LINCOLN, NEB.

# Drama Students Give Farce

# HISTORY OF ANCIENT CITY STILL MYSTERY

#### Dr. Bell Not Ready to Give Definite Facts About Buried Village.

In regard to the recent news-paper statements by Mr. M. K. Elias of the University of Kansas, concerning the much publicized site at Lynch, Neb., in which the Kansas paleobotanist makes an attempt to estimate the age of this civilization as well as the type of culture represented, Dr. E. H. Bell, who is in charge of the University of Nebraska survey party in the Niobrara valley, revealed Friday that Mr. Elias visited the site only for about an hour. Elias, in an article appear-ing in the last issue of the Ne-braskan, said the Lynch site was not more than 1,000 years old, and that these early Nebraskans were a people with "little culture." During his brief visit at Lynch the Kansas man was taken on a tour of the site, so far as it has been excavated.

#### No Definite Statements.

Says Doctor Bell, "even after being in the field for several weeks and after studying each day's evidence throughout this period I still think that it is much too early to give any definite statements as to the type of civilization present, the type of dwellings, the age of the site and the physiographic conditions within the area.'

Contrary to Mr. Elias' opinion, Doctor Bell still believes that the culture of these early people should not be classed as "little." "This much is clear," he says. "they had a great abundance of good pottery. They had agriculture and raised corn in great quantities. We just found a cache almost filled with corn, both shelled and on the cob. Of course, the corn was not fresh, but carbonized. This latest cache was eight feet in diameter and five feet deep.

#### Age Unsettled.

physiographic is concerned the and other evidence available now does not allow Doctor Bell and Dr. William Van Royen, the latter a physiographer of the univerity, who has also studied the Lynch site, to definitely settle the age problem. They still believe,

#### Government to Distribute Ten Million for Youth Aid in 48 States.

Nebraska will have \$86,200 for the operation of the National Youth Administration work projects during the first three months of the new fiscal year, according to an announcement from Aubrey W. Williams, executive director. \$10,000,000 will be distributed among the 48 states.

Details of the 1937 program of student aid were outlined recently at a five day conference attended by educators from many parts of the country. The recommendations of these prominent educators concerning the plan under which an estimated 310,000 young men and women between 16 and 25 years of age are to be given financial assistance throughout the coming school year will largely determine the policies to be followed.

"Because the actual administration of our student aid program, as it was last year, will be in the hands of school officials, we are anxious to have the benefit of their counsel and past experience in shaping next year's program," Mr.

Williams declared. "Our past policy of leaving the selection of students, the designation of the jobs they are to persupervision of the work and program within the schools, entirely to school officials will remain unchanged. By evaluating last year's

#### REGENTS TO GIVE 66-FOOT ROADWAY

#### Officials Dedicate Space For New Highway.

For a consideration of \$1, the board of regents of the University is dedicating a 66-foot roadway for highway purposes, starting at a point near the west end of the heating plant and extending in an arc to the approximate north line of their property thence over to 11th st.

This is a part of the contemplated highway unit from 10th street, north of the stadium, to 13th, which will sweep along the tracks, maximum distance north of W to be 150 feet. It is intended primarily for heavy truck traffic and as an industrial feeder with railroad contacts. It will hook into the S. Y. A. highway by way of 10th street.

Honoring the late Chancellor Emeritus Samuel Avery, the name "Avery avenue" was suggested as fitting for designation for this highway unit.

#### Account of Steps in Digging **Out Buried Civilization** Described.

Radio fans from coast to coast had an opportunity to hear an actual "play by play" account of all the steps necessary in digging out a buried civilization last Friout a buried civilization last Friday in a nationwide hookup originating from the well known Lynch, Neb., site, where Dr. Earl Lynch and a group of University University 15 Kresge University 15 University 16 Bethany University 20 Seward University 16 Bethany H. Bell and a group of University students are unearthing an ancient middlewestern village. The archaeological party has been at work excavating the site since the close of school and . thus far have brought to light a remarkably large collection of artifacts, be-lieved to be evidence of an ancient civilization which existed in this part of the country centuries ago.

A miscellaneous program was arranged, featuring not only a description of the excavating process, but talks by Doctor Bell, Dr. Robert F. Gilder, one of the first archaeologists in Nebraska, and short interviews with people of that part of the country who have in order to enlarge the reservoir been interested in collecting fossils for many years.

# RECREATION PROGRAM NOW ALMOST FINISHED

#### Women's Kittenball Team To Play Last Games Next Week.

With the last week of the summer session looming ahead, summer recreational activities are reaching their climax the last of this week and the first of next. With the golf and tennis tournaments almost completed, several more kittenball games have been scheduled by members of the women's team, according to Miss Gertrude Leavitt, in charge of women's recreational activities.

Unusually well satisfied with the accomplishments of the recreational program and the interest shown in it, members of the recreation committee expressed their belief that this has been the best and most successful program ever carried out on the University of Nebraska campus.

#### Athletic Interest Greater.

"We can't account for the greater amount of interest shown in recreational activities this summer," Miss Leavitt declared. 'It must have been because there were more people in school in-terested in athletics."

Concluding the social program for the summer, the last all-Uni-versity party will be held in the coliseum Friday evening. Dave Haun and his twelve-piece orchestra will again furnish music. Because it is the last dance of the session, an especially large crowd is expected to be present,

#### Game Scores.

In the kittenball games, which have been played by both men's and women's teams during the summer term, complete scores for the summer have been kept. Because several games have been scheduled for next week by the women's team scores of the last games are not available. Those that have been played are as follows:

Kresge 14 Cook's Paint 7 Bethany 3 Kresne . Malcolm

Scores in the games played by the men's team are not available. The team won, however, two out of three games, those with Law-

#### Nebraska Will Have New Artillery Unit A field artillery unit will be

established at the University beginning this fall, it was announced recently by the war department.

Reserve officer training units will also be established in 25 more colleges and universities this fall, according to the announcement from which future officers may be drawn for the amy.

### Three "C's" in Education Today

formed the educational program for the boys and girls of yesterday, must now take their place along with the horse and buggy. In their place has come the three "C's", citizenship, conduct, and character, which are education's new challenges for 1936, now reechoing on every front. An entirely new set of educational goals have changes in the social and economic orders.

These in turn have resulted in drastic changes in the schools' curricula. A review of the courses for the past thirty years, shows a new emphasis being placed upon

The three "R's" which alone which formed the high school curriculum of a few years ago.

Trends Shown. The present educational trends as well as a critical analysis of (Continued on Page 2).

### Stoke at Research Seminar

States, and the philosophy of education have occupied the time of Harold W. Stoke, associate professor of political science, who for the past month has been attending classes of the new school for social research in New York City.

Leading the political seminar at the school is Prof. Max Ascoli, of

#### Lowell English Wins National Guard Bout

Winning with a smashing decision over Herbert Round in the form for NYA assistance, and the feature bout of the national guard fight program Monday evening. was Lowell English, of Lincoln, 191 pound center candidate for the University football team. English experiences, we hope to simplify came back after losing the first the new school are such outstand-and improve the program's adtwice in the third.

A STATE OF THE PARTY OF THE PAR

Courses dealing with political New York City, while Prof. Horace parties in Europe and the United M. Kallen, also of New York City, is in charge of the course in the philosophy of education, Mr. Stoke is also doing research

work of his own at the New York City library, one of the largest in the country. He plans to leave New York for a tour of the southwest about the first of August, according to David Fellman, a colleague of Professor Stoke's in the political science department.

The New School for Social Research, which Mr. Stoke has expressed his interest in attending in communications to Mr. Fellman, was founded in 1919. It is a nonpartisan institution of higher adult education, the work of which centers around the social sciences. Included in the faculty roster of Chi, and E. Von Hornbostel.
