

Concert Program

A Salute to the United Nations

Overture to Mignon.....Thomas
Evening Prayer and Dream Pantomine
from 'Hansel and Gretel'.....Humperdinck
Blue Danube Waltz.....Strauss

INTERMISSION

Dance of the Hour
from "La Gioconda".....Poncielli
Capriccio Espagnol.....Rimsky-Korsakov
Chilean Dance.....Tucci
Brazilian Folk Song.....Arranged by Guenther
Marche Slave.....Tschaikowsky

Free refreshments may be obtained at the table provided

Clyde Eagleton Continues Talks On UN Today

Prof. Clyde Eagleton, specialist in the United Nations Secretariat, on the organization and work of the interim committee (Little Assembly), is on the University campus this week for the third UN clinic being put on this summer.

In his second lecture of this clinic, Professor Eagleton will discuss "Possible Effects of Recent Political Developments on the United Nations." This talk will be given at 11 a.m. Tuesday in the auditorium of Love Library auditorium. The lecture is open to the public. Monday night he spoke on "UN, How Can It Be Strengthened?" This topic is the general theme of the whole clinic this week.

Professor Eagleton was a United States delegate to the San Francisco organization meeting of the United Nations in 1945. He was also technical expert in the United States delegation to the Dumbarton Oaks conference in 1944 and was a member of the league of nations association.

A legal expert in the depart-

ment of state from 1943 to 1945, Eagleton was vice-chairman of the commission established to study the organization of peace.

A member of the American council institute of Pacific relations and council on foreign relations, the United Nations specialist has been professor of international law at New York University since 1923.

He took his A.B. degree at Oxford University where he was a Rhodes scholar. He received his A.M. from Princeton and his Ph.D. from Columbia in 1928. Princeton presented him with an honorary L.L.D. in 1941.

Professor Eagleton is the author of many textbooks and scholarly articles including: "International Government", "Analysis of the Problems of War," and "The Forces That Shape Our Future."

On the university's United Nations series, Eagleton follows Dr. William Agar who spoke here June 28 and 29 on the theme "UN, What Are Its Achievements?" He also described some interesting personalities in the United Nations.

Panama Canal Zone Asks NU Help in School Improvement

The Panama Canal Zone has asked the university to help improve the standard of teaching in the public schools there.

N. F. Thorpe, assistant director of the university extension division, just returned from an inspection of the U. S. insular possession's schools, said the assistance was asked by Lawrence Johnson, superintendent of schools.

Projects

Four major projects are contemplated, Mr. Thorpe said, costs of which would be paid entirely by fees. They are:

(1) College correspondence courses for the Canal Zone's 114 colored alien (Panamanian) school teachers who instruct 3,800 colored elementary and high school pupils. At present none have college degrees. Principal courses sought are education, English, mathematics, political science and history. Two thirds of the colored teachers expressed an interest in completing the requirements for a degree from the university.

(2) "Off campus" college-level classroom courses for colored teachers which would be taught in the Canal Zone by colored teachers approved by the University of Nebraska, and which would follow a course of instruction prepared by the university. (The university last year conducted 60 similar off campus courses for Nebraska school teachers in various parts of the state.)

To Supplement.

(3) High school correspondence courses to supplement the offerings in high schools for colored pupils which, at present, are occupational schools stressing the

manual arts such as welding, carpentry and shop work.

(4) College correspondence courses which would provide up to a third year of instruction for many of the 200 white students who attend the Canal Zone's junior college and which would enable them to attend universities and colleges in the United States and obtain an A. B. degree in about a year.

The Canal Zone request, Mr. Thorpe said, was the largest single request for Nebraska correspondence courses from any country outside the continental United States. At present courses are being sent to students in Japan, Alaska, Hawaii, Germany, Argentina, Ecuador and Peru. In addition, hundreds of servicemen all over the world are taking Nebraska courses by mail through the U. S. Armed Forces Institute. The division currently has 5,230 high school enrollments and 3,000 college enrollments in correspondence work.

Graduate Student Studies at Helena

Howard W. Lorenz, graduate student at the University, will make geological and ground water studies at the Helena, Mont., project, it was announced last week.

Lorenz left last week on his assignment as geologist for the U. S. geological survey's ground water division with Lincoln headquarters. He will study ground water development in connection with its possible use in pump irrigation and conduct drainage studies in the area. The Helena project is part of the Missouri basin development program.

Orchestra to Present 'Pops' Concert July 15

Noonan to Play Specialties at 'Pops' Concert

A special attraction of Wednesday evening's outdoor "Pops" concert will be the performance of John P. Noonan, one of the nation's outstanding snare drum technicians, who is on the campus conducting a special three-day clinic on percussion instruments.

The clinic is sponsored by the school of fine arts. Music teachers and school band and orchestra directors are invited to attend. There is no charge. The classes are being held at 10 a.m. and 3 p.m. in room 103, Temple theater.

Noonan's appearance on the campus is part of the school of fine arts summer music program. Each year a specialist in some field of music conducts a three day clinic on the campus.

He began playing the drums at the age of 13. He has studied under such famous drum teachers as Max Nickell, E. M. Metzinger and Roy C. Knapp. In addition to teaching, he has written many articles on percussion techniques. He will discuss at the clinic the rudiments of good drum playing, and the principles involved in tympani, bells, xylophone and chimes.

BIZ ED TEACHERS.

All students in summer school who are teachers of business or who are preparing to teach are invited to the business education picnic Thursday, July 15, at 6:30 p. m. in Pioneers park.

Picnickers will meet at the west entrance of Teachers College at 6 p. m. for transportation. Reservations should be made with Mrs. Alma Lynch in TC 109, by Tuesday noon.

Union Weekend Includes Band Dance Friday

For the first and only time during the summer, the Union will hold an orchestra dance on Friday.

Riley Smith and his orchestra have been engaged for this week's Unionizer in the ballroom. Starting at 9 p. m. the dance will last until midnight. Admission price will be 44 cents per person tax included.

Also on this week's Union calendar is the regular craft instruction in the craft shop. The shop opens at 1 p. m. and projects begin at 4 p. m.

On Tuesday, too, is the weekly siesta film hour in the Union lounge at 4 p. m.

Wednesday is a full day with bridge instruction by Dale Ball in Room 313 at 4 p. m.; craft instruction at 7 p. m. in the craft shop, and the weekly sports film at 12:30 p. m. in the lounge.

An open ping pong tourney will be held at 2 p. m. Saturday in the ping pong room. Entrants must be registered at the Union check-stand before noon. Saturday night there will be a free jukebox fling in the ballroom.

This Sunday's free variety show will be "My Friend Flicka" at 7:30 p. m. in the ballroom. Also on Sunday will be the 5 p. m. coffee hour and organ interlude.

Open Air Program Heard At East Stadium Entrance

An Open-Air "Pops" Concert sponsored jointly by the Union and the School of Fine Arts, will be heard Wednesday evening at 8:00 at the east entrance of the memorial stadium.

Directed by Emmanuel Wishnow, the university symphony orchestra will present their "salute to the United Nations" program.

This third concert of its kind has become an annual affair. It was attempted for the first time two years ago and was pronounced a "huge success." This summer the orchestra will present two concerts, the first Wednesday evening and the second, July 21.

In order to make the audience comfortable and free from bothersome mosquitoes and chiggers, the concert area will be sprayed with DDT prior to the concert. Also adding to audience comfort will be the serving of free lemonade available at any time during the program at tables which will be set up for the purpose.

Chairs for the audience will be set up in from the stadium's east entrance where the 60-piece orchestra will play. There will be three sections of chairs placed on the wide approach walk and grass.

It was estimated that at least 1,200 people attended last year's "pops concert. The program is free and open to the public.

Enrollment Hits 3,805 Totaled

Enrollment in the University of Nebraska summer session totals 3,805 students, Dr. G. W. Rosenlof, director of admissions, said Friday.

This compares with last year's record of 4,408 students, and a prewar average of 2,500.

Dr. Rosenlof said enrollment was composed of about three men to every woman. Totals by colleges and divisions: Agriculture, 250; Arts and Sciences, 584; Business, 584; Dentistry, 46; Engineering, 546; Graduate, 891; Junior Division, 37; Law, 6; Pharmacy, 108; Teachers, 703, and Students-at-Large, 102.

Foundation Receives Gift Of \$93,000 For Chem Use

A gift of \$93,000 to the University of Nebraska Foundation was announced last week by Perry W. Branch, director-secretary.

It was given the Foundation by Mrs. Marybeth N. Brown of Niagara Falls, N.Y., in memory of her husband, Mortimer Jay Brown, former Nebraskan and eminent American scientist. Dr. Brown died in 1945.

The gift was in the form of 500 shares of common stock of the E. I. DuPont de Nemours Co., which bear a current market value of \$186 per share.

Use of Income.

Income from the sum, to be known as "The Mortimer J. Brown Memorial Fund," will be used for any or all of three general purposes in the field of chemistry at the university: (1) Graduate fellowships for basic or industrial research; (2) for strengthening faculty competence in the field of chemistry where the usual means for obtaining competence are not adequate; and (3) for the purchase of specialized equipment. Expenditures will be directed by the Executive Committee of the Foundation upon recommendation from the chemistry department.

Dr. Brown was born in Chester, Neb., Dec. 25, 1882 where his father, O.L. Brown, was a pioneer merchant. He graduated from the University of Nebraska in 1905 with a bachelor of science degree. While in school, he was active in campus affairs including membership in the Innocents Society, senior men's honorary society.

Went to China.

Upon graduation, Dr. Brown went to China and taught in a provincial university for two and a half years. He returned to this country and enrolled in Cornell University where he obtained a doctors degree.

In 1911 he accepted a position with the Roessler & Hasslacher Chemical Co. of Niagara Falls, now a subsidiary of the DuPont company. As a scientist and later as a research vice president, Dr. Brown was active and prominent in the fields of high temperature electrolytic processes, nitrogen

compounds, and chemicals for metallurgical and textile industries.

His work carried him to all parts of the world. He was a frequent visitor to Nebraska and was well known among university and industrial chemists. He retired in 1932. He died at his Niagara Falls home on April 7, 1945. He was a life member of the university alumni association.

Mrs. Brown, the former Marybeth Wallace of Omaha, attended the university in 1906. She taught physical education at Wesleyan university and other Nebraska schools.

Two daughters, Mrs. Eric Proctor and Mrs. George Rowland, both of Niagara Falls, and a brother, Albert L. Brown of Chester, survive. A nephew, Harold Brown of Chester, attended the university and graduated as a mechanical engineer in 1939.

Schossberger Will Review Hitrec Book

In the first of two scheduled book reviews for this summer, Miss Emily Schossberger, University editor, will review "Son of the Moon" by George Hitrec on Thursday at 4 p. m. in the Book Nook of the Union.

"Son of the Moon" is the story of a young man in modern India. It is concerned with conflicting Indian society.

The book review programs in the Union E. Schossberger are given free of charge.

Next week, Miss Schossberger will review "The Steeper Cliff" by David Davidson. The University editor presented a series of book reviews in the Union last summer.
