

Freshmen, Principals To Confer

Representatives from 212 Nebraska high schools have registered to attend the 12th annual Principal-Freshman Conference at the University Thursday.

"The 335 advance registrations from 212 schools indicate that we will have the largest attendance since the conferences began," said John E. Aronson, director of admissions and program coordinator.

At least 3,000 University freshmen will meet with their former principals and teachers in afternoon sessions to exchange views on the students' adjustment to University course work.

Due to a shortage of available rooms on campus for the principal-student conferences, several campus religious centers have agreed to let us use their facilities, Aronson said. A special morning seminar program which was initiated last year has been expanded this year as a result of interest expressed by principals. The seminar programs in the Nebraska Union are conducted by University professors who discuss their own fields of study as it applies to freshmen students — recent graduates from the principal's schools.

During three sessions, starting at 9:30 a.m. in the Nebraska Union, principals may attend seminars on advanced placement, English, mathematics, placement in chemistry, natural sciences, languages and social sciences.

Deadline For Court Announced

Applications for Student Court are due 5 p.m. Thursday and interviews will be held Friday.

The applications can be picked up and left in folders on the ASUN office door in the Nebraska Union.

Candidates for chief justice must be in Law College.

Nebraskan Want Ads

These low-cost rates apply to all classified advertising in the Daily Nebraskan: standard rate of 50¢ per word and minimum charge of 50¢ per classified insertion.

Payment for these ads will fall into two categories: (1) ads running less than one week in succession must be paid for before insertion; (2) ads running for more than one week will be paid weekly.

THE ADVOCATES . . . Dick Sherman and Carolyn Petty, were one group of singers at Saturday night's hootenany sponsored by the Friends of the Student Nonviolent Coordinating Committee. The hootenany was held in the Nebraska Union.

Parents Day Designed For NU Freshmen

The first Parents Day especially designed for several thousand parents of University freshman will be held on the campus Saturday.

Activities during Parents Day, which will be sponsored by the Innocents Society, will include a general convocation, lunch at various campus living units and discussion sessions conducted by faculty members in the various colleges.

"We are gratified by the early response of parents to this new program which takes the place of a similar event traditionally held in the fall," Skip Sorief, president of Innocents, said.

"We believe the program will allow parents to become more familiar with their son's or daughter's curriculum, the University and campus life," he noted.

Guest speakers at the Saturday morning convocation will include Dr. A. C. Breckenridge, vice chancellor;

Kent Neumeister, ASUN president; and L. W. Chatfield, associate dean of students.

Music will be provided by the University brass ensemble and following lunch in the various living units, parents will be able to attend a number of college seminars starting at 2 p.m.

Following the general college meetings, the groups will divide up to attend departmental coffee hours with faculty members.

Seminars and coffee hours will be conducted by the College of Agriculture and Home Economics, College of Arts and Sciences, College of Business Administration, College of Engineering and Architecture, and Teachers College.

Come and learn about advancement prospects BEYOND the initial entry salary of \$625 for the B or better average students of the Bachelor's level.

Hoover Praised

Cont. from Page 1, Col. 6
play the percentages," he said.

"In 1956, I made predictions extending the 1965 enrollment which weren't bad, but not good enough to be used that far in advance."

Suppose that in 1935, I was to have made predictions for 1958," Hoover said. "How could I know Hitler would invade Poland and Russia, that on Dec. 7, 1941, Japan would bomb Pearl Harbor, that following World War II we would be involved in a cold war with Soviet Russia, that there would be a police action in Korea, what kind of prosperity we would have or the increasing number of students going on to higher education."

"That is why projections that far in the future are dangerous," he said. "The accuracy is constantly threatened by these unknowns that we can't possibly see."

Legislative Sessions

Hoover, Chatfield, and Breckenridge all agreed that a yearly session of the Legislature would aid those making enrollment estimates as it would place closer together the time the estimate was made, and the time it was for.

Also in charge of registration, which was roundly criticized by many students this semester, Hoover was described by one student as an "angel of mercy" as the slightly-built man passed out appointment cards to a mass of first-day enrollees.

Chatfield noted that pulling cards in some form or another is still the most common thing at other universities. He noted that with the University's system, it is more convenient for the student by not having to stand in line and also makes better use of less space by spreading registra-

tion out over a period of time.

Noting that incoming freshmen do not have to worry at all about registration, but only have to send in their class choices, Chatfield jokingly said, "The first time I was involved in the Coliseum rat race, I didn't understand why freshmen stayed through New Student Week."

Chatfield said the pre-registration this semester was an attempt to find out where some of the backlog of classes was.

"However, not all departments were able to make adjustments to this," he said.

Supply, Demand

"Our job is to take as much of the mechanics of registration as possible off the backs of faculty and students, but this is hampered by the problem of supply and demand," Hoover explained.

"We have X supply and are facing Y demand," he said. "However, Y is greater than X."

The registrar has no authority to extend class sizes one inch beyond the instructions of department heads.

"We have no authority at all to open new sections or expand existing ones," he said. Hoover explained that as soon as the sections start closing up, the registrar's office informs the department heads and the department head must then advise his office as to the next steps to be taken, if any.

When asked whether the problem is not enough space for classes or not enough instructors to teach them, Hoover said, "We've been able to find space so far—but I must qualify it with so far."

'Too Few Teachers'

Chatfield, noting the problem of too few teachers, said, "One of the reasons is that we can use available space more hours of the day and we can only stretch instructors so far."

"University faculty members are in greater demand now than any of the years I've been in education," Hoover said. "We're in direct competition with industry . . . and this is largely a problem of more money offered by industries."

"There is a surprising number of dedicated souls who want to teach," Hoover noted, "but not enough of them to meet our growing demands." Hoover praised many University faculty members who receive better offers of money, but who stay with the University.

Hoover credited Chatfield with the early admission, early advising and early registration of incoming freshmen that "saves them the traumatic experience of having to go through the old type registration (pulling cards)."

He described Mrs. Irma Laase, assistant registrar, as the "unsung heroine." She takes into consideration the personal problems when filling the registrations of students who may have to work or have some other problem, he said.

Interviews For Keys Committee To Be Friday

Interviews will begin 3:30 p.m. Friday for three members-at-large on the AWS senior keys committee.

Carol Bischoff, AWS board member, explained that the committee will include several AWS board members and representatives and the members-at-large.

She said they would choose one sophomore and two juniors as members-at-large.

Applications can be found in a folder on the AWS door in the Nebraska Union and are due back by Friday noon.

Campus Calendar

- MONDAY
- INTER Varsity, 8 a.m., Nebraska Union.

 - UNICORNS — Public Relations, 7:30 p.m., Nebraska Union.
 - MATH Counselor Program, 7:30 p.m., Nebraska Union.
 - LIFE Committee, 4 p.m., East Union.

Business Education Honored

The University's College of Business Administration along with other business colleges throughout the country are celebrating "Higher Education For Business Week" Monday through Friday.

This week approximately marks the fiftieth anniversary for the American Association of Collegiate Schools of Business (AACSB) of which the University's school helped start in 1913.

The AACSB is the official accrediting agency in higher education for business at the undergraduate and graduate levels. Its membership includes 117 universities and colleges.

"This organization should have a special interest to students and staff at this University since the University was one of the fourteen founding schools," C. S. Miller, dean of the Nebraska business school, said.

He noted that the founder of the University's College of Business Administration and its first dean, Dr. James E. LeRossignol, was the eighth president of the AACSB in 1926.

Miller explained that the College of Business Administration was established by an act of the Legislature in 1919 under the leadership of Dean LeRossignol.

For six years prior to this date it was known as a school of commerce, having been created by the Board of Regents in May, 1913, he said.

The constitution of the association declares, "the object of the Association is the promotion and improvement of higher business education in North America."

Graduating Engineers and Scientists:

LOCKHEED MISSILES & SPACE COMPANY
will be interviewing on campus March 28.

AN EQUAL OPPORTUNITY EMPLOYER

SENIOR ENGINEER SMOKER

Since time began man has provided for the future. Neanderthal man protected himself from Nature's dangers by living in a cave. Medieval Kings provided for the future by building moats around their castles. Today, man provides for the future by selecting a sound career. But choosing a career is only part of the story!

Where and How you apply your professional training are the main factors to consider when putting your ability to work.

For this reason, McDONNELL Aircraft will conduct a Senior Engineer Smoker to explain the career opportunities offered at McDONNELL . . . designers and manufacturers of the Phantom II Jet Fighter and Gemini Spacecraft. Get together with the McDONNELL men for an informal chat. Get professional, experienced answers to your career questions. Find out about St. Louis . . . Gateway to the West and Outer Space thanks to McDONNELL. Provide for your future by attending the Senior Engineer Smoker. Find out why McDONNELL has the engineering career you're looking for.
