

### The girl meets the boys

"Too Many Girls."

## Saturday's game captains help open premier celebration

Nebraska-Missouri game captains Roy Petsch and Bob Bur-russ, together with Lincoln movie critic, Barney Oldfield, will open the celebration of the world premiere of RKO's "Too Many Girls" at 12:45 p. m. today, when they toss two autographed footballs from the roof of the Varsity theater. The festivities will be broadcast over KFOR.

The premiere showing of the picture, which is one of 15 such events in selected college towns, will be held today. The picture is scheduled to run here for one week.

In celebration of the opening, the UN coeds who catch the autographed footballs will be given tickets to the show for their sororities or 20 of their friends. To compensate those who do not catch the footballs, balloons containing 100 free tickets to the show will be released from the roof of the building at the same time.

Highlight of one of the picture sequences, pictured above, shows the girl, Lucille Ball, meeting the boys, who are, left to right, Hal Leroy, Eddie Bracken, and Richard Carlson.

George Abbott's stage success, "Too Many Girls," from which the movie was adapted, was instrumental in establishing the fad for wearing "beanies"—such as Lucille Ball is wearing in the picture. Guests of the Nebraska

coeds who catch the footballs will be presented souvenir "beanies" by the theater management.

The picture is based on student life at a mythical "Pottawatomie college" at Stop Gap, New Mexico. According to the contest rules, coeds may bring boy friends to catch the footballs for them.

### Dial Twistings

By Morton Margolin

MORE POWER.

Power of one of Lincoln's outlets for the Central States Broadcasting System will be increased to 250 watts straight thru instead of 250 watts by day and 100 watts by night, shortly, when KFOR acts on its new FCC permit and installs its new transmission equipment.

Along with the announcement of the permit, yesterday, KFOR officials announced that the station's transmitter would be moved from its present location to the southwest corner of 48th and Vine streets.

Preliminary work will start immediately, according to Mark Bullock, chief engineer, and may be finished by Jan. 1.

### DOWN-TO-EARTH FLIERS.

A pair of down-to-earth fliers are Parks Johnson and Wally Butterworth, stars of KFAB's "Vox Pop" program. They did their flying last week at Floyd Bennett field where the commanding officer of the naval reserve unit there gave them a taste of what the students go through. Both are still unsteady on their feet after a session in the Link training plane, which, although it doesn't leave the ground, gives the occupants the sensations to be had while flying under all kinds of weather conditions.

The pair will be back at the field tonight at 6:30 to interview the men and officers stationed there, for their weekly program.

### PRESIDENTIAL ADDRESS.

Speaking from the White House, President Roosevelt will deliver a message to the tenth annual New York Herald Tribune Forum on Current Problems, to be heard over KFOR at 3:45 p. m. Theme of the president's address is "Saving Democracy in the Western World."

### SPECIAL BROADCAST.

A special broadcast of the celebration of the opening of the premier of "Too Many Girls" at the Varsity will be aired over KFOR at 12:45 p. m.

## CBS narrator holds Hubbard honor award

Awarded only 11 times since its establishment in 1907, the Hubbard Medal of the National Geographic Society, is held by Dr. Roy Chapman Andrews, director of the American Museum of Natural History, who is heard every Wednesday over CBS as the narrator on the "New Horizons" geography and science program of "Columbia's American School of the Air."

Dr. Andrews won the medal for his more than twelve years of exploration in the Gobi desert in central Asia. Until his brave band of explorers in the desert uncovered dinosaur eggs, skeletons of the oldest as well as the largest known land mammals, and geological strata previously unknown, science was in complete ignorance of the existence of the richest fossil fields in the world.

The CBS expert has been a naturalist and explorer since boyhood. Born in Beloit, Wis., he made his earliest observations of bird and animal life in the woods and streams near his Wisconsin home. In 1906, he graduated from Beloit College, and immediately came to

## Rosenlof, Ferguson speak at universities meeting

Dean O. J. Ferguson of the engineering college and Dr. G. W. Rosenlof, registrar, university ex-

aminer, and director of admissions, spoke Monday before the sessions of the Association of Urban Universities meeting at Omaha. Dean Ferguson spoke on "The Accrediting Problem From the Standpoint of Professional

Schools." Dr. Rosenlof will discuss "Continuing Values in Accrediting."

Centennial museum of the University of Texas has a collection of dinosaur material from the Big Bend country.
