BY MARY LOUISE GOODWIN.

In tune with the onimous wind which twirls the gals bustles high into the grey sky, we open our ears and hear the howl of downright malicious gossip. . . . We haven't learned or heard either, but we do know that the maltese cross of Harold Hunt now goes and comes with Dorothy Freeborn, Webster at Wesleyan but now going to school on this campus.

What these early morning constitutionals won't do for you . . . physical fitness will . . . Anyway everyone's happy now cause the junior officer's new uniforms have come and the military ball is only two days away.

And So to the Ball.

Gas rationing doesn't seem to be bothering such people as Chi O Edna Mae Niedermeyer, Dorothy Carnahan, and Marion Truhlsen who will be stepping lively Friday night with Sig Nu Don Anawalt, Phi Psi Ed Danielson, and SAE Bob Cooper as escorts. . . . The Alpha Chis are ganging up and taking in the affair enmass, for instance, Tiny Davis, Jean Larson, Carolyn Windle, Ruth Lund, Roma Stahl, and Jerry Buller will watch the grand march or march in it with Herb von Goetz, Phi Delt; Larry Cook, Phi Gam, Jack Hughes, another Phi Gam; Les Buckley, Phi Delt; Rog Smith, Phi Delt; and Bob James, ATO.

Oh yes, the ATO's will all be there. A fairly representative group will be Bill Munson with KKG Mary Ralston, Roland Findley and Theta Pat Parrish, Les Murray and Alpha Chi Lois Schofield, and Roy Lundgren with Pi Phi Virginia Davidson.

Feud's Off.

Who was it that said that the Sig Chis and Alpha Phis weren't dating? Here are a few of their Military Ball dates: Paul Crellin and Jo Martz (this promises further further developments), Paul Toren and Joan Witt, John Boulware and Margie Patterson, and Jim Johnson and Shirley King.

Enough about the ball for today . . . The blackout is only two weeks away so arrange your dates early. We understand that an SAE and DG have one fixed up already.

Lt. Paul Svoboda of the United States Marines dropped in to pay ye old campus a little visit yesterday. A marine looks good even in olive drab.
