

## Honoraries To Announce Member List

At the joint meeting of Phi Beta Kappa and Sigma Xi to be held at a dinner at the Student Union, April 3, both societies will announce the names of their new members elected this spring.

Phi Beta Kappa announced seven members in the fall for the class of 1947 and it is anticipated that another 12 students will be elected. Sigma Xi will announce new associate members numbering about 20 students, it is estimated.

The joint meetings of the two societies was inaugurated in 1915 and has been maintained since that time. The speaker for these occasions is brought to the campus at the expense of the two societies as a service to the university.

After the dinner the public is invited to the Union ballroom for the address of Prof. John Ise, the guest speaker for this year. Professor Ise has announced his topic as "Homo Sapiens in the New World."

All reservations for the dinner must be made by April 1st according to the secretaries of the societies. Prof. David Fellman, president of Phi Beta Kappa, will preside at the meeting.

## Water Safety Classes Slated For Students

Male students of the University of Nebraska will be given a chance to further their swimming abilities starting April 28. A representative of the American Red Cross Water Safety Council will conduct courses and examinations in life saving and water safety work at the coliseum pool.

The course will start April 28 and continue until May 9, with the classes scheduled to meet each afternoon from 5 to 6. Men who are interested in the course are urged to be in satisfactory swimming condition when the course begins. This will eliminate the necessity of any conditioning work during the class periods. Coach Lepley's advanced swimming class on Monday, Wednesday, and Friday is open to those wishing to do conditioning work. The recreational swimming period from 3:45 to 5 daily is also available.

Coach Lepley also plans to conduct a learn-to-swim campaign. The instructors for this program will be those men who have passed the Red Cross course. Classes from 4 to 5 and 5 to 6 are planned, with the complete program running from May 12 until May 30.

Men wishing additional information may see Mr. Lepley or call Extension 21.

He couldn't have meant it as an April Fools joke... Could he?

## Ag Feeders Day Program Announced

Plans for the 34th annual Feeders' Day which is to be held Friday, April 18 on ag campus have been released by Professor William Loeffel, chairman of the animal husbandry department.

Feeders' Day which is sponsored by the animal husbandry department is instrumental in revealing experiments in breeding and feeding carried on at the college of agriculture in the past year. The traditional event is attended by persons throughout Nebraska and neighboring states who are interested in livestock breeding.

Professor Loeffel said that attention would not be confined exclusively to cattle, but that feeders of hogs and sheep would also find phases of the program which will interest them.

Professor M. L. Baker, in charge of feeding experiments, told of plans for showing the results of experiments with native hay, vitamin A and proteins.

Past Feeders' Day programs have averaged crowds of some 2,500 to 3,000 farmers and ranchers. The largest crowd ever to attend one of the days, exceeded 4,000. During the war years the program was somewhat curtailed and it was necessary on occasion to hold the traditional day via radio broadcasts.
