

Ragged Edges

BY PAT GILLIGAN.

Sweets for the sweets—and the Sigma Kappas were the receivers with Frances Richmond and Virginia Reiter flashing the sparklers from Sig Ep Dale Steele and Al Briggs of Berkely, California. It seems to be all the rage this spring. Speaking of diamonds, hear rumors that another well known coed will join the list real soon.

The Inter-frat Ball continues to be the main topic of conversation for the week end. Mary Armour will attend with old pinmate, Dick Stone. "Where a spark remains, the flame may burn again." Right? ? Marge Settell will find good company in Su Harrison—Dick Folda is importing his home town pinmate, Janie Conrad—while Chuck Hendrickson is working hard to get high school flame to make the trip. Roy Neumann has turned to greener pastures—object, Jackie Tobin. Gracie Smith also will be with new material—Dale Hatch, the lucky boy.

Jim Strahan, of basketball fame, found a fly in the ointment when he came to town with big plans for Sarah Murray this week end. The trouble is he is not included in her plans.

"Nancy" is the latest member of the Beta household—but don't get excited if you hear them talking because topic of discussion is merely the new mongrel mascot.

Steady does it—at least Donna Eilers and George Hansen decided it was the thing for them—While Morrie Delehant and Jean Tishammer are making it as steady as possible.

Our nominees for best deal of late! Jack Cressman hiked to the Hannah hut last night and pinned the Beta Theta Pi emblem port 'n starboard of Nell Scott's anchor. May we all add "Congrats!"

Election . . .

Observing Students See Bright Meteor Streak at Sunset Time

BY RUTH ANN FINKLE.

Several students have replied to the inquiry in Tuesday's paper by Prof. O. C. Collins of the observatory relative to a meteor observed Sunday night about which he wished to have more information.

Kim Magee was coming to Lincoln from Waverly about 6 p. m. Sunday, or sunset time. Looking in front and to the left he saw the meteor low in the sky. It lasted about 10 seconds and then went down into a cloud. The meteor was long and something like a blowtorch.

17th Street.

Betty Jane Dickerson, another student, was going down 17th

street at 6:15 Sunday night and saw it directly ahead of her down the street.

Robert S. Orr saw the meteor Sunday about 6 p. m. while on the road between Omaha and Lincoln, just this side of Gretna. At first it was about 15 degrees above the horizon in the western sky, traveling in a southeasterly direction. The meteor was large and blue-white in color and burned out about 30 degrees above the horizon in the southwest.

Professor Collins wishes to thank all persons who have sent in information about this occurrence and to encourage anyone else who may have seen it to contribute their information to the observatory.

Come Get 'Em Coeds, or We'll Throw 'Em Away

One bit of blue cloth, a saw, a hammer, a pair of dilapidated huraches, a blue blaze trimmed in white, a bottle of "Chase Me" perfume, a piece of rotting baloney, a copy of "Could It Be?", Van Johnson's befreckled photograph, and any number of other such are locked up in a trunk.

The trunk is in the basement

Dye, Priscilla Flagg, Phyllis Sorenson, Janice Chappel and Beverly Jackson. Grace Smith, Jackie Wightman and Harriet Bridenbaugh are the sophomore board members.

of the Daily Nebraskan office. These goodies listed above are contained in this trunk. They are left-overs from the Coed Follies show. Come get 'em, gurlies, or we throw 'em away!
