COACH FEELS OUT FACULTY BEFORE ACCEPTING POST

Lone Star Reports Still Name N. U. Coach as No. 1 Prospect.

SPECIAL FLASH

It was reported in a special news flash late Saturday evening, that the board of regents of Texas University had voted their approval to the consideration of Coach Dana X. Bible to take over head coaching duties at the Long Horn university. The Regents expressed their desire that the Nebraska coach attend their meeting to be held Jan. 22, after which the final selection of the new coach would be revealed.

By Morris Lipp.

Dana X. Bible, Nebraska's athletic director and head football coach, has not come to any decision as to whether or not he will accept the position as head mentor at the University of Texas when and if he is invited to do so, it was learned in an interview Saturday morning.

Ted Twomey, line instructor at (Continued on Page 3.)

J. R. GOETZ TO ADDRESS ARCHITECTS WEDNESDAY

Portland Cement Company Representative to Talk on Use of Concrete.

Mr. J. R. Goetz, of the Portland Cement Association, Chicago, Illinois, will address the January meeting of the Architectural Society on Wednesday afternoon, January 20, at 4 o'clock, in the Temple building, Department of Architecture, T. 26. His talk, "Recent Developments in the Use of Concrete," will be illustrated with slides.

Mr. Goetz is from the general offices of the Portland Cement Association in Chicago, and addresses both educational and professional architectural and architectural engineering groups from time to time.

Bell Adds Cast of Huge Dinosaur Footprint, Fossil Starfish Slab To University Museum Exhibition

A new exhibit in the university museum that has aroused the interest of visitors is the cast of a giant dinosaur footprint which was brought here by Frank Bell, who recently returned to the museum after a year's leave of absence at the University of Texas, where he assisted officials there in preparing several of their new and giant fossil mounts. Bell made the cast from one of the better original plates, of which there were eleven in a series. The individual can better appreciate the size of these ancient dinosaurs when he realizes that this track is almost twenty inches in length. The depressions made by the three giant toes and the hoof is unusually plain.

Brings Cretaceous Fossils.

Bell also brought back with him many Cretaceous invertebrate fossils, including the cast of a starfish slab, approximately 12 by 19 inches in dimensions, which contains about 85 starfish. The original was found within the city

VICE PRESIDENT.

PROF. H. A. WHITE

Debate coach and member of the department of English, H. A. White was elected vice president forensic society. He has been a national officer since 1924, and was of Delta Sigma Rho, national editor of the organizations official publication for 1926 to '33. As vice president, Dr. White will have charge of the chapters in the mid-western states.

LATEST ALUMNUS DISCUSSES LOBBY FOR MORE FUNDS

Prof. Senning Contributes Article on Unicameral Legislature.

Declaring that university battles for much needed appropriations should be waged by civic organizations, Max Kier, '17, who was speaker of the house during the 1931 session of the state legislature, revived the question of hiring a "lobby," in an article printed in the January issue of the Alumnus.

Kier declared that in his opinion the proposed .2 mill levy requested by the board of regents "is reasonable and should be entered." (Continued on Page 2.)

BRITISH DIPLOMAT NAMED TO DELIVER CHARTER DAY TALK

Sir Arthur Willert Slated To Speak Here Feb. 15 'Europe—1937.'

Sir Arthur Willert, celebrated English journalist and diplomat, will speak on the campus during the university's charter day, Feb. 15, featuring a full program of events.

Altho detailed plans have not yet been formulated by Nebraska officials and alumni, the schedule will include a prologue by the symphony orchestra and additional banquets and addresses, some by university faculty.

As a prologue to charter day festivities here, the University of Nebraska Symphony orchestra, Raymond Reed, director, will present a public program at the coliseum the afternoon of Feb. 14, Monday, Feb. 15, will be given over to special dinners and programs and as a climax to the day's activity, alumni and guests will attend the Kansas State-Nebraska basketball game that evening.

Sir Willert is internationally recognized as a distinguished diplomat and newspaper man. He holds degrees from Oxford university, and was head of the publicity department of the British foreign office from 1920 to 1935. From 1910 to 1920 he was the Washington correspondent for the London Times.

The Englishman is expected to (Continued on Page 4.)

WOMEN'S HONORARY OFFERS \$50 LOAN AS SCHOLARSHIP AWARD

All Senior Women Eligible to Apply for Mortar Board Grant.

Announcement that senior women enrolled in the university may apply for the \$50 scholarship loan which Mortar Board, senior women's honorary awards annually was released today by Rowena Swenson, treasurer of the honorary. Selection of the winner of the scholarship will be based on need, scholarship, and service to the university, according to Miss Swenson.

Application blanks and information concerning the award may be obtained at the Dean of Women's office, Miss Swenson stated, and those girls applying are asked to return their blanks to the same office by Friday noon, Jan. 22.

Awarded in order to help defray the winner's second semester expenses, the scholarship will be made on a loan basis, payable following graduation from the university. Time limit which is set on paying back the loan after graduation is two years, according to Miss Swenson.

Following the deadline on Friday noon a committee made up of Mortar Board members and advisors will determine the winner.

Urging that senior women who need financial aid for the second semester apply for the loan, Miss Swenson commented, "The Mortar Board loan has been offered since 1933 and has been a great help to several senior girls in making their last year a little less difficult financially."

NAMED HEAD

PROF. E. E. LACKEY

Associate professor of geography, Dr. Earl E. Lackey, was recently chosen as president of the National Council of Geography Engineers.

PUB BOARD GETS 25 APPLICATIONS FOR STAFF JOBS

Daily Nebraskan, Awgwan Positions Available To 16 Students.

Applications from 25 students were received by the Student Publications board for appointment to the 16 available positions on the Daily Nebraskan and Awgwan staffs. Altho no definite date has been set, a report from the office of the journalism school stated that the publications board will probably meet sometime this week.

This semester's applications number less than the ordinary amount. Indicative is the 20 filings for news editor of the Daily Nebraskan last spring as contrasted with the 14 received Friday. Other filings include 2 for editor, and 5 for managing editor on the edi- (Continued on Page 4.)

BAKER, PARSONS, SORENSON CARRY SCORING BURDEN

Huskers Keep Conference Slate Clean; Iowans Non-Victorious.

With the usual hot shots hot shooting, Nebraska's bucketeers mauled the Iowa State Cyclones 45-33 in their first conference game on the home boards. Little Howard Baker led the bucket brigade with 10 tallies for the Huskers with Flemming doing all the work in behalf of Coach Menze.

From the starting whistle Nebraska proved that it was built to fit the ten point advantage tailored for her before the Iowa game. The Huskers hoarded the ball for over two minutes before the invaders so much as caressed the cover. The win virtually sets the Huskers in a convenient position to shoot at the Big Six crown. Oklahoma, Monday's opponent and Nebraska are the only teams left in the loop undefeated.

Baker, Amen O. K.

Baker and Amen, the two newly born forwards were again the apple of Coach Browne's eye as they tore around the foe for clever manipulations with the greatest of ease. Parsons played his usual steady ball with a bit more stress on the defense. Ebaugh had a tough time on shots but did tricks with the agate as did the lanky Sorensen.

Play opened with Sorensen cashing in on a gratis flip up to be smothered by little Roschlau, who started like a blazing shanty. Again Big Harry tallied, this time from the field giving the Huskers the lead which they never relinquished. Parsons and Baker (Continued on Page 3.)

Upperclassmen to Finish Activity Lists by Jan. 13

All juniors and seniors who wish to add anything to their list of activities for the sections in the Cornhusker must present the additions in the Cornhusker office Monday, Jan. 18, according to Bill Marsh, editor of the yearbook.

Bacteriology Class Sees Film Story of Fight Against Syphilis; Other Showings May Be Planned

"Syphilis is a disease, not a disgrace."

With that watchword, the American Social Hygiene association sponsored the first showing on the Nebraska campus of a thirty minute sound picture publicizing the nation-wide campaign to curtail the 100,000 deaths annually in this country by syphilis.

Over one hundred members of Dr. G. L. Peltier's bacteriology class saw the picture, and then fired questions at Dr. M. F. Arnholt, city health superintendent, for the remainder of the hour.

"Our attitude toward syphilis," Dr. Arnholt told the class, "has been that of the ostrich who sticks his head in the sand and says, 'you don't see me. If ever a little wholesome daylight was needed, its on this problem.'"

May Arrange Other Showings. Organized campus groups may secure a showing of the picture by calling Dr. Arnholt or the Daily Nebraskan. "We are anxious to show this film to as many students as possible," Dr. Arnholt declared, "and we must ask only

one requirement—that there be at least forty in the group."

Captioned "For All Our Sakes," the picture was written and produced by Ralph Rushmore, of the association, which is directing the drive from its Rockefeller Center offices. Film slides, accompanied by recorded narrative, unfolded the history of the fight since the syphilis spirochete was first discovered in 1905, and the first effective treatment in 1910.

Paralleling the advances made in the treatment of tuberculosis, cases have been reduced to one-twelfth of their number from 1903. Today, according to the authorities who supplied facts for the picture, 6,500,000 men, women, and children, or one in every twenty of our population, are infected at some time during their lives. Dr. Arnholt supplemented the picture with statistics for Lincoln, stating that there are four thousand cases in the city, but only 600 of them under treatment.

Upon this discrepancy between actual cases and cases under (Continued on Page 4.)
