

PUBLICITY PLUS ORGANIZATION

An unpublicized group on this campus received more share of publicity and renown yes-terday when it went on record as "unanimously being against the proposed affiliation of the Lin-coln Cathedral choir." Altho we find it hard to draw ourselves away from the issue of the day, we do it to dedicate a serious mo ment of consideration for group who so gained thru their

publicity seeking methods.

The Barb Interclub council chose to alter Barnum's famous adage and followed their own individual wording. They thought, like even the most normal big shot will think, that "speak well if you can, speak evil if you must, but for darn sakes speak something." With little consideration, we believe, they did just that thing. And they did the only normal thing to do in the circumstances in which they now falter. Had it not been for their adverse action, we still would have been shying away from this tottering organization. A PICTURE.

It is noteworthy, we believe, to consider the picture in the mind of a outstate high school sophowhen he hears the seeking knowledge, and both find recreation beyond the four walls of "Barb" used in connection with a university. Is it not true that that picture portrays somewhat of toughy with corduroy panties? The average conception, however, is that the "Barb" has a mind of his own and won't let anyone get away with something he doesn't

But that picture clears when the high school sophomore comes to the "whitespot's" capital city to attend an institution of higher learning. In 60 chances out of a 100 he goes thru an ordeal of rush week. In about 38 cases out of those 60 that man will pledge a fraternity. If by that time, the freshman hasn't screened an accurate picture in his mind, he will shortly.

There are three reasons, we

believe, if not more, why stu-dents are "Barbs." First, and generally most important, they don't feel like spending any more than necessary for board, room and recreation during their four year outing. Secondly, they may feel a certain independence that they want to rfetain. And thirdly, they just don't care about being bothered with the extras and fancies that more organized, ritualistic living entails. It is our guess that very few—very, very gew are now "Barbs" because of an old family tradition or because they were told to be so, A DISTINCTION.

A ritual, generally secret, a few more social activities, and a knowledge of names of a few more people, then, is the only real differ-

Suggestions for The Greeks

Recent statements, coming at a time when the college fraternity system is more or less 'on the pan' before many administrations and organizations, give fraternity members on the nation's campi the occasion for self critieism and self appraisal for the preservation of traternities.

A report, approving the college fraternity system in its broadest aspects, issued recently by the Association of American Colleges meeting at Chicago, states: "Since man is to operate in and with groups, the objectives of personal development and good citizenship can be achieved most effectively in organized group life. The college must, therefore, recognize as an essential feature of the educational process, a properly organized and maintained student group life." The statement continues with a recommendation that colleges support and aid fraternity groups which are fulfilling their opportunities but that they do not withdraw from the post of leadership now maintained.

A fraternity must guard against the creation of false standards. Speaking before a session of the national interfraternity council at New York, recently, Karl Litzenberg, assistant professor of English and adviser on fraternities at the University of Michigan, took a sharp rap at the "naive fakery" known as "boosting," which makes the general picture of fraternal life in America "discouraging." Professor Litzenberg sharply criticized fraternities for singing false songs of self praise while allowing "outsiders" to attack the evils of the system.

"Fraternities as we know them today are willing to wait for outside criticism and attack when they might well forestall these things by a careful self criticism." he said.

Professor Litzenberg's position may be a bit exaggerated. On the other hand it may not be strong enough. At any rate it should give members of the Greek world something to

What About Those Resolutions?

A little more than seven weeks ago, textbooks, notebooks and other similar paraphernalia emerged from hiding and were dusted off for a "revival" of learning. And thereupon ensued the usual two weeks of feverish activity on the campus. Some time later when the crisis was passed, most students heaved a sigh of relief, some felt keenly disappointed, and a minority could show that they were making real progress in acquiring a college education. Rationalizations ran rampant for a time as students made solemn resolutions to

place of decent and honorable pride.

ing which I have called 'boosting.' '

think about.

get off to a flying start this semester.

to us the first part of the week with the release of first semester grades from the registrar's office. How far we have progressed toward keeping those resolutions is probably none too commendable, and the issuance of semester grades may be just the tonic needed in order to remember the resolutions with a greater degree of clarity. At any rate minds were transferred from spring back to the

Visiting Officer Conducts

LT. RHODES INTERVIEWS

He is visiting all accredited colleges and secondary schools in this district in order to acquaint students with the opportunities offered in the Coast Guard serv-He will give a short talk, and show sound pictures of the guard and the academy,

An examination will be given for the academy on June 8, at New London, Conn. Applicants must be between the ages of 17 and 22, and have the mental ability required for entrance into any engineering college.

Cadets in the school are given general training in the Coast Guard, as well as an engineering education. They are paid \$780 a year as cadets, and make at least one trip a year to either European or South American waters. At the completion of their training they are granted a commission as Ensign in the United States Coastal Guard.
