When the question was raised, Dr. Lyman asserted that such practice was within the legal bounds of the medical profession. Furthermore, the statement hold such action as being purely legitimate. The Nebraskan of course can not profess to know just what the medical association might have to say on the subject. One thing is certain however, the public as such does not ordinarily select for approval a doctor who postpones setting of a break until a more convenient time over twelve hours later. A person need not obtain medical association approval to want a break set immediately instead of enduring an agonizing wait. In many TO THE EDITOR : cases of doubt, postponement of action may be desired that a doctor might better diagnose the theme song; at least it should be in view of my case. Brief, concise contributions pertinent to matters of student life and the university are welcomed by this department, under the usual restrictions of sound newspaper practice, which excludes all libelous matter and personal stacks. Letters must be signed, but names will be withheld from publication if so desired.

Free Speech

### And Free Service.

TO THE EDITOR: I believe in the principle of free speech I have frequently gone out of my way to give to the editorial writers of the Nebraskan in formation which would serve as a basis of a Official student publication of the University of Nebraska good story. I have even been called an "adertiser" by some of my colleagues, because of subject matter appearing in the paper, when

there was no other motive than to co-operate with students in producing a readable college paper. I think the expression of student opinion is wholesome. My only insistence is that editorial writers first get all the facts concerning a specific situation and then stay by the facts when they write. This was not done Regina Hunkins as a basis for the editorial entitled "Health Service" which appeared in the Feb. 20 issue of the Nebraskan.

Take the case of the boy with the injured shoulder. Here are the facts in the case. This accident occurred in an intramural contest

Consider me as one of the "conscientious objectors" to the somewhat provincial and idiotic dogmatism the faculty committee on student affairs has imposed upon the student body of the university, concerning social 'regulation'' of organized houses on Sundays.

My sentiments on the question are in sympathy with the objections raised by "Objector," which appeared in the Wednesday issue of the Daily Nebraskan.

Big shot faculty members in the university tell us that the present era is one of "individual thinking." and "freedom of action and reputable character building." If such be the case, the faculty and the faculty committee on student affairs should get together and iron out the obvious contradiction they have involved themselves in.

the university students, and keep them from harm's way, would perhaps be "money ahead" if she would alter her somewhat rigid stand on the question,

The prohibition of dancing and cards, not to mention a mere banquet on Sunday is a violation of the inherent and well founded beliefs embodied in the U.S. constition, "life, liberty and pursuit of happiness. Which shall it be, one may rightfully ask, the constitution or the perverted notion of social order as laid down by the university?

Certainly, during the formative years of our lives, we should be allowed the privilege to pick up and discard what social attributes we so choose to possess. As for myself, in all Smith hall. sincerity, social regulations on this campus will in no way hinder freedom of action and thought, or social contacts, that I care to make during my university life.

As a member of an organized house I make this appeal perhaps echoing the sentiments of many of my fellow students, that a new deal be started, a reshuffle of Sunday school ideals that predominate in the thoughts of those in the seat of power, and a "laissez faire" ruling be set up for student social SENIOR.

If the term grotesque and was assured that one of the principal must be applied in reference to these cases, it might best be used as descriptive of their treatment.

That the Purdue student pays \$5 for the service Nebraska renders for \$2 is a point Dr. Lyman raises. With Dr. Lyman's own insistence that "writers get all the facts concerning a specific situation and then stay by the facts when they write," we shall condemn him for not abiding by his own ruling. All the facts were not given in the Purdue instance.

At Purdue all the materials are furnished free of charge. At Purdue the student incurs no extra cost whatsoever for the procurement of any medicine. Every expense is included in the initial \$5 fee. Furthermore treatment may be received at any hour during the entire day. Men and women may be treated all day. They are not allocated special hours for attendance. Again their staff is much more complete, possessing a larger personnel. This is, the Nebraskan believes, enough evidence to show that the Purdue rate is not higher in comparative cost than the one at Nebraska. It is not the Nebraskan's wish to argue the merits of a higher fee but "all the facts" should be presented.

The Nebraskan realizes that Dr. Lyman's closing remarks in the letter were not to the close friends of Kosmet Klub members. Nebraskan's credit. But the Nebraskan also realizes that any department dislikes criticism. that strikes me as being foolish, that is: Why tween it and the spirit the Vic-

Two days later the Daily Nebraskan pubished a list of names of the thirteen men chosen for principal parts. Six, at least I think that number is correct, were Kosmet Klub members. My name was not in the list of principals, but in a list of men eligible for further trial for the choruses. The next issue of the Nebraskan carried the statement, "Both choruses have been chosen and are in rehearsal." It appears, according to a professor at Kansas State College, that college, after all, does perform a developmental function. This professor maintains that the dumb students get more out of attending college that the naturally bright ones. He says he has shown that the gains made by the former are both absolutely and relatively greater.

Along with this we might report a study made by the University examiner at Ohio State University who says that the bright boys and girls of high school finish college still near or at the top of the list.
