How a city's voice was restored!

Early on December 14, 1946, flames gutted the Central Office at River Grove, Illinois. Telephone service for 10,000 families ceased to exist.

Even as the fire burned, restoration work was begun. Emergency telephone headquarters was set up. Mobile equipment arrived to handle calls of first importance.

Telephone men from distant points came to aid the local forces. Bell System standardization proved itself again for all men were able to use the same methods, the same tools, the same Western Electric equipment. From Western Electric plants

hundreds of miles away the needed supplies—the right kinds and amounts—were started toward River Grove.

In a matter of just 11 days... a record accomplishment... two Quonset huts were erected, new switchboards installed, splices and connections made. River Grove's communications system was restored.

Planning well in advance for both emergencies and normal growth, is a task of telephone management. The many and varied problems presented offer a stimulating challenge—promise adventure and opportunity—to men who choose telephony as a career.
