DONORS CREATE TWO ADDITIONAL ANNUAL AWARDS

Honor Scholarships Will Go to Winners of Written Classics Test.

WILLED BY DR. BARBER

Recipients Must Intend to Continue With Study of Subject.

Two new scholarship awards have just been set up on the university campus, according to information released Saturday by university officials. The first is an honor scholarship of \$90 a year which will go to the winner of a written examination in the Classics. The award comes from the estate of the late Grove E. Barber who taught Latin at the university from 1882 to 1919, when he retired as head of the depart-

Provisions of the will state that \$2,000 shall be held in trust by the university regents, and three-fourths of the income be devoted to the scholarship. This shall go as an honor scholarship, to a student in te university, who has completed and the scholarship to a student in the university, who has completed and leave the scholarship. pleted not less than rour, nor more than five years, of the study of the Classical languages.

Winner of the scholarship must intend to continue with the study of the Classics, and must receive the highest grade in a written ex-amination set by the award com-

In line with the provisions the university committee has designated the time of the award as honors convocation, which usually comes in April. Sometime be-tween Jan. 1 and the convocation of each year an examination will be held calling for the sight trans-lation of Latin passages of suit-able difficulty. Dr. C. A. In the museum on the university campus, several new exhibits have been prepared this summer for fall visitors. From Dawes county has come a "Merychippus" skelton, a species of three-toed horse. Standing about four feet high, its remains have been set up in Founders' Room adding to the skeleton story of the evolution of the horse, which museum workers hope some day to have complete. This specimen was found by Ted Galusha, who lives in northwest

Nebraska. Across the hall in the same room may be seen a pair of newly mounted rhinoceros skeltons. The most unusual feature about these animal remains, as also of the small horse, is the new manner in which the bones are mounted. Henry Reider and Frank Bell, who set up the specimens, have mod-ernized and perfected their art so as to use no visible support for the fossil animals as they stand in the cases. Usually the skeltons are held up by iron pipes or rods. Lacking these, the new exhibits appear to be more graceful and permit more careful observation.

The museum will be open to the public each Sunday from 2 to 5, women will give closely parallels art, Jack Whitten, George Proud-
