

Huskers lose 40-33 to Iowa State

Yaffee tops lagging Husker score

Nebraska builds lead early in 2nd period, but trails for rest of game

Special to the DAILY NEBRASKAN. AMES, Ia.—Nebraska's rangy Huskers fell before the Iowa State Cyclones last night 40-33 in State gym, Ames. Nebraska made indications of a strong last half as they tied the count at 16-16 in the last minute of the first half and built up a 21-16 lead in the first three minutes of the second. However, the Cyclone quintet started moving and went ahead with ten minutes gone, never to lose the lead again.

Little Irving Yaffee headed the Husker scoring with 8 points. Frank Tallman following with 6. Gordon Nicholas and Al Budolfson led the Cyclones with 13 and 10 points respectively.

Budolfson first.

The first three minutes were scoreless. Budolfson broke thru the Husker defense for a marker.

Gene Littler packs thrill in Illinois relay carnival

Special to the DAILY NEBRASKAN. CHAMPAIGN, Ill.—Gene Littler, Nebraska's ace dashman, toured the 300 yard course at the Illinois relay carnival here Saturday night in 31.2 seconds to nose out Capt. Wilbur McCown in one of the most thrilling finishes of a meet that was packed with thrills.

The little red-head came within 1.4 seconds of the carnival record set by Gregg Rice of Notre Dame last year. Leading all the way he withstood a bold attempt by McCown in the final 20 yards to lead the way to the tape. Hunt of the Huskers tied Stolberg of Marquette and Decker of Michigan in

Yaffee followed with a free throw, but Budolfson continued his streak to dump in two more goals. Nebraska started eating on the Cyclone lead and just before the first half gun sounded Hartman Goetze sank a free throw to even the count. The score had stood 16-15 for three minutes before the free throw was made.

Opening the second half strong, Yaffee and Fitz counted to make the score 20-16. The rest of the game was a steady march for the Cyclone with the Iowans playing it safe the last few minutes.

Al Randall and Tallman were removed from the game after eight minutes of the second half with four fouls against them. After their removal the Husker offense bogged down to stay.

the pole vault at 13 feet, 6 inches. Smutz finished second in the third heat of the semi-finals of the 75-yard high hurdles but failed to place in the finals.

Three carnival records were broken and one tied as Illinois and Michigan shared the glory.

The Illini copped three firsts and the Wolverines won the four mile relay, the high jump and tied for the pole vault.

Frankforter—

(Continued from Page 1.)

He likes to keep in touch with students who have worked under him. He can recite a long list of names and positions which former students now hold and scarcely a week goes by but some drop in to see him.

He thinks teachers have a responsibility in molding the student personally as well as intellectually. He is not averse to criticizing a student's work, the tie he wears, or the way he combs his hair.

"Some of them get pretty sore at me," he says. "But I know that what these big companies are looking for. They want fellows who can make good an impression, who can get along with all kinds of people and put themselves across." One young man, he recalled, was so angry over a rebuke that he wouldn't speak to Frankforter all semester. After graduation, he wrote to apologize, having found a good job in the meantime.

"Apologies be damned," Frankforter wrote back. "As long as you're delivering the goods, that's apology enough for me."

Belongs to 17 groups.

The list of organizations of which he is either a member or advisor is lengthy. We counted 17. He is an ATO, a member of Phalanx and Scabbard and Blade. His military training makes him influential in the American Legion, the 40 and 8, and the Reserve Officers association. He is a past national officer of Alpha Chi Sigma, professional chemical society, past president of the American Chemical Society, now its secretary and vice president. Sigma Tau, Sigma Xi, Sigma Rho Tau, and Sigma Gamma Epsilon are other honoraries of which he is a member.

He gives from 20 to 25 lectures each year on military, popular, and scientific subjects before civic clubs, churches, and military organizations. In addition he makes three or four out-of-town lectures and a few radio talks. He is always in demand because of his experience and ability to entertain.

Didn't see France.

He did not see France during the war but was not left idle on this side. He was an infantry captain of the 86th division, most of which was broken up to join other divisions, and was later captain of the mounted Military Police. Then he was made chemist for the chlorine section of Edgewood Arsenal.

He was P. M. S. & T. at Nebraska in 1919, getting the job through the influence of Chancellor Avery whom he knew at Edgewood. He has kept up his military training each summer, attended the Army War College, and has been colonel of the 356th infantry since 1930.

He has been a senior counsellor of the Cornhusker Boys' State during the last three years.

Before the war his passion was music. He played the piano and pipe organ and directed a choir. He used to shoot a great deal but has not touched a gun since his son was killed in a tragic hunting accident several years ago. His principal hobby now is his workbench at home.

Comments on Falls City oil.

Commenting upon the Falls City oil well (he is a specialist in petroleum and metallurgy) Frankforter said that oil will be developed in Nebraska providing the strata now being bored does not prove to be the shallow end of the vein that covers several states. However, he thinks it will be useful only as cracked gasoline and treatment may be too expensive.

He has not found time to write much but has had a number of articles printed and is now at work on one to appear soon.

Insemination—

made successfully from Holland to England and from England to Holland, a much shorter distance than from Delaware to Nebraska. Recently a shipment was made all the way across the United States, but so far no calves have been dropped.

The royal blood of famous sires and high-producing dams flows through the veins of this calf. Her own sire bears the imposing title of "Winterthur Posch Great Select 750,000." He is owned by H. F. du Pont of the Winterthur Farm, Winterthur, Delaware.

Her paternal grand-sire was the leading honor sire in 1936 and brought \$10,000 in a 1929 sale. And his sire in turn was twice an All-American show bull. The dam of "Gerblair" owned by the University of Nebraska, was the highest producing cow in the United
