

AUF Drive Helps Alumnus War Prisoner

By Polly Peterson.

We came here to talk for (no not Joe) but fellows like Joe, one in particular who most of us call Bud or as he was known to his professors, Lowell Walker. Bud was a student like any one of us. He was a leader on the campus, a Corncob, and active in campus politics. All this was in 1941.

In 1943 Bud is also a student but this time his address isn't Bud Walker, student, University

of Nebraska, but Prisoner of War, Germany. He is a student only through the great work of the WSSF.

The World Student Service Fund's office received by cable Bud's name, together with the studies he wished to pursue. Books in these fields, many of them collected in American colleges and others purchased, were sent to Geneva and then on to prison camp.

A WATCHTOWER.

... the symbol of a prison camp.

Gifts Help Students.

Bud is but one of more than five million prisoners of war, most of which are in Germany and Russia. These "universities in captivity," made possible by gifts from students are really bright spots in the gloomy picture of our war torn world. Books are more precious to these men than to any other group of people. Their studies connect everything good and sound in

the past with their hopes and ambitions for the future. Students interned in camp greatly cherish the feeling that their fellow students in the outside world are concerned about them and their problem.

After reading of Bud's story, a student from our own campus, none of us should refuse to contribute to the AUF. Everyone who contributes is buying the student's share in the building of a better world.
