Migration shifted to Manhattan

Adamic sees race feeling in America

"Make America safe for difference," he says to co-attendees

"America has within itself the heterogeneous elements and races which will enable it to preserve the culture of the western world at this time, but this cannot be done unless prejudice and the barriers of race and nationality can be bridged," said Professor Adamic, of the business school, in a speech given on Saturday night in Temple yesterday morning.

Professor Adamic reverted to before 1850 when the immigrants, customs, and institutions of this country were predominantly Anglo-Saxon and religion was predominantly Protestant. He went on to describe the making of the American dream. But after 1850, according to Professor Adamic, "Immigration of other people than Anglo-Saxons began in 1884, with the socialist immigration treaty every five years. Today the newest industrial revolution brought thousands of the largest laborers and workers, who concentrated in the great cities."

50% foreign born in northeast, 40% in large cities, 10% in the northwestern industrial areas is composed of immigrants, and children of foreign born parents. (see CONVOCACTION, page 5)

Kansas draws 24 engineers

Faculty members go to SPEE meet today

Twenty-four members of the university faculty will attend the annual meeting of the Kansas-Nebraska section of the Society of Professional Engineers, to be held in Kansas City, Mo. At the conference, Prof. J. P. Oullet of the veterinary department, will speak on the subject of a program that he has devised for student engineers.

By the civil engineering department is secretary of the organization.

University instructors who will speak at the conference will be:

C. G. Parson, professor of engineering,

J. R. Burdine, chairman of the department of engineering mechanics,

W. J. Spencer, chairman of the department of mathematical sciences,

E. M. Martin, also of engineering mechanics, who will report on the national meeting of the engineers.

At the meeting of the mathematics section, the conference will be held in the chemistry building, according to the schedule of the conference are:

T. R. Jones, T. E. Finley.

T. E. Finley, T. R. Jones.

E. A. Greer, department of engineering sciences.

J. R. Keeler, and H. D. King.

L. A. Bingham, W. F. Morris, and C. A. Bannister.

C. H. White, department of physics.

C. M. Cardwell, department of mathematics.

Cards now available

Jury tickets, which must be obtained before 5 p.m. today at the registrar's office. After today all enquirers should go to the registrar's office, with the card before admitting you.
