:

Tuesday, June 19—Teachers college, room 320, 11:50 a. m. Special meeting to receive names of candidates for initiation.

Tuesday, June 26—Grand hotel, 6:30 p. m. Open meeting for all men. Discussion—Prof. George R. Howerton and Prof. William W. Norton.

Music. Following the speaking program, the meeting will close to visitors, to allow ballot on candidates.

Thursday, July 5—Annual picnic and initiation.

Tuesday, July 17—Hotel Cornhusker, 6:30 p. m. Vicennial anniversary program. (Closed meeting.) Ladies and Pi Lambda Theta will be guests. Address—Dr. W. H. Burton.

Monday, July 23—Grand hotel, 6:30 p. m. Open meeting. Discussion—Dr. E. E. Dale, Dr. R. E. Reynolds, and Professor Wadia.

## PI LAMBDA THETA TO ENTERTAIN WOMEN

### Dr. Burton of Chicago Is Speaker for Affair.

All women students enrolled in the university summer session are to be guests of Pi Lambda Theta, honorary educational organization, at a dinner to be held at the city Y. W. C. A., 1432 N street, Tuesday night, at 6:15 p. m. The meeting will be presided over by Miss Dorothy Frankforter, president of the organization.

Guest speaker for the event will be Dr. W. H. Burton, professor of education at the University of Chicago, who will discuss subjects related to education and teaching methods.

Dr. Burton is one of the special lecturers secured for the university summer session. He is now a visiting professor at the University of Southern California, and has for many years been an outstanding leader in the field of supervision. He is the author of several widely used text books on supervision and the direction of learning in elementary and secondary education.

## Part Time Jobs Open To Summer Students

The office of the Dean of Student Affairs has on file several employment opportunities for men students wishing to work for board or room during the summer session. Those desiring such employment are asked to communicate with Mr. Epp in that office in the Administration building.

## STUDENT COMMITTEE TO FINISH ATHLETIC PLANS WEDNESDAY

Baseball Holds Attention  
Of Both Men and Women  
This Week.

When the student committee on summer school recreation meets Wednesday afternoon, the athletic and recreation programs for summer school students will be decided upon, Professor E. W. Lantz, director of summer school recreation announced yesterday.

The athletic programs for summer session students, both men and women, will open this week when practice sessions on the field south of Teachers college will be held. Playground baseball will occupy the attention of both men and women this week, Lantz stated.

Playground baseball for men will be carried on in a more extensive manner this year than in previous years. It is the plan of the recreation committee to form several teams who will be groomed for scheduled contests with teams in the city of Lincoln and perhaps later in surrounding towns. Women will also participate in playground baseball, Lantz stated. A team will be selected after several practice sessions and they will be scheduled to play in other towns, in addition to playing some of the city women's teams.

Further details of the playground baseball arrangements will not be known until Wednesday when the committee meets and draws up a definite plan of procedure.

It was expected also that Lowell De Voe, in charge of the golf division of recreation would have definite plans formulated at the Wednesday meeting. It was noted, however, that a system similar to the one used last year will be held during the summer session.

Professor Lantz also stated that those participating in the summer session athletic program must be bona fide students of the university summer session.

In addition to the summer school (Continued on Page 3).

## Committee Pleased With Attendance at First Mixer Friday

Over six hundred summer session students attended the first dance held in the Coliseum Friday night. The mixer officially opened the summer session recreation program, and was one of the largest ever to attend the first mixer of the session, according to Professor E. W. Lantz, summer recreation director.

The committee in charge of the affair was highly pleased with the turnout at this affair, and promise that the admission price would remain at ten cents if the crowds remained at the size of Friday night's mixer during the rest of the summer.

Dave Haun and his popular ten piece orchestra played for the event, and are scheduled to play for the next mixer which will be held again Friday night.

According to Professor Lantz, a new system may be tried out at future parties in order to insure greater democracy among summer school students. He described it as the hostess system. According to present plans members of the committee in charge of recreation will be selected to serve as hostesses at the parties and will be so designated by ribbons or some such identification.

"It will be their mission," Professor Lantz explained, "to make the necessary introductions and formalities between students desiring to get acquainted with one another."

Professor Lantz felt that the attendance at the summer session dances had so grown that a mixer is almost impossible. The summer recreation director felt that this plan would be the most suitable means of getting the desired spirit at the summer session dances.
