LEARN FOR LIVING

Students attending the Council forum with Dr. Lyman yesterday morning proved again that it is preparation for life as it will really be found that the undergraduate seeks in college. The oldest question in the world still upsets the minds of young people and fills them with questions and worries they demand to have answered and dispelled. Not only in the spring, not in any particular generation, but all students are vitally interested in marriage and all they can learn about it.

Progressive universities thruout this country have recognized this concern and are inaugurating special courses to aid stu-

dents in solving their everyday problems. Recognized as a subject regarding which no definite and arbitrary principles can be drawn, these courses are usually organized into discussion groups where young people of today can intelligently discuss the problems as they really see them, and not as an elderly, sedate professor imagines they see them.

Instead of a glorified "Dorothy Dix" series of interviews, these courses will guide the pupils into intelligent consideration of the many and complex questions the subject involves. Thru the courses students will learn that beyond the known physiological phenomena of the human body, the answers they seek are dependent upon the circumstances of each individual case. They will learn the first and most important requirement to successful marriage.—that of ready assumption of the serious responsibilities of living with another person as a mated couple.

On the other hand, thru the agile leadership of someone schooled in the field, students of such courses would be steered clear from the drab conception of marriage as a life merely of drudgery and conception.

To the college student with his wide knowledge of the world and with the great range of pursuits open to him, the idealistic goal of companionship in marriage is gained against odds. The college student who has learned to play and enjoy the humorous and the beautiful in life will not resign himself to a mode of living to which he has not been accustomed. To prepare the young people of our generation for the life which they are soon to begin to live in earnest, this university should offer a practical as well as theoretical course in the eugenics and problems of marriage.

Success and failure of many men can be traced to the influence of their homes and to the success or failure of their marriages. Such an important problem with such far reaching results must not be ignored or dealt with only superficially because of an antiquated and outmoded false modesty.

Honorary initiates 11 chem students

Pfeiler speaks at Phi Lambda Upsilon dinner

Eleven students in the department of chemistry were initiated into Phi Lambda Upsilon, national honorary chemistry fraternity, last evening at the Cornhusker hotel.

A dinner and program followed the initiation ceremonies. Dr. W. K. Pfeiler of the Germanics department addressed the group on "Science and Scholarship in Nazi Germany." H. B. Fernald of Monmouth, Ill., fraternity vice president, welcomed the initiates, and R. E. Miegel responded. W. J. Clem presided.

Students initiated were: D. G. Cain, Lincoln; O. DeGarmo, Lincoln; G. A. Griess, Kearney; H. A. Hamilton, Jr., Sioux Falls, S. D.; F. H. Kahler, Marion, Iowa; R. E. Miegel, Kansas City, Mo.; W. A. Mitchell, Lincoln; J. F. Morgan, Wayne; G. P. Mueller, Jr., Lincoln; R. E. Schlueter, Kenesaw; M. G. Schwab, Sutton.

A. I. E. E. to hear Jensen

"Piezo-Electric Crystals and Their Application" is the subject of an address to be given tonight by Dwayne Jensen, engineering student, before a meeting of the student branch of the American Institute of Electrical Engineers. The meeting will be at 7:30 o'clock in room 204 of Mechanical Engineering.

Conference

(Continued from Page 2.)
a summary of current transportation-economic problems.

Economica to attend.

Members of Economica, graduate economics society, will consolidate their annual spring meeting with the conference, which is under the sponsorship and direction of the college of business administration.

The university plans to make this affair an annual event, and each year outstanding men in the fields of commerce, economics and transportation will be invited to present their views on current questions of this nature.

Air Training

(Continued from Page 1)
of Minnesota, San Jose State college and the University of Washington have not returned their questionnaires to Washington.

Seniority and scholastic standing were important factors for a basis of selecting students. While objections to first reports of some schools was that flight training was scheduled at too rapid a pace, students are not to receive more than one-half hour instruction in any one flight period.

Several students from the University of Nebraska are planning to attend the school at the Randolph field in Texas.

Band plays at Chamber

Playing for the Chamber of Commerce luncheon Tuesday noon was the university symphonic band, directed by Don A. Lentz. The band played the following numbers:

Prokofieff, Marche and Scherzo.
Dvorak, Finale from "New World Symphony."
Bennete, Rhapsody in Rhumba.
Beistering, March of the Steele Men.

May Queen

(Continued from Page 1)
Queen include an 80 scholastic average, four years of school at Nebraska, one B activity, and no outstanding delinquencies. The candidate must be carrying at least 12 hours and have credit for 27 hours in her junior year.

Requirements for Mortar Board candidates are the same as those governing the May Queen selection, except that the candidates must be of junior standing and have full intentions of returning to school the following year.

Delegates

(Continued from Page 1)
on Friday morning on the subject, "High School and Junior College Terminal Courses."

Oldfather to Discuss Curriculum.
Dean Oldfather will talk on "The Curriculum in the University" at the Wednesday program of the commission on institutions of higher education. The dean is a member of the commission and also a member of the nominating committee of the association.

Dr. Rosenlof, who is secretary of the commission on secondary schools, will present the recommendation of the "committee of nine" at the meeting of the secondary commission Wednesday. This committee was appointed to study co-operative school standards.

Dean Henzlik will attend the general sessions and the meetings of the commission on curricula in high schools and colleges and the committee on teacher training. He is a member of both groups.

Dr. A. A. Reed will attend the general sessions and the meetings of the commission on secondary education. Several members of the faculty have held important offices in the association. Dr. Reed was president in 1933 and Dean Oldfather and Dean Henzlik have served as vice presidents.

Convention

(Continued from Page 2.)
tion among groups, interfraternity cooperation, education of freshmen, Panhellenic program for the coming year, deferred rushing vs. an early rush week, rushing methods, scholarship, and the purpose of the city Panhellenics as advisors to student delegates.

Bringing to a close the activities Saturday will be a formal dinner for the delegates of the seventeen universities and colleges of Missouri, Kansas, Iowa, Oklahoma, and Nebraska. The convention will conclude with a joint business session of both college and city Panhellenic delegates on Sunday, April 2.
