

Annual Ag Conference Thursday

Panel Discussion, Biochemist Featured

The tenth Annual Feed and Nutrition Conference at the University of Nebraska College of Agriculture will be held Thursday, October 30.

Featured are a panel discussion on "Integration among Farmers, Suppliers and Dealers," and a speech by the head of biochemistry department at South Dakota State College Experiment Station.

How To Integrate

Panel member J. K. Lepley director of sales for Foxbit Feeds in Des Moines, believes the panel problem is one of, "How shall we best integrate for the good of all?" The graduate of Northwest credits claims that integration increases circulation and advertising costs.

In his opinion, there is no question of whether or not we shall integrate. Maintaining that "integration was, is, and always will be," he pointed out man has been integrating since he learned to barter and live together.

Due to the recent revival

of interest in silage in the Great Plains area, Dr. Oscar Olson of South Dakota State College, will speak on "Losses in Stored Silage" at the biochemistry auditorium.

Silage Problem

"Failure to exclude air from silage has caused much damage," according to Olson.

He believes some storage methods preserve less than half of the material ensiled. The biochemist points out that more emphasis should be put on selecting the type of silo which will return the most silage per ton of material ensiled.

Olson, who received both his B.S. and M.S. degrees South Dakota State College, was awarded his Ph.D. in biochemistry at Wisconsin in 1948. After serving with the Michigan department of health, he became head of biochemistry at the South Dakota Agricultural Experiment Station in 1951.

Two NU Profs Named by Group

Two University professors were selected Saturday to head the Mountain-Plains chapter of the American Association of Teachers of German.

Dr. Paul Schach, professor of Germanic languages, was named president, and Dr. Donald Allison, assistant professor of Germanic languages and literatures will serve as secretary.

College and high school teachers from Colorado, Wyoming, South Dakota and Nebraska attended the annual meeting.

Dr. Ottoson Attends Ag. Ec. Conference

Dr. Howard W. Ottoson, chairman of the department of Agricultural Economics at the College of Agriculture, was among 300 experts from 56 countries returning from the triennial International Conference of Agricultural Economists at Mysore, India.

The conference centered around discussion of economic problems in underdeveloped countries such as India.

"Like many underdeveloped countries, increasing population is the main problem in India today," Dr. Ottoson explains, "because of its relationship to food supply."

Increased Population
 "India currently has less food per capita than 20 years ago when the population was lower. Now population is continuing to increase through improved sanitation methods, vaccination and medical care."

Ottoson thought India was led by devoted, hard-working people from Nehru on down.

"Nehru is a very impressive man, personally. He has a wide grasp of the political and economic problems not only of India but the world in general," said Ottoson. "He is a leading world statesman—realistic, energetic, but humble and obviously loved by the common people."

Other Problems
 Ottoson said that India's other main problems seemed to be:

—India is trying to do too many things too fast.

—In agriculture, yields are low, farming methods are primitive, and land use is wasteful.

—There is a great need for mass education. There is a lack of teachers at the village level, where the key to economic adjustments are held.

Adjustments
 In discussing countries such as India, Dr. Ottoson said he was impressed with the agreement among delegates to the Conference on

approaches to solving economic adjustments in underdeveloped countries.

In addition to touring India, Dr. Ottoson also visited the British Ministry of Agriculture and Oxford University in England, the Royal Agricultural College at Uppsala, Sweden and the Food and Agricultural Organization of the United Nations at Rome, Italy.

People Must Participate —Peterson

"More active participation in politics by the citizens of Nebraska and other Plains States is important because of our minority status."

So said agricultural economist Dr. Everett Peterson, who spoke to the annual Nebraska Social Work Institute at the University Friday.

Peterson suggested a "do-it-yourself" approach for bringing stability, progress and prosperity to Nebraska. First, he said, Nebraskans should study their own family and business situations.

The citizens of Plains communities should organize to analyze their needs and problems and take necessary action. Then a council of progressive leaders from business, agriculture, labor, the professions and public service should be organized on a state-wide basis to survey the state's resources and problems and to recommend actions, he added.

Honorary Producers

WINNERS OF THE 1958 Honorary Producer contest display their trophies at the opening performance of the new University Theatre season, Wednesday night. From left to right are Dean of Faculties Adam Breckenridge, who presented the trophies; Jerry Sellentini, Theta Xi, second, men's division; Judy DeVilbiss, Chi

Omega, second women's division; Carroll Kraus, Kappa Sigma, winner men's division; Alice Baumgartner, Alpha Xi Delta, first women's division; Ann Meyers, Zeta Tau Alpha, third women's division; Bill Duffy, Delta Sigma Phi, third men's division and Steve Schultz, master of ceremonies and president of Masquers.

Spanish Movie Series Planned

"Flamenco," first of three Spanish movies to be sponsored by the Department of Romance Languages, will be shown Wednesday.

The department will sponsor the series of three Spanish

movies to be shown in Love Library Auditorium at 7:30 p.m. on Oct. 28, Jan. 7 and Feb. 12. "Cradle Song" and "La Forza del Destino" are the others to be shown.

Tickets are \$1 for the series and may be purchased at the Romance Language Office, Burnett Hall 304, or at the door on the evening of the first movie.

Union Get-together

The "Know How Jamboree," a get-together for all Union workers, will be held at Camp Minis Kuya Tuesday.

Union personnel, board members, chairmen and assistants and Ag Union workers are also invited.

your future is NOW at **CONVAIR**

The Convair engineering department is a real "engineers" engineering department — imaginative, energetic, explorative — and exceptional care is exercised to make certain that each new employee is assigned to the job for which he is best qualified, depending upon his interest and education.

One of the finest graduate training programs in industry is offered by Convair-Fort Worth. Classes are conducted in the plant after working hours by university professors, with emphasis on both technical and management studies. Graduate work in allied sciences is also available on-campus as are undergraduate courses of a technical or professional nature. Personal recognition and advancement, based strictly on merit, provide an incentive for rapid professional growth. In addition, you will discover top-notch engineering facilities, excellent working atmosphere, personal job advantages and salaries that are tops in the industry!
