## and all of them made possible through profits!

In the last eight years International Harvester has increased the number of its employes in the United States from 60,000 to 90,000 .

This means that 30,000 new jobs have been created-good jobs at good pay for junior executives, engineers, draftsmen, technicians, among many others. And every one of these jobs carries with it plenty of chance for advancement.
This great progress in job-making has been made possible by the profits which over the last 20 years the company has plowed back into the business. That is why we like to say profits mean progress for everyone.

## For example

During the eight year period in which our force was increased from 60,000 to 90,000 employes, the aver age straight-time hourly earnings of our non-salaried factory employes have increased $92.6 \%$ per cent.
Customers have benefited from the fact that our margin of profit on sales today is two-fifths less than in 1941.

And our stockholders have had a fair return on the savings they have invested in our company. Dividends on common stock this year are $4.65 \%$ on the book value, as compared with $4 \%$ in 1941.

In 1948, the company had profits, after taxes, of 4.7 cents from each dollar of sales

We know it is our continuing ability to earn a reasonable profit that has made it possible for International Harvester in the past year to serve more people-customers, employes and stockholders-in greater measure than ever before. Profits mean progress for everyone.

We hope to be able to continue to make a reasonable profit with each succeeding year in the future-to keep right on creating more and more jobs at good pay for young men entering industry, just as we have done in the past.

INTERNATIONAL
