Marriage Series Proves Popular

The second of this year's series of lectures on the problems of marriage was held yesterday afternoon. Dr. Militzer addressed those attending on the subject of "Adjustment After Marriage."

Last Wednesday's lecture by Dr. Militzer attracted an overflow crowd of students and so this week the lecture was given in Parlors X and Y of the Union in order to take care comfortably of the large audience expected. Last year's marriage forums were very well attended and it seems with this evident interest on the part of students in the problems of marriage a course on the subject should be added to the university curriculum.

When the administration was approached some time ago about adding a course in marriage, university officials said they would be very willing to comply with the request if the sponsoring group could assure them that students had enough interest in marriage problems to justify the time and expense necessary for the addition.

With the attendance records of last year and the already very promising attendances at the initial lecture of this year, the committee on curriculum of the university should be

A War Ago

"There is but one aim of agriculture today and that is to help win this war," said Regent E. P. Brown in an address to the graduating class of the ag college. The war and its interest was the excuse made by Regent Brown for not speaking on agriculture as had been the custom for many years at commencement exercises.

"Some Compensations of the War" was his subject. Regent Brown listed equal rights of men, women; modern co-operation and representative government. He stated that one of the greatest achievements was the federation of the twenty-three allied powers to paint one of the grandest part in history.

Sixty-six were graduated and fourteen members of the class received military commission. This class was the smallest in a number of years due to the war.

Professor George N. Foster of law college spoke under the auspices of the bureau of publications of the state council for defense on "The Causes of the Great War." Professor Foster also addressed a mass meeting at West Point.

An urgent demand for women volunteer for foreign Red Cross service was received from Washington at state headquarters in Omaha and was sent to the university women by the state director. Three branches of service were opened including: canteen service, social service, and clerical service. Volunteers were sent either to France, Belgium or Italy.

assured that there is ample interest to justify adding the course. And if such a course is given next semester it would perhaps be best to handle it as the present course offered on World War II. In this way students who for any reason were unable to register for the course might derive the same benefit as those taking the course with credit.

THE ADVISABILITY OF ADDING SUCH A COURSE TO THE UNIVERSITY CURRICULUM CAN BE SEEN BY EXAMINING THE GREAT INCREASE IN MARRIAGES DURING TIMES OF WAR, YOUNG MEN AND WOMEN MARRYING IN HASTE BECAUSE OF EMERGENCY DO NOT LOOK AT THE MORE PROFOUND ASPECTS OF WEDLOCK AND, CONSEQUENTLY, MANY UNSUCCESSFUL MARRIAGES OCCUR WHICH, PERHAPS, MIGHT BE AVERTED TO SOME EXTENT IF THE YOUNG PEOPLE OF THE NATION WERE INSTRUCTED IN THE WHYS AND WHEREFORES OF MARRIAGE.

Eleanor'n Me

By Alan Jacobs

It's hard to believe all that you read in the newspapers these days what with the propaganda agencies of half a dozen countries working overtime. But we read an article the other day concerning the cannibals in New Guinea that interested us.

Cannibals have always been fascinating to us. They're so different from the average person that you run into, altho we must admit that we're not sure that they're so different because we have never run into one. That's why we were so interested in the article, for now we feel we have a pretty good chance to meet a cannibal.

From what we've heard, we rather think we would rather be a cannibal than meet a cannibal. That's a natural reaction, we suppose. We were never frightened at scenes showing them in the motion pictures, tho, we were more fascinated.

Perhaps our interest in cannibals is derived from our tremendous appetite. We seem to be always hungry. We can never find a food that will fill us up for more than an hour at a time. We had a huge steak with potatoes and all the trimmings the other night for dinner, and a half hour after eating we were hungry.

If we ever go to New Guinea and ever do meet a cannibal, we are going to ask him if he gets filled up shortly after eating. If he does, we're going to take part in some conversion—and we're not going to do the converting.

After you get used to it, cannibal life wouldn't be so bad; that is if you can eat something and satisfy your appetite.

Gosh, we're hungry.

Nutrition . . .

being offered by this department on the selection and care of home furnishings. Beginning today, this one-hour credit course meets Thursday at 8 a. m. in Andrews 217.

Included in this course will be the principles of design and color, in the choice and arrangement of home furnishings. According to home ec instructors this is especially useful at this time for more practical and economical buying and renovating of furniture in the home. Miss Evelyn Metzger will teach the course.

Campus . . .

(Continued from Page 1)

A female of the species, Wylla Vogelitzang, freshman, will have to take math next year and has resigned herself to her fate. "I kinda like it. In fact, the more I think about it, the more I like it."

Stumbling upon four engineering students was a windfall that doesn't happen often to this reporter (thank heaven), and their answers were surprisingly alike.

Don Bressler, freshman, announces loudly "Sure, I take math. I'm in engineering college and it's required. I'm going to take more of it next year."

Along the same lines were the answers of Will Wright and Jerry White, both freshmen. However, the vehemence of their professed liking for math varied according to the proddings of the other three not being interviewed.

OR After a Fashion.

With the words "I like it after a fashion," Carroll Orr, sophomores, summed up his feelings for math. Of course, he is in engineering college and must take more of it.

The only person interviewed who didn't have to take math as a requirement in any college, but was taking it because she liked it, was Dorothy Steinmeyer, freshman. In fact, she nearly snagged the reported into working a few

of her problems. "I'm probably going to take more of it next year." And with these noble aspirations ringing in our ears, the reporter took her leave.

Pre-med student, Eugene Kyle, freshman, declared, "No, I'm not taking math. I don't have to take math. I don't like math." Clear, curt, and concise, we call it.

Won't Be Too Bad.

Merle Birnegar, sophomore, will have to take six hours of math next semester for technical science. "But it won't be too bad, 'cause I like math."

No being a math major, the reporter scarcely dared add and subtract the number of people taking math, the number of people liking it, the number of people disliking it, or the number of people taking it for requirements to be met. So if you want to go through and count it on your fingers, maybe you'll come out with the result given in the first paragraph, we hope.

National . . .

(Continued from Page 1)

Some of those who have had no math at all are freshmen who plan to take courses in it later, or students who are not required to take math in order to obtain their degrees—such as fine arts majors. However, it is possible in most colleges to go the entire four years

Bulletin

PERSHING RIFLES.

Pershing rifles will meet today in room 208, Nebraska Hall at 5 p. m.

AG MATINEE DANCE.

Ag college will hold a matinee dance today from 5 to 6 p. m. in the activities building.

CHRISTIAN SCIENCE MEETING.

Richard J. Davis, Christian Science minister of San Jose, Calif., will speak at a Christian Science meeting today at 7 p. m. in rooms XYZ of the Union.

DEFENSE COMMITTEE.

The Defense committee will meet today at 5 p. m.

and obtain a degree without having had any mathematics.

Interviewees were next asked: "Generally, do you like math?"

The results:
Yes 53%
No 40
Undecided 7

One of those answering "Yes" to this question definitely should know what he is talking about by now. A graduate student at the University of Cincinnati, he has taken 25 different math courses.

Princeton university in the last academic year gave \$170,895 in scholarship grants, the largest sum in the university's history.

Cold college, Waterville, Maine, is completing a new campus on a 600-tract tract two miles from its present location.

"We're backing them up"

Marching right along with the armed forces of this country are thousands of telephone workers.

They work side by side with the Army and Navy. Wherever the need is communications, you are likely to find telephone men and their trucks and materials.

Day and night the order is for speed and more speed.

They wear no uniforms, these telephone workers, but men in uniform know how much they are putting into the Nation's biggest job. They see it first-hand and they know it is first-rate.
