Pauley, students end dispute

Turnpike manager agrees to close hall on nights of university parties

The case of Students vs. Reon Pauley was closed in Mr. Pauley's favor Friday when the Turnpike manager pledged his support to university social functions; assured a group of students and faculty members that he would show his co-operation by closing his hall on the nights of the five major campus parties; and that he would assist the students in these nights in securing popular bands.

In return student representatives agreed to schedule these parties on Friday nights, wherever possible, and to place a list of dates in Mr. Pauley's hands far enough in advance to make conflicting bookings impossible,

willgiveannual band concert

University ROTC band of 80 members will present its annual concert this afternoon at three in the coliseum.

This symphonic group was selected from the larger marching band, which has received much praise for its appearances this year. Under conductor Don A. Lentz, the band will present a program of especial variety, featuring band literature of many different types.

Opening number is the impres-sionistic and brilliant "March and Scherzo" of Prokofeff, which is considered one of the most difficult selections in the band repertory. In a very different vein is the poliphonic Bach chorale "If Thou Be Near," which displays the organ-like quality of the band.

American composition.

The larghetto movement of the minor symphony of Earnest Williams, a contemporary American composer, is of special interest. Unlike most band literat. e, it is not an orchestral transcription but was written for the instrumental brilliance and color of the band. The work is full in reed voicing with much dramatic con-

Two numbers are included as especially representative of the works of Sousa, by conductor Lentz who formerly played in the Sousa band as well as the New York Philharmonic orchestra.

The closing selection, modern in character, is Bennet's "Cypress Silhouettes" which contains sev-eral "swing" passages.
