### CAMPUSOCIETY

... A SCREAM RE-ECHOED IN THE unusually quiet hall. The unmuffled voices pierced the solitude with their raucous laughter. Someone ran the length of the corrider to embrace one of her sisters. That screech upstairs was just a bed being moved back into place. One person was studying. In a prominent eat-shop coed after coed promenaded around and around to let the student body know she was still in Lincoln. Alarms rang at seven-in the middle of the night Sleepy eyed students peered intently at professors be-

cause after all they will have to know something when they face exams in less than three weeks. People in "Sosh" were chatting about Christmas and New Year's Eve parties and rest. So-we all came back to college!

AT A CEREMONY performed before a background of Christmas trees, branches of evergreen and candelabra, Amay Jones became the bride of William J. Robbins at 4:30 o'clock Dec. 29 at the Pilgrim Congregational church at Cortland. The groom is a former student at the university.

LURA LOU WALLACE of Has-tings was married to Lloyd H. Ellis at the St. Mark's pro-cathedral in Hastings a week ago. She be came a member of Kappa Alpha Theta when she attended the uni-versity. The couple will reside in Denver, Colo.

ANOTHER WEDDING which was an event of the holidays was that of Jean Feese of Wymore to Mr. Ellroy who is a graduate of Harvard. The ceremony took place in San Diego, Calif., on Dec. 22. Mrs. Ellroy became affiliated with Gamma Phi Beta at the university.

ALPHA O wishes to announce the recent pledging of Sarah Louise Lytel of Benedict.

AND RECENTLY pledged by Delta Zeta was Ruth Stone.

CHARLES WERNER, senior in the college of pharmacy, and Zona Wilcox, junior in the college of business administration, were married Dec. 26.

BOB FUNK, Chi Phi, was one of the fortunate spectators when Alabama conquered Stanford at the Rose Bowl game New Year's day in California.

STILL ANOTHER holiday marriage was that of Edna Mae Paulson of Crofton to Henry R. Stotts of Scottsbluff, which took place New Year's day in San Francisco. Following the ceremony, Mr. and Mrs. Stotts left for an ocean trip. The groom is employed at the Elco state park at Cannon Beach, Ore. The bride, a former university studeft, has been teaching school near

day, Jan. 8, at 7:30.

Shirley Temple in "NOW AND FOREVER" with Gary Cooper, Carole Lombard.

"FLIRTATION WALK" with Ruby Keeler, Pat O'Brien, Dick Powell.

"There can be no longer any doubt but that man hunted extinct mammals, bison, mammoth, and many others in Nebraska during at least the latter part of the Great Ice Age," said Dr. Lugn. "The most convincing evidence of ice age man in Nebraska so far discovered came to light late in the field season of 1934."

The best and most useful evidence concerning the ice age antiquity of human beings is to be found in Nebraska. Dr. Lugn presented new facts in his paper at the geology meeting and gave information to the public which had been known previously by only a few people, mostly members of the University of Nebraska mu-seum staff and the state geoligical survey group.

#### Dart Points Found.

"Yuma and Folsom dart points and other artifacts have been found in an old soil zone at the base of deposits of Peorian age,' says Dr. Lugn. "They were found in association with mammoth, extinct bison, and remains of other research extending over a long period of time. The area is im-Ice Age mammals."

Dr. Lugn pointed out that sevcient man."

More Employment Among Engineers States Ferguson

Southern California. by an expedition into the jungles of Guatamala, were being worked Research, who led the 2,000 mile

Chief enigmas of the Mayas, according to Dr. Hewett, are where the once powerful race disappeared, leaving only a few scattered descendants. The study is attempting to determine what caused the decay of the race that built great stone temples and what is the key to their picture

writings.

Of all the hieroglyphics so far studied, only those relating to the Mayan number system have been

deciphered, it is reported.

Annis Starts New Angle.

A new angle of the study was started on the expedition by Prof.

Verle L. Annis of the U. S. C. architecture department. "We found tall obelisks of carved stone, weighing many tons and too heavy for even modern machinery to move," said Prof. Annis.

"With no quarries that we could discover within many miles, the Mayas set up these monuments, leaving us to puzzle our heads over the question of how they obtained the stone and moved it."

Prof. Annie said in the lowlan

Volcanoes Drive Out Mayas. up at the Trojan university under direction of Dr. Edgar L. Hewett, bead of the School of American civilization, is one of the new theories," Prof. Annis continued. There are more than thirty volcanoes in this territory and some
