

Stipends: Students Win Six Awards

Six graduate students were announced today as winners of the University Regents Fellowships and the Franklin E. and Orinda M. Johnson Fellowships for the coming school year by Dr. Harold Wise, acting dean of the Graduate College.

Recipients of the Regents Fellowships, each carrying a stipend of \$1,500 with remission of tuition, are:

—Fred Phelps Jr., who is now seeking his Doctor of Philosophy degree in physics. He received his Bachelor of Arts degree in 1954 from Carleton College, Northfield, Minn., and his Master of Arts degree in 1956 from the University of Nebraska.

—James Stone, earned his Bachelor of Arts degree in 1947 from Dana College and his Master of Arts degree in 1952 from University of Nebraska. Stone is now seeking a Doctor of Philosophy degree in history. From 1947-52, he was a teacher at Stanton, and from 1952-56, at Hastings. He was graduated in 1943 from Avoca, Ia., high school.

Recipients of the Johnson Fellowship, each worth \$1,200 with remission of tuition, are:

—Hilda Lein Ching, who will seek her Doctor of Philosophy degree in zoology and anatomy. Twenty-two-years-old, she received her Bachelor and Master's degrees from Oregon State College in 1956 and 1957 respectively.

—Robert Newmeyer, who is seeking a Doctor of Philosophy degree in history. He earned his Bachelor of Arts degree, magna cum laude, from Doane College, Crete, in 1952, and his Master of Arts degree from University of Nebraska in 1956. After completing his work at Doane, he served two years in the U. S. Army. He was graduated from Central City high school in 1948.

—Frederick Norstadt, who is seeking his Master of Science degree in agronomy. He received his Bachelor of Science degree from Peru State Teachers College in 1950. From 1950-52, he was an instructor at Arnold high school; from 1952-54, principal at Holmesville high school; and from 1954-55, instructor at North Platte high school. He was graduated from Riverton, Ia. high school.

—John Sheedy, who is seeking his Master of Arts degree in the classics. He earned his Bachelor of Arts degree in 1957 from the University of Nebraska. From 1953-56, he was a military jet interceptor pilot in the Air Force. He is 28 years old.

Former Prof Made Advisor To Publisher

Dr. David Fellman, who began his teaching career in 1934 at the University, was recently appointed Advisory Editor of Dodd, Mead and Company, Inc. in the field of political science.

Fellman received his A.B. and M.A. degrees from the University, where he was elected to Phi Beta Kappa, and his Ph.D. from Yale Fellow, Block Fellow and Sterling Fellow at Yale.

After teaching at the University for some time, he became Professor of Political Science at the University of Wisconsin in 1947.

Fellman has served as member of the executive council of the American Political Science Association and on the editorial board of the "American Political Science Review." He has been president of the Midwest Conference of Political Scientists, and is the first editor of the new "Midwest Journal of Political Science."

Writing a forthcoming volume, "The Defendant's Rights", he has also contributed chapters to several other books and as the editor of "Reading in American National Government."

Dodd, Mead and Company will publish a selection of textbooks in political science under Fellman's editorship.

University Dames

The University Dames, an organization for the wives of university students, entertained Thursday evening at their annual spring reception which was

held at the home of Mr. and Mrs. Clifford M. Hardin.

Pictured (seated, left to right) are Mrs. Rex Paul, Mrs. F. William Woukon, Mrs. Richard

Dunn, Mrs. Hardin, Mrs. Robert Galloway, and Mrs. Faz Haghiri. Standing (left to right) are Mrs. E. L. Beranek, Mrs. John Brandenburg and Mrs. Charles Johnson.

Honor Books On Display In Library

The top honor books, selected by the Chicago Book Clinic, are now on display in the lobby on the second floor of Love Library, and will continue to be on display the rest of the week, according to Bernard Kreissman, assistant director of the library for the humanities.

The University is honored to be the first to display the collection. From here it will go throughout the nation on tour.

The exhibit has been arranged by the humanities division staff of the Library, with exhibit materials supplied by private collections as well as the University Art galleries. The exhibit is being held partly in conjunction with the convention of the University Press directors, now meeting in Lincoln.

The top honor books on display are, in the opinion of the Chicago Book Clinic, the "64 best" books produced in the Midwest last year. Selection was made on the basis of book design, typography, paper, jacket design, cover makeup, illustrations and all other aspects of the graphic arts as applied to book production, although such criteria as good design with economy and the suitability of the type to text are also important factors, according to Kreissman.

Also included in the exhibit are the books of commercial publishers private presses, house organs and particularly a large sampling of the work done by University presses of the Mid-west.

NU-Meds Election

The NU-Meds will hold election of officers at a meeting at 7:30 p.m. Wednesday at the Union. Dr. H. Blum will speak on "Alcoholism from a Medical Viewpoint."

Ag Economics Picnic

The Agricultural Economics Department's annual Ag Ec Picnic will be held Thursday at 5:30 at Pioneer Park for all students interested in Agricultural Economics as an occupation.

A car pool will leave the Ag Union at 5:15 p.m. for anyone needing a ride. All regular Ag Ec Club members, faculty and graduate students are invited to attend the annual picnic.

Young GOP's Plan Picnic

The University Young Republicans Club will hold a picnic for its members, Thursday afternoon, at 5:30 p.m. The picnic party, JERRY BROWN — Show above final meeting of the club this term.

All the members are invited to attend, the charge is 50c. They will meet in front of the Union. Those planning to attend are asked to notify Joanne Allen, secretary, phone 2-1926, by Wednesday afternoon.

On The Social Side: Miami Triad Scheduled For The Coming Weekend

By JAN FARRELL Society Editor

On the wake of a very hectic and highly successful Ivy Day comes the Miami Triad this weekend. I just hope the Beta's, Phi Delta's and the Sigma Chi's have sufficiently recovered from last week.

Congratulations to all the new members of the Black Plaque and to the last year's group for being able to keep the selection such a deep, dark secret. Believe me, the excitement and enjoyment was greater this year because there was no advance information.

Monday there were announcements of one marriage, one engagement, and four pinnings.

Marriage:

Anne Lee Brooks, Zeta Tau Alpha junior in Teachers from Rugby, Tenn., to Bill Reisher, junior in Business Administration from Benkelman.

Engagement:

Judy Jervis, Alpha Omicron Phi freshman in Teachers from Sidney, to Ronald Gilbrith, from Sidney.

Pinnings:

C. C. Carden, Pi Beta Phi junior in Arts and Sciences from Omaha, to Ray Griffin, Sigma Alpha Epsilon

Election Results . . .

(Continued from Page One.)

- Dennis Elder 212
- Frances Gorulay 81
- Kathleen Roach 76
- Charlene Anthony 74
- Suzanne Swingle 74
- Sally Dowias 72
- Patricia Boyd 69
- Sarajeen Flanagan 62
- Rychie E. Van Orman 54
- Sharon Mae McCormick 50
- Jane Curfman 43
- Judith Truell 42
- Marcia Ann Boden 42
- Karen Kelly 38
- Eileen Santin 36
- Ruth Cartee 36
- Rebecca Colwell 27
- Caroline Skopec 17
- 462 Valid Ballots; 64 Invalid Ballots; 526 Total Ballots.

DENTISTRY

- Steven Leeper 17
- Erik Donald Olsen 9
- James David Whitter 2
- 23 Total Ballots.

Council members previously elected by their respective organizations are Marilyn Jensen, BABW; David Rhoades, CCR; Jeff Vanderburg, Inter-Coop Council; Prudence Morrow, Panhellenic; Carolyn Williams, Coed Counselors Board.

Other organization officers include "Zeke" Niebaum, Interfraternity Council; Jackie Miller, AWS; Tom Smith, RAM; Dan Schick, Corn Cobs; Barbara Lantz; Tasseis, and Terry Mitchum, YWCA.

Historical Association: Max Savelle Discusses Life Of Liberalism

The answer to whether or not liberalism is dead depends on the validity of the "scientific evidence presented by the historians, which say it is a thing of the past, or the biologists, who believe that it is still alive, in the opinion of Dr. Max Savelle, professor of history at the University of Washington.

Addressing the 50th annual convention of the Missouri Valley Historical Association meeting at the University Thursday, Dr. Savelle reviewed the arguments supporting each contention.

Such historians as J. H. Hallowell, Thomas Neill and Arnold Toynbee, philosophers such as Jacques Maritain and theologians such as Peinhold, Niebuhr have signaled the end of liberalism, he said.

He said that the conditions of fact in modern society seem to bear out the testimony of these students and observers.

"The steady expansion of the functions of the omniscient state," the historian declared, "has automatically brought with it a directly proportionate shrinking of the area of freedom for the individual."

Protests that liberalism remains alive have been registered by such philosophers as Bertrand Russell, Morris Cohen and Joseph Krutch, Dr. Savelle continued, but he added that such protests have been based chiefly upon logic. "When," he asked, "has the logic of philosophy prevailed against the logic of events?"

He said that the most powerful evidence that the basic premises of liberalism are still valid is to be found in the science of biology. He explained that all biologists indicate that individual human intelligence, at the level of in-

vention and imagination is, as a matter of biological fact, autonomous.

Describing the two concepts as "mutually contradictory", Dr. Savelle said that if the historian accepts the one, history itself has no validity. If he accepts the other, all history becomes the record of the human animal using its mind as a set of mechanisms for achieving success in the struggle to survive and find the good life.

Tri-Delts Award Two Scholarships

Marcia Schammel and Sylvia Steiner were announced as the winners of the Delta Delta Delta scholarships at a dinner on Monday.

Each of the women receives a scholarship for \$100.

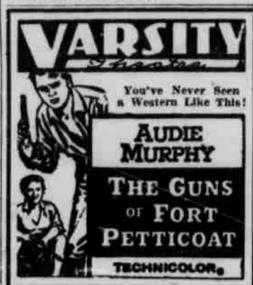

Marcia Schammel is a member of Delta Delta Delta and is a freshman in Teachers College.

Sylvia Steiner, who lives at Howard Hall, is a freshman in music education.

The awards are based on scholarship, need and possible future contribution to the community. Members of the committee who selected the recipients include Dean Johnston, Mrs. Fern Brown and a Tri-Delt alum.

Physics Discussion

Dr. Theodore Jorgensen, professor of physics, will discuss Lande's approach to Quantum Mechanics, Thursday, at 4:15 p.m. in Room 210 of Brace Laboratory.

"Business and pleasure do mix..."

ROBERT H. WENTORF, JR., Ph.D., University of Wisconsin, 1951

"Until I joined General Electric's Research Laboratory in 1951, I never realized science could be such a challenge — or so much fun. My job involves research in physical chemistry — the investigation of new ideas which can lead to new and better products people can use. In a company of this size, I have the unique advantage of having the tools and facilities I need and the experience of others close at hand. And in return, of course, I'm expected to apply myself to the best of my ability in each new job. As I see it, if a big company like General Electric invests time, money and faith in my creative ability, and if I respond by creating, then we both benefit. To me, at General Electric business and pleasure do mix."

created borazon — a completely new, diamond-hard substance which promises far-reaching effect on industrial processes and everyday living.

There are more than 27,000 college graduates at General Electric. Each is provided the opportunity for self-development in the hope that his creative ability will bring forth new ideas. As General Electric sees it, these new ideas, stemming from man's native curiosity, will lead to the development of countless products as yet undreamed of for our nation's defense, industries, and homes.

A physical chemist at General Electric conducts studies of the atomic structure of matter, and of the way atoms and molecules interact under a wide variety of conditions.

The achievements of 31-year-old Robert Wentorf speak well of his ability to make the most of the opportunities offered at General Electric. He recently
